FACULTY OF APPLIED SCIENCES  
DEPARTMENT OF MATHEMATICAL SCIENCES

MAI41: ENGINEERING MATHEMATICS – I

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	0	1	5	4
Marks	100	0	-	100	

**A. Objective of the Course:**

A good Engineer has to have an excellent background of Mathematics. Engineering Mathematics is one of the essential tools for learning Technology, Engineering and Sciences. This course lays the foundation for engineering Mathematics in subsequent semesters, so that students get a sound knowledge and important aspects of the course. The objectives of the course are to:

1. Understand applications of differentiation in respective Engineering Branch
2. Understand basics of Matrix Algebra and methods to solve problems
3. Understand complex numbers, their properties and applications to Engineering problems
4. Understand solution to algebraic equations
5. Understand the sequence and series, conditions for convergence and divergence

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1.	Higher order derivatives and applications	09
2.	Partial differentiation	10
3.	Applications of Partial differentiation	09
4.	Matrix Algebra -I	10
5.	Algebra of Complex numbers and Roots of polynomial Equations	12
6.	Infinite Series	10

Total hours (Theory): 60  
Total hours (Lab): 00  
Total hours(Tutorial): 15  
Total hours: 75

**C. Detailed Syllabus:**

- |     |  |          |     |
|-----|--|----------|-----|
| 1   | Higher order derivatives and applications  | 09 Hours | 15% |
| 1.1 | Set theory and Function  |          |     |
| 1.2 | Limit, Continuity, Differentiability for function of single variable and its uses. |          |     |

1.3	Successive differentiation: $n^{\text{th}}$ derivative of elementary functions viz., rational, logarithmic, trigonometric, exponential and hyperbolic etc.		
1.4	Leibnitz rule for the $n^{\text{th}}$ order derivatives of product of two functions		
1.5	Expansion of Functions: Maclaurin's & Taylor's series expansion		
1.6	L'Hospital's rule and related applications, Indeterminate forms.		
2	<b>Partial differentiation</b>	10 Hours	17%
2.1	Partial derivative and geometrical interpretation		
2.2	Euler's theorem with corollaries and their applications		
2.3	Chain rule		
2.4	Implicit differentiation		
2.5	Total differentials.		
3.	<b>Applications of Partial differentiation</b>	09 Hours	15%
3.1	Tangent plane and normal line to a surface		
3.2	Maxima and Minima		
3.3	Lagrange's method of multiplier		
3.4	Jacobian		
3.5	Errors and approximations		
4.	<b>Matrix Algebra- I:</b>	10 Hours	17%
4.1	Definition of Matrix, types of matrices and their properties		
4.2	Determinant and their properties		
4.3	Rank and nullity of a matrix		
4.4	Determination of rank		
4.5	Gauss Jordan method for computing inverse, Triangularization of Matrices by Gauss Elimination Process		
4.6	Solution of system of linear equations		
5	<b>Algebra of Complex numbers and Roots of polynomial Equations</b>	12 Hours	19%
5.1	Complex numbers & their geometric representation		
5.2	Complex numbers in polar and exponential forms		
5.3	De Moivre's theorem and its applications		
5.4	Exponential, Logarithmic, Trigonometric and hyperbolic functions.		
5.5	Statement of fundamental theorem of Algebra, Analytical solution of cubic equation by Cardan's method		
5.6	Analytic solution of Biquadratic equations by Ferrari's method with their applications.		
6.	<b>Infinite Series</b>	10 Hours	17%
6.1	Introduction to sequence and series		
6.2	convergence and divergence of infinite series		
6.3	necessary condition for convergence		
6.4	Geometric series		
6.5	Tests of convergence viz., comparison test, p-series test, ratio test, $n^{\text{th}}$ root test, Leibnitz test, integral test and power series.		
6.6	Convergence of Taylor's and Maclaurian Series		

#### D. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.

- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures/laboratory which carries a 5% component of the overall evaluation.
- Minimum two internal exams will be conducted and average of two will be considered as a part of 15% overall evaluation.
- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weighting of 5%.
- Two Quizzes (surprise test) will be conducted which carries 5% component of the overall evaluation.

#### **E. Student Learning Outcomes:**

1. At the end of the course the students will be able to understand the basic concepts of Engineering Mathematics.
2. Student will be able apply concepts of these course to learn MA 142: Engineering Mathematics-II and may be some courses other then Mathematics.
3. Students will be able to apply the mathematical concepts in other engineering courses.

#### **F. Recommended Study Material:**

##### ❖ Text Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 8<sup>th</sup> Ed., Jhon Wiley & Sons, India, 1999

##### ❖ Reference Books:

1. M.D. Wier, et. al., Thomas' Calculus, 11<sup>th</sup> Ed., Pearson Education, 2008
2. Stewart James, Calculus Early Transcendental, 5<sup>th</sup> Ed., Thomson India, 2007
3. Wylie & Barrett, Advanced Engineering Mathematics, Mc graw Hill pub.
4. Greenberg, M.D., Advanced Engineering Mathematics, 2nd ed., Pearson

## CEI41: COMPUTER CONCEPTS & PROGRAMMING

### Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	4	-	8	6
Marks	100	100	-	200	

### A. Objective of the Course:

The main objectives for offering the course computer concepts and programming are:

1. To create students' interest for programming related subjects and to make them aware of how to communicate with computers by writing a program.
2. To foster the ability of solving various analytical and mathematical problems with algorithms within students.
3. To make them learn regarding different data structures and memory management in the programming language.
4. To promote skills like Development of logic and implementation of basic mathematical and other problems at individual level.
5. To make them learn and understand coding standards, norms, variable naming conventions, commenting adequately and how to form layout of efficient program.
6. To explain them concepts of pointer & file management concepts.

### B. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction to Computation	03
2.	Algorithms and Flowcharts	03
3.	Introduction to Programming	01
4.	Introduction to 'C'	01
5.	Constants, Variables & Data Types in 'C'	03
6.	Operators and Expression in 'C'	03
7.	Managing Input & Output Operations	03
8.	Conditional Statements & Branching	04
9.	Looping	05
10.	Arrays	04
11.	Character Arrays	05
12.	User-Defined Function in 'C'	06
13.	Structures	05
14.	Pointers	06
15.	File Management in 'C'	05
16.	Dynamic Memory Allocation	03

Total hours (Theory): 60

Total hours (Lab): 60

Total hours: 120

### C. Detailed Syllabus:

1.	<b>Introduction to Computation</b>	03Hours	05%
1.1	Program, Software, Instruction, data, debug, test, file, directory, linking, loading, libraries, compilation, execution.		
1.2	Introduction, and Block diagram and functions of various components of computer, Concepts of Hardware and Software, Types of software.		
2.	<b>Algorithms and Flowcharts</b>	03 Hours	05%
2.1	Algorithms, Flow-charts		
3	<b>Introduction to Programming</b>	01 Hours	02%
3.1	Program & Programming, Programming Languages, Types of Languages, Compiler and Interpreter.		
3.2	Procedure Oriented Language and Object Oriented Language.		
4.	<b>Introduction to 'C' language</b>	01 Hours	02%
4.1	History of C, Characteristics of C, Basic structure, Compiling process of C Program.		
5.	<b>Constants, Variables &amp; Data Types in 'C'</b>	03 Hours	05%
5.1	Character set, C tokens.		
5.2	Data types – classes of data type, declaration & initialization, User-defined type declaration - typedef, enum, Basic input-output operations, Symbolic constant (#define).		
6.	<b>Operators and Expression in 'C'</b>	03 Hours	05%
6.1	Classification of operators: Arithmetic, Relational, Logical, Assignment, Increment / Decrement, Bitwise, Special Operators. Unary, Binary and Ternary Operators, Shorthand Operators.		
6.2	Arithmetic expression, Evaluation, Type conversion: Implicit & Explicit, Precedence and Associativity.		
7	<b>Managing Input &amp; Output Operations</b>	03 Hours	05%
7.1	Input a character, Introduction to ASCII code, Various library functions from ctype.h.		
7.2	Formatted input using scanf( ), Formatted output of integer and real data using printf ( ).		
8	<b>Conditional Statements &amp; Branching</b>	04 Hours	07%
8.1	Decision making using if, if...else statement, nesting of if...else, else...if Ladder.		
8.2	Switch, use of if...else instead of conditional operator, goto statement.		
9	<b>Looping</b>	05 Hours	08%
9.1	Need of looping, (pre-test) entry-controlled loop: while, for, (post-test) exit-controlled loop: do...while, difference, Use of sentinel values.		
9.2	Nesting of looping statements, use of break & continue, use of if...else in loop, infinite loop.		
10	<b>Arrays</b>	04 Hours	07%
10.1	Need of array, Declaration & Initialization 1D array, Programs of 1D.		
10.2	2D array, Memory allocation of 1D and 2D array, 2D array basic programs.		
11	<b>Character Arrays</b>	05 Hours	08%
11.1	Difference of character array with numeric array and importance of NULL character.		

11.2	Declaration, Initialization and various input and output methods of string, formatted output of string, arithmetic operations on characters.		
11.3	Various functions of string.h: strlen, strcat, strcmp, strcpy, strrev, strstr, etc.		
11.4	Two dimensional character array (table of strings).		
<b>12</b>	<b>User-Defined Function in 'C'</b>	<b>06 Hours</b>	<b>10%</b>
12.1	Need of modularization, advantages, Introduction to user-defined function, Function Prototype, Function Call, Function Body.		
12.2	Call by value, Actual & Formal Arguments, return value, Categories of functions, Nesting of Functions, Recursion.		
12.3	Array as Function arguments, Storage Classes: Scope, Life of a variable in 'C'.		
<b>13</b>	<b>Structures</b>	<b>05 Hours</b>	<b>07%</b>
13.1	Need of user-defined data type, Structure definition, Declaration and Initialization of variables, Array as member, Array of structure variables.		
13.2	Structure within structure, Structure as function arguments, Union, Bit fields.		
<b>14</b>	<b>Pointers</b>	<b>06 Hour</b>	<b>11%</b>
14.1	Introduction to pointer, declaration & initialization, access value using pointer, indirection (*) operator.		
14.2	Pointers in expressions, scale factor, ID-array and pointer, pointer with strings, Array of pointers.		
14.3	Pointer as arguments in function, Call by address, Functions returning pointers, Pointers with structures, Pointer to pointer.		
<b>15</b>	<b>File Management in 'C'</b>	<b>05 Hours</b>	<b>08%</b>
15.1	Introduction, need, create and close file, modes of file, read & write single character and integer to file, use of fprintf and fscanf functions.		
15.2	Error handling functions, random access of files using ftell, rewind, fseek, command line argument.		
<b>16</b>	<b>Dynamic Memory Allocation</b>	<b>03 Hours</b>	<b>05%</b>
16.1	Introduction, memory allocation process		
16.2	Use of functions: malloc(), calloc(), realloc() and free().		
16.3	Allocation of memory for array & structure.		

#### D. Instructional Method and Pedagogy:

- At the beginning, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aids like multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures and laboratory
- The course includes a laboratory, where students have the opportunity to build appreciation for the concepts being taught in lectures.
- Experiments/Tutorials related to course content will be carried out in the laboratory.

#### E. Student Learning Outcomes:

After completing this course, the student should demonstrate the knowledge and ability to:

1. Implementation of code for numerical calculations
2. Efficient programming related to scientific simulation in their projects.
3. Demonstrate a range of basic programming and IT skills
4. Design programs involving decision structures, loops and functions.
5. Gain the complete knowledge on arrays, structure, functions, union, pointers and files.

## F. Recommended Study Material:

### ❖ Text Books:

1. Programming in ANSI C, 6<sup>th</sup> Edition by E Balagurusamy, McGrawHill
2. Let us C, 13th Edition by Yashwant Kanetkar, BPB Publication
3. C Programming Language (ANSI C Version), 2/e by Brian Kernighan, Dennis Ritchie

**FACULTY OF TECHNOLOGY & ENGINEERING**  
**M & V PATEL DEPARTMENT OF ELECTRICAL ENGINEERING**  
**E EI41: BASICS OF ELECTRONICS & ELECTRICAL ENGINEERING**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	2	0	6	5
Marks	100	50	0	150	

**A. Objective of the Course:**

This course covers the basic principles and laws of electrical and electronics engineering with emphasis on the analysis and application to simple practical engineering problems.

The course objectives (CO) are to:

1. Introduce basic terms and units related to electrical engineering
2. Understand the basic concepts in the field of electrical and electronics engineering
3. Focus on the fundamentals of electrostatic and electromagnetism
4. Analyze the series and parallel AC systems
5. Solve single phase and polyphase circuits
6. Comprehend electronic devices, digital numbers, logic gates and communication systems.

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1	Basic Electrical Terms and Units	06
2	Electrical Circuit Analysis	08
3	Electrostatic	08
4	Electromagnetism	08
5	AC and DC Fundamentals	06
6	Single Phase AC Series and Parallel Circuits	07
7	Polyphase Circuits	05
8	Basics of Electronics	12

Total hours (Theory): 60

Total hours (Lab): 30

Total hours: 90

**C. Detailed Syllabus:**

- |          |  |          |     |
|----------|--|----------|-----|
| <b>1</b> | Basic Electrical Terms and Units   | 06 Hours | 10% |
| 1.1      | Basic terms related to electrical engineering, their definition, units and symbols, equations  |          |     |
| 1.2      | Ohm's law, resistor and its coding, properties, temperature coefficient of resistance, resistance variation with temperature, examples |          |     |

<b>2</b>	<b>Electrical Circuit Analysis</b>	<b>08 Hours</b>	<b>13%</b>
2.1	Kirchoff's current and voltage law, mesh and nodal analysis, Examples		
2.2	Series-parallel network, Star-Delta transformations, potential divider		
<b>3</b>	<b>Electrostatic</b>	<b>08 Hours</b>	<b>13%</b>
3.1	Capacitors, charge and voltage, capacitance, electric fields, electric field strength and electric flux density, relative permittivity, dielectric strength, Examples		
3.2	Capacitors in parallel and series, Calculation of capacitance of parallel plate and multi plate capacitor, examples		
3.3	Energy stored in capacitors, types of capacitor, charging and discharging of capacitors on DC, examples		
<b>4</b>	<b>Electromagnetism</b>	<b>08 Hours</b>	<b>13%</b>
4.1	Magnetic field, its direction and characteristics, magnetic flux and flux density, magneto motive force and magnetic field strength, examples		
4.2	Faraday's law of electromagnetic induction, Fleming's left hand and right hand rule, Lenz law, force on a current carrying conductor, examples		
4.3	Self and mutual inductance, coefficient of coupling, series and parallel combination of inductances, rise and decay of current in an inductive circuit in DC, examples		
4.4	Comparison between electrical & magnetic circuits		
<b>5</b>	<b>AC and DC Fundamentals</b>	<b>06 Hours</b>	<b>10%</b>
5.1	Generation of AC and DC voltage, Waveform and definition of its terms, relation between speed, frequency and pole		
5.2	Average and RMS value and its determination for sinusoidal and non-sinusoidal wave shapes, examples		
5.3	Phasor representation of alternating quantities		
<b>6</b>	<b>Single Phase AC Series and Parallel Circuits</b>	<b>07 Hours</b>	<b>13%</b>
6.1	R-L and R-C series circuit, power in ac circuits, examples		
6.2	R-L-C series circuit, resonance in R-L-C series and parallel circuit, Q-factor and bandwidth, examples		
6.3	Solution of series and parallel circuits, phasor method, admittance method, complex algebra method, examples.		
<b>7</b>	<b>Polyphase Circuits</b>	<b>05 Hours</b>	<b>08%</b>
7.1	Generation of three phase emf, phase sequence, Definitions		
7.2	Star and delta connection of three phase system, voltage and current relations in star and delta connected system, Examples		
<b>8</b>	<b>Basics of Electronics</b>	<b>12 Hours</b>	<b>20%</b>
8.1	Electronic Systems: Basic amplifier, voltage, current and power gain, Basic attenuators, CRO		
8.2	Transmission and Signals: Analog and digital signals, bandwidth, modulation and demodulation, Filters		
8.3	Forward and reverse bias of PN junction diode, zener diode, Rectifiers: Half wave, full wave - bridge and centre tap, L and C filters for smoothing		
8.4	Transistor: Bipolar junction transistor, construction and biasing, configuration, transistor as a switch and amplifier		

#### D. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures and laboratory which carries 5 Marks weightage.
- Two internal exams will be conducted and average of the same will be converted to equivalent of 15 Marks as a part of internal theory evaluation.
- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weightage of 5 Marks as a part of internal theory evaluation.
- Surprise tests/Quizzes/Seminar will be conducted which carries 5 Marks as a part of internal theory evaluation.
- The course includes a laboratory, where students have an opportunity to build an appreciation for the concepts being taught in lectures.
- Experiments/Tutorials related to course content will be carried out in the laboratory.

#### E. Student Learning Outcomes:

On the completion of the course one should be able to:

1. Identify resistors, capacitors and inductors reading.
2. Understand the basic electrical laws and apply these laws to solve electrical network
3. Identify the property of magnetic materials and understand the laws of emf generation
4. Solve the series and parallel AC and DC circuits for single and polyphase networks.
5. Define different terms of alternating quantities
6. Design AC-DC rectification circuits, operate basic electrical and electronics instruments
7. Operate the circuits with logical gates and transistors

#### F. Recommended Study Material:

##### ❖ Text Books:

1. Elements of Electrical Engineering and Electronics by U.A. Patel and R.P. Ajwalia
2. A Text Book of Electrical Technology by B. L. Thareja, S. Chand
3. Principles of Electrical Engineering and Electronics by V.K. Mehta, S. Chand

##### ❖ Reference Books:

1. Hughes, Electrical Technology, Pearson Education
2. Electrical Engineering by Del Toro

##### ❖ Web Materials:

1. Exploring Electrical Engineering  
<http://www.facstaff.bucknell.edu/mastascu/eLessonsHTML/EEIndex.html>
2. Video lectures by Prof. Umanand, IISc Bangalore on Basic Electrical Technology

FACULTY OF TECHNOLOGY & ENGINEERING  
MANUBHAI SHIVABHAI PATEL DEPARTMENT OF CIVIL  
ENGINEERING

CLI42: ENVIRONMENTAL SCIENCES

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	2	0	-	2	2
Marks	100	0	-	100	

**A. Objective of the Course:**

1. To impart basic knowledge about environment and thereby developing an attitude of concern towards environment.
2. To inculcate alertness towards environment.
3. To make awareness on delineating on various environmental pollution and their effects on environment.
4. To deliver a comprehensive insight into natural resources, ecosystem and biodiversity.
5. To develop the curiosity and visionary of student in relation to environment.

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction	05
2	Environmental Pollution	12
3	Ecology & Ecosystems	10
4	Natural Resources	03

Total hours (Theory): 30  
Total hours (Lab): 00  
Total hours: 30

**C. Detailed Syllabus:**

<b>1</b>	<b>Introduction</b>	<b>05 Hours</b>	<b>24%</b>
1.1	Basic definitions		
1.2	Objectives and guiding principles of environmental studies		
1.3	Components of environment		
1.4	Structures of atmosphere		
1.5	Man-Environment relationship		
1.6	Impact of technology on the environment		
<b>2</b>	<b>Environmental Pollution</b>	<b>12 Hours</b>	<b>33%</b>
2.1	Environmental degradation		

- 2.2 Pollution, sources of pollution, types of environmental pollution
- 2.3 Air pollution: Definition, sources of air pollution, pollutants, classifications of air pollutants (common like SO<sub>x</sub> & NO<sub>x</sub>), sources & effects of common air pollutants
- 2.4 Water pollution: Definition, sources water pollution, pollutants & classification of water pollutants, effects of water pollution, eutrophication
- 2.5 Noise pollution: Sources of noise pollution, effects of noise pollution
- 2.6 Ill Effects of Fireworks: Severity of toxicity, environmental effects and health hazards.
- 2.7 Current environmental global issues, global warming & green houses, effects, acid rain, depletion of Ozone layer
- 3 Ecology & Ecosystems** 10 Hours 33%
- 3.1 Ecology: Objectives and classification
- 3.2 Concept of an ecosystem: Structure & function
- 3.3 Components of ecosystem: Producers, consumers, decomposers
- 3.4 Bio-Geo-Chemical cycles & its environmental significance
- 3.5 Energy flow in ecosystem
- 3.6 Food Chains: Types & food webs
- 3.7 Ecological pyramids
- 3.8 Major ecosystems
- 4 Natural Resources** 03 Hours 10%
- 4.1 Natural resources: Renewable resources, non-renewable resources, destruction versus conservation
- 4.2 Energy resources: Conventional energy sources & its problems, non-conventional energy sources-advantages & its limitations , problems due to overexploitation of energy resources

#### D. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures which carries 10 Marks weightage.
- Two internal exams will be conducted and average of the same will be converted to equivalent of 15 Marks as a part of internal theory evaluation.
- Assignment/Surprise tests/Quizzes/Seminar will be conducted which carries 5 Marks as a part of internal theory evaluation.

#### E. Student Learning Outcomes:

On the successful completion of the course the students will be able

1. To perceive the elementary knowledge about natural environment and its relation with science.
2. To identify and analyze human impacts on the environment.
3. To understand the facts and concepts of natural and energy resources thereby applying them to lessen the environmental degradation.
4. To communicate on recent environmental problems thereby creating awareness among society

FACULTY OF MANAGEMENT STUDIES  
DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

HS101A - HS106A: A COURSE FROM LIBERAL ARTS

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	-	2	-	2	2
Marks	-	100	-	100	

**A. Objective of the Course:**

To help learners to

1. Recognize the nature of aesthetic values and explore elements of arts and aesthetics with reference to personal, cultural and civic sphere
2. Connect art and aesthetics with Science and Technology to understand and extend research and innovation for a society

**B. Courses:**

Students may select any one course from the following:

Sr. No.	Title of the unit	Credits
1	Painting	02
2	Photography	
3	Sculpting	
4	Music	
5	Drama and Dramatics	
6	Yoga	
7	Dance	
8	Pottery and Ceramic Art	
9	Media and Graphics Design	

Total hours (Theory): 00

Total hours (Lab): 30

Total hours: 30

**C. Instructional Method and Pedagogy:**

- Teaching will be practical based on the hands on experiences, live and interactive Participation sessions. It may also run in the workshop mode.

**D. Evaluation:**

- The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 50 marks for internal evaluation and 50 marks for external evaluation.

### Internal Evaluation

- Students' performance in the course will be evaluated on a continuous basis through the following components:

Sr No.	Component	Number	Marks Per Incidence	Total Marks
1		-	10	10
2	Performance/ Activities	-	10	10
3	Project	-	25	25
4	Attendance	-	05	05
			<b>Total</b>	<b>50</b>

### External Evaluation

- University Practical examination will be for 50 marks and will test the performance, activities and creative presentations of the students with reference to the course selected:

Sr. No.	Component	Number	Marks Per Incidence	Total Marks
1	Viva/Practical	-	50	50
			<b>Total</b>	<b>50</b>

### E. Student Learning Outcomes:

At the end of the course, students will have developed the ability to enjoy, interact with and perform arts and aesthetics; and will have developed the ability and creativity to transfer sense of design and innovation in science and technology.

## IT142: ICT WORKSHOP

### Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	0	4	-	4	2
Marks	0	100	-	100	

### A. Objective of the Course:

The main objectives for offering the course ICT Workshop are:

1. To explain the fundamentals of computers and peripherals.
2. To introduce hardware and software computers basics.
3. To deliver concept and methodology of different parts of computer and their assembling.
4. To brief the students regarding various operating systems installation, commands and scripting in OS.
5. To introduce the basic concepts of batch file programming and its uses.

### B. Outline of the Course

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Introduction to computer hardware	4
2	PC troubleshooting	4
3	Display unit, Keyboard , Mouse and Touch Pad, Printer	4
4	Power supply & Storage Devices, Assembling the computer system	8
5	Installation of various Operating Systems, DOS Commands	8
6	LINUX commands and scripting	12
7	Professional Document writing using Word Processing Tool, Data Processing using Spread Sheet, Creating Dynamic and Informative Slide Show using Presentation Software	12
8	Batch File Commands & Programming in Windows	8

Total Hours (Lab): 60

Total Hours: 60

### C. Detailed Syllabus:

Following contents will be delivered to the students during laboratory sessions.

1. **Introduction to computer hardware** 4 Hours  
Definition of computer, Computer hardware, software and firmware, history of computer, classification of computer, basic parts of digital computer
2. **PC troubleshooting** 4 Hours  
Hardware troubleshooting and repairing, Software troubleshooting and repairing

- |    |   |          |
|----|---|----------|
| 3. | <p><b>Display unit</b><br/>Types of monitor: CRT, LCD, LED, Plasma, OLED, Faults of monitor, Display card</p> <p><b>Keyboard , Mouse and Touch Pad (Track Pad)</b><br/>Types of keyboard: Wired and Wireless<br/>Wired: Din type, PS/2, USB, Wireless: Bluetooth, Infrared(IR), RF<br/>Types of mouse: Wired and Wireless<br/>Wired: Serial port, PS/2, USB, Wireless: Bluetooth, Infrared(IR), RF<br/>Types of Track pad and Touch pad</p> <p><b>Printer</b><br/>General features of printer, Classification of printer, Impact printer: Dot matrix, Line printer, Non-impact: Thermal</p>   | 4 Hours  |
| 4. | <p><b>Power supply&amp; Storage Devices</b><br/>SMPS: Working, output connectors, UPS, Stabilizer<br/>Types of Memory: Primary storage: Registers, Cache, RAM<br/>Other Storage Devices: Floppy, Hard Disk, CD, DVD, Flash</p> <p><b>Motherboard</b><br/>Types of motherboard, Functional block diagram of motherboard, CPU and supporting chips, introduction of CPU architectures, BIOS, CMOS setup, Faults of motherboard</p> <p><b>Assembling the computer system</b><br/>Study of configuration of computer system, introduction of computer assembling, Different types of cables, Assembling and Disassembling</p>   | 8 Hours  |
| 5. | <p><b>Installation of various Operating Systems</b><br/>Different types of Operating System, Installation of OS on a single machine (Dual Boot)</p> <p><b>DOS Commands:</b><br/><u>Internal Commands:</u> CLS, DATE, VER, VOL, DIR, COPY CON, TYPE, MKDIR, CHDIR (CD), RMDIR, RENAME, DEL, MOVE, COPY, PROMPT, DOSKEY, PATH<u>External Commands:</u> ATTRIB, FORMAT, CHKDSK, SCANDISK, TREE, XCOPY. Use of commands with Wild Card Characters: ? (Question Mark) and *(Asterisk)</p>  | 8 Hours  |
| 6. | <p><b>LINUX Commands and scripting:</b><br/>Introduction to basics of Linux OS and its variants, what is shell, Commands:clear, man, who, date, who am i, cal, echo, ls, mkdir, cd, cd..., rmdir, pwd, cat, rm, cp, mv, chmod, umask, grep, ps<br/>Prepare scripts using control structures and loops for various actions to perform.</p>   | 12 Hours |
| 7. | <p><b>Professional Document writing using Word Processing Tool</b><br/>Microsoft Word: Basic menu introduction, Page layout-Margin-Header Footer, Page break, Insert symbols and Equations, Mail Merge, Preparation of Index, Automatic Index generation, Two columns research paper format-Footer-Cross reference.</p> <p><b>Data Processing using Spread Sheet</b><br/>Microsoft Excel: Cell Address, Row, Column, Header and Footer, Fill handle and drag-&amp;-drop, Format cells, Conditional formatting, Formulas and Functions, Validation, Chart with various options, Filter, Sort.</p> <p><b>Creating Dynamic and Informative Slide Show using Presentation Software</b><br/>Microsoft PowerPoint: Slide layout, Slide design (Proper selection based</p> | 12 Hours |

on audience), Header and Footer in slides, Slide transition, Slide Master, Insert Picture-Smart Art, Insert animations to different objects, Hide Slide, Rehearse Timings, Record slide show. How to prepare professional presentation

**8. Batch File Commands & Programming in Windows** **8 Hours**

Batch file commands: CLS, %l, ECHO, SET, CALL, :LABEL, EXIT, GOTO, IF, FOR, REM, etc.

Create batch files for various purposes and execute it, study of AUTOEXEC.BAT file

**D. Instructional Method and Pedagogy:**

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Laboratories will be conducted with the aid of multi-media projector, white board, computers, OHP etc.
- Attendance is compulsory in laboratory. This, including assignments/tests/quizzes carries 10 marks in overall evaluation.

**E. Student Learning Outcomes:**

By taking this course,

1. A student will be having the basic knowledge of computer architecture, peripherals and all the hardware and software basics.
2. A student will be able to understand hardware requirement for operating system and able to install it on a machine.
3. A student will become familiar with command line interface of Windows and Linux. A student will be able to use different word processing and data processing tools for analysis and presentation.

FACULTY OF APPLIED SCIENCES  
DEPARTMENT OF MATHEMATICAL SCIENCES

MAI42: ENGINEERING MATHEMATICS –II

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	-	1	5	4
Marks	100	-	-	100	

**A. Objective of the Course:**

To study the fundamental concepts of Engineering Mathematics, so that students get a sound knowledge and important aspects of the subject.. The objectives of the course are to:

1. Understand differential equations, partial differential equations and its solutions
2. Understand Multiple Integration and solution techniques.
3. Understand different types of Special Functions and its use in Engineering problems

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1	Ordinary Differential Equations	09
2	Linear Differential Equations	10
3	Partial Differential Equations	11
4	Applications of Ordinary Differential Equations and Partial Differential Equations	10
5	Multiple Integrals	10
6	Special Functions	10

Total hours (Theory): 60  
Total hours (Lab): 00  
Total hours(Tutorial): 15  
Total hours: 75

### C. Detailed Syllabus:

1.	First order and First degree Ordinary Differential Equations	09 Hours	14%
1.1	Modelling of real world problems in terms of first order ODE		
1.2	Initial Value problems		
1.3	Concept of general and particular solutions		
1.4	Existence and Uniqueness solutions by illustrations		
1.5	linear, Bernoulli and Exact differential equations		
1.6	Solutions of First order First degree Differential Equations		
2.	Higher Order Ordinary Linear Differential Equations	11 Hours	18%
2.1	Model of real world problems of higher order LDE		
2.2	General Solution of Higher Order Ordinary Linear Differential Equations with Constant coefficients		
2.3	Methods for finding particular integrals viz. variation of parameters and undetermined coefficients		
2.4	LDE of higher order with variable coefficients viz Cauchy-Euler and Legendre's Equations		
2.5	System of Simultaneous first order linear differential equations		
3	Partial Differential Equations	10 Hours	17%
3.1	Modeling of real world problem in terms of first order PDE		
3.2	Initial and Boundary valued conditions		
3.3	Methods of solutions of first order PDE viz.		
3.4	Langrange's Linear Partial Differential Equations		
3.5	Special types of Nonlinear PDE of the first order		
4	Applications of Differential Equations	10 Hours	17%
4.1	Applications of ODE: Orthogonal Trajectories, Mechanical vibration system, Electrical circuit system, deflection of beams.		
4.2	Application of PDE: Heat, wave, Laplace equations and their solution by method of separation of variables and Fourier series.		
5	Multiple Integrals	10 Hours	17%
5.1	Evaluation of double and triple integrals		
5.2	Change of order of integration		
5.3	Transformation to polar, spherical and cylindrical coordinates		
5.4	applications of double and triple integrals: area, volume and mass		
6.	Special Functions	10 Hours	17%
6.1	Improper integrals and their convergence		
6.2	Definitions, properties and examples of Beta, Gamma and error functions		
6.3	Bessel functions and their Properties		
6.4	Legendre's polynomials and their Properties		

### D. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures/laboratory which carries a 5% component of the overall evaluation.
- Minimum two internal exams will be conducted and average of two will be considered as a part of 15% overall evaluation.

- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weighting of 5%.
- Two Quizzes (surprise test) will be conducted which carries 5% component of the overall evaluation.

#### **E. Student Learning Outcomes:**

1. At the end of the course the students will be able to understand the fundamental concepts of Engineering Mathematics. Students will be able to apply these concepts to Mathematics for higher semesters in courses other than Mathematics.

#### **F. Recommended Study Material:**

##### ❖ Text Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 8<sup>th</sup> Ed., Jhon Wiley & Sons, India, 1999.

##### ❖ Reference Books:

1. M.D. Weir, et. al., Thomas' Calculus, 11<sup>th</sup> Ed., Pearson Education, 2008
2. Stewart James, Calculus Early Transcendental, 5<sup>th</sup> Ed., Thomson India, 2007
3. Wylie & Barrett, Advanced Engineering Mathematics, Mc graw Hill pub.
4. Greenberg, M. D., Advanced Engineering Mathematics, 2<sup>nd</sup> ed., Pearson

## CEI42: OBJECT ORIENTED PROGRAMMING WITH C++

### Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	4	-	8	6
Marks	100	100	-	200	

### A. Objective of the Course:

The main objectives for offering the course Object Oriented programming with C++ are:

1. To introduce students with object-oriented programming in C++ language.
2. To display how the object oriented approach differs from procedural approach.
3. To promote skills like Development of logic and implementation of basic mathematical and other problems by using Object oriented concepts.
4. To explain them concepts of encapsulation, class, objects, Operator Overloading, function overloading and inheritance.
5. Take a problem and develop the structure to represent objects and the algorithms to perform operations.

### B. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction to Object Oriented concepts and Design	3
2	Principles of object-oriented Programming	3
3	Introduction of C++	3
4	Tokens and Expressions & Control Structure	4
5	Functions	5
6	Classes and objects'	8
7	Constructor and Destructors	5
8	Operator Overloading	5
9	Inheritance	8
10	Pointers and Virtual Functions	6
11	Managing Console I/O Operations	4
12	Working with Files	6

Total hours (Theory): 60

Total hours (Lab): 60

Total hours: 120

### C. Detailed Syllabus:

- |     |  |          |    |
|-----|--|----------|----|
| 1   | Introduction to Object Oriented concepts and Design  | 03 Hours | 5% |
| 1.1 | What is object oriented (OO), history, Object Concepts, OO methodology, OO themes, Introductions to OO Models. |          |    |
| 2   | Principles of object-oriented Programming  | 03 Hours | 5% |

2.1	Basic concept of object-oriented Programming , Benefits of OOP		
2.2	Difference between object oriented language and procedure oriented language		
<b>3</b>	<b>Introduction of C++</b>	<b>03 Hours</b>	<b>3%</b>
3.1	What is C++, Simple C++ Program, Applications of C++		
3.2	Introduction to class, object and creating simple program using class, Structure of C++ program		
<b>4</b>	<b>Tokens and Expressions &amp; Control Structure</b>	<b>04 Hours</b>	<b>4%</b>
4.1	Tokens, Keywords, identifiers and constants, Basic Data Types and user defined data types and derived data types, symbolic constants		
4.2	Type compatibility, Declaration of variables, Dynamic initialization,		
4.3	Reference variables		
4.4	Scope Resolution Operator, Memory Management Operator, Manipulators, Type cast operator		
	Expressions and their types, implicit Conversion Operator		
	Precedence and Control Structure		
<b>5</b>	<b>Functions</b>	<b>05 Hours</b>	<b>8%</b>
5.1	The main function, simple functions, call by reference, return by reference, inline functions, overloaded functions, default arguments		
<b>6</b>	<b>Classes and objects</b>	<b>08 Hours</b>	<b>15%</b>
6.1	Limitation of C structure, Declaring class and defining member function, making outside function inline , Nesting member function, Private member function arrays within a class, memory allocation of objects, Static data members and Member functions.		
6.2	Arrays of Objects, Object as a function argument, Friend functions, Returning objects, constMember functions.		
<b>7</b>	<b>Constructor and Destructors</b>	<b>05 Hours</b>	<b>8%</b>
7.1	Introduction to Constructors, Parameterized Constructors, Multiple Constructors in class, Constructors with default argument, Dynamic initialization of Constructors, Dynamic Initialization of objects, Copy Constructor, Dynamic Constructor		
7.2	Destructors		
<b>8</b>	<b>Operator Overloading</b>	<b>05 Hours</b>	<b>10%</b>
8.1	Introduction, Defining Operator overloading, overloading unary and binary operators, overloading binary operator using friend function, rules for overloading operators		
8.2	Type Conversion		
<b>9</b>	<b>Inheritance</b>	<b>08 Hours</b>	<b>12%</b>
9.1	Introduction, Defining a derived class, Example of Single Inheritance,		
9.2	Public and private inheritance.		
9.3	Multilevel, multiple and hierarchical Inheritance, Hybrid Inheritance Virtual Base Class, abstract class nesting of classes, constructors in derived classes		
<b>10</b>	<b>Pointers and Virtual Functions</b>	<b>06 Hours</b>	<b>15%</b>
10.1	Introduction, pointer to object, this pointer, pointer to derived class		
10.2	Virtual functions, pure virtual functions		
<b>11</b>	<b>Managing Console I/O Operations</b>	<b>04 Hours</b>	<b>5%</b>
11.1	Introduction, C++ stream, C++ stream classes		
11.2	Unformatted and for matted console I/O Operations		
<b>12</b>	<b>Working with Files</b>	<b>06 Hours</b>	<b>10%</b>
12.1	Introduction, Classes for file stream operations, Opening and closing		

- a file, Detecting End of File
- 12.2 File modes, file pointers and their manipulations, Sequential I/O operations
- 12.3 Error Handling during File operations, Command-line arguments

#### **D. Instructional Method and Pedagogy:**

- At the beginning, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aids like multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures and laboratory which carries 5 Marks weightage respectively.
- Two internal exams will be conducted and average of the same will be converted to equivalent of 15 Marks as a part of internal theory evaluation.
- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weightage of 5 Marks as a part of internal theory evaluation.
- Surprise tests/Quizzes/Seminar will be conducted which carries 5 Marks as a part of internal theory evaluation.
- The course includes a laboratory, where students have the opportunity to build appreciation for the concepts being taught in lectures.
- Experiments/Tutorials related to course content will be carried out in the laboratory.

#### **E. Student Learning Outcomes:**

After completing this course, the student should demonstrate the knowledge and ability to:

1. Understand object-oriented approach with C++ language.
2. Able to differentiate object oriented approach and procedural approach.
3. Understand the concepts of encapsulation, class, objects, Operator Overloading, function overloading and inheritance.
4. Explain the benefits of object oriented design and understand when it is an appropriate methodology to use.
5. Design object oriented solutions for small systems involving multiple objects.

#### **F. Recommended Study Material:**

##### ❖ Text Books:

1. Programming with C++ by E.Balagurusami(TMh-)
2. Object Oriented Programming in Turbo C++ by Robert Lafore (Galgotia-)

**FACULTY OF TECHNOLOGY & ENGINEERING  
CHAMOS MATRUSANSTHA DEPARTMENT OF MECHANICAL  
ENGINEERING**

**MEI44: ELEMENTS OF ENGINEERING**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	2	1	7	5
Marks	100	50	0	150	

**A. Objective of the Course:**

This course covers the basics of mechanical and civil engineering. The principles and application of the two core branches of engineering is covered along with the fundamentals of engineering drawing. The objectives of the course are to:

1. Introduce the universal language and tool of communication for engineers and understand the concepts, elements & grammar of engineering drawing.
2. Introduce the important aspects and applications of mechanical engineering and explain the working of different mechanical systems.
3. Understand the scope and basic elements of civil engineering.

**B. Outline of the course:**

Sr. No.	Title of the Unit	Minimum number of hours
<b>Part: A</b>		
1.	Fundamentals of Engineering Graphics	08
2.	Projections & Section of Solid	06
3.	Orthographic Projection	06
4.	Isometric Projections	06
5.	Computer Aided Drafting & Modeling	04
<b>Part: B</b>		
6.	Introduction of Mechanical Engineering	05
7.	Steam and Steam Generator	04
8.	Internal Combustion Engines	03
9.	Refrigeration and Air Conditioning Systems	03
<b>Part: C</b>		
10.	Scope of Civil Engineering	02
11.	Introduction to Surveying	06
12.	Elements of building Construction	07

Total hours (Theory): 60

Total hours (Lab): 30

Total hours(Tutorial): 15

Total hours: 105

### C. Detailed Syllabus:

#### Part: A

<b>1</b>	<b>Fundamentals of Engineering Drawing</b>	<b>08 Hours</b>	<b>12%</b>
1.1	Importance of engineering drawing, drawing instruments and materials, BIS and ISO		
1.2	Different types of lines used in engineering practice, methods of projections as per SP 46-1988.		
1.3	Engineering Scale.		
1.4	Engineering Curve.		
<b>2</b>	<b>Projections &amp; Section of Solid</b>	<b>06 Hours</b>	<b>10%</b>
2.1	Projection of solids		
2.2	Sectional view		
2.3	True shape of Sections		
2.4	Auxiliary Inclined Plane (AIP), Auxiliary Vertical Plane (AVP)		
<b>3</b>	<b>Orthographic Projection</b>	<b>06 Hours</b>	<b>10%</b>
3.1	Principle projection		
3.2	Methods of first and third angle projection with examples / problems		
<b>4</b>	<b>Isometric Projections</b>	<b>06 Hours</b>	<b>10%</b>
4.1	Terminology, Isometric scale		
4.2	Isometric view and Isometric projection with examples / problems		
<b>5</b>	<b>Computer Aided Drafting &amp; Modeling</b>	<b>04 Hours</b>	<b>08%</b>
5.1	Introduction to 2D drafting facilities in CAD software		

#### Part: B

<b>6</b>	<b>Introduction of Mechanical Engineering</b>	<b>05 Hours</b>	<b>08%</b>
6.1	Prime movers and its types, Sources of energy		
6.2	Basic terminology: Force and mass, Pressure, Work, Power, Energy, Heat, Temperature, Units of heat, Specific heat capacity, Interchange of heat, Change of state, Internal energy, Enthalpy, Entropy, Efficiency		
6.3	Zeroth Law and First Law of Thermodynamic, Boyle's law, Charle's law and Combined gas law, Relation between Cp and Cv		
<b>7</b>	<b>Steam and Steam Generator</b>	<b>04 Hours</b>	<b>07%</b>
7.1	Introduction to steam formation and its types		
7.2	Introduction to steam table		
7.3	Boiler definition and its classification		
7.4	Cochran boiler.		
<b>8</b>	<b>Internal Combustion Engines</b>	<b>03 Hours</b>	<b>05%</b>
8.1	Introduction		
8.2	Basic terminology of I.C. engine		
8.3	Types of I. C. Engines		
<b>9.</b>	<b>Refrigeration and Air Conditioning Systems</b>	<b>03 Hours</b>	<b>05%</b>
9.1	Introduction to refrigeration and air conditioning		
9.2	Basic terminology, Principal and application of refrigeration		
9.3	Vapour compression refrigeration system,		
9.4	Window and split air conditioning systems		

#### Part: C

<b>10.</b>	<b>Scope of Civil Engineering</b>	<b>02 Hours</b>	<b>04%</b>
------------	-----------------------------------	-----------------	------------

10.1	Scope of Civil Engineering,		
10.2	Branches of civil engineering,		
10.3	Role of civil engineer		
<b>11.</b>	<b>Introduction to Surveying</b>	<b>06 Hours</b>	<b>10%</b>
11.1	Definition of surveying,		
11.2	Objects of surveying, Uses of surveying,		
11.3	Primary divisions of surveying, Principles of surveying,		
11.4	List of classification of surveying, Definition: Plan and Map, Scales : Plain scale and Diagonal scale, Conventional Symbols		
11.5	Introduction to linear and angular measurements, Concepts of land profiling		
<b>12.</b>	<b>Elements of building Construction</b>	<b>07 Hours</b>	<b>11%</b>
12.1	Types of building, Design loads,		
12.2	Building components (super structure and substructure),		
12.3	Principles of Planning,		
12.4	Basics Requirements of a building Planning,		
12.5	Types of Residential Building,		

#### **D. Instructional Method and Pedagogy:**

- At the starting of the course, delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of Multi-Media projector, Black Board, OHP etc.
- Attendance is compulsory in lectures and laboratory.
- Internal exams/Unit tests/Surprise tests/Quizzes/Seminar/Assignments etc. will be conducted as a part of continuous internal theory evaluation.
- The course includes a laboratory, where students will get opportunities to build appreciation for the concepts being taught in lectures.
- Experiments/Tutorials related to course content will be carried out in the laboratory.
- In the lectures and laboratory discipline and behavior will be observed strictly.

#### **E. Student Learning Outcomes:**

On the completion of the course one should be able to:

1. Understand and interpret various engineering drawing.
2. Learn the concepts and be able to draw engineering scale, engineering curve, projection & section of solid, orthographic and isometric drawing.
3. Understand the overview of computer aided drafting.
4. Understand fundamental principles, theory and applications of mechanical engineering which plays an important role in industries.
5. Learn the formation of different types of steam and utilize it for the boiler.
6. Understand the basics of internal combustion engine, refrigeration and air conditioning system.
7. Understand importance and application of civil engineering.
8. Understand the fundamentals of surveying and be able to carry out simple survey exercise.
9. Learn about different building components, building planning and design of residential building.

#### **F. Recommended Study Material:**

FACULTY OF APPLIED SCIENCES  
DEPARTMENT OF PHYSICS

PY141: ENGINEERING PHYSICS

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	0	5	4
Marks	100	50	0	150	

**A. Objective of the Course:**

The main objectives of the subject are

1. To study the basic concepts of physics and engineering applications of physics.
2. To develop physical intuition, mathematical reasoning, and problem solving skills.
3. To prepare students for the necessarily rigorous sequence in physics and engineering.
4. To develop an ability to identify, formulate and solve physics and engineering problems through numerical analysis and laboratory methods.

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1	Error Analysis	04
2	Wave Motion and Sound	08
3	Modern Optics	09
4	Solid State Physics	10
5	Structure of Materials	07
6	Nano science	07

Total hours (Theory): 45

Total hours (Lab): 30

Total hours: 75

**C. Detailed Syllabus:**

<b>1</b>	<b>Error Analysis</b>	<b>04 Hours</b>	<b>09%</b>
1.1	Introduction and Basic definitions		
1.2	Average error, r.m.s. error, probable error and error propagation		
1.3	Significant digit and figures		
1.4	Numericals		
<b>2</b>	<b>Wave Motion and Sound</b>	<b>08 Hours</b>	<b>18%</b>
2.1	Propagation of waves, longitudinal and transverse waves, mechanical and non-mechanical waves		
2.2	Sound waves, architectural acoustics, classification of sound		
2.3	Loudness, Weber-Fechner law, Bel and Decibel		

2.4	Absorption coefficient, reverberation, Sabine's formula		
2.5	Factors affecting acoustics of buildings and their remedies		
2.6	Ultrasonic properties, Production, piezoelectric and magnetostriction method, applications		
2.7	Numericals		
<b>3</b>	<b>Modern Optics</b>	<b>09 Hours</b>	<b>20%</b>
3.1	Lasers and its properties, spontaneous and stimulated emission, population Inversion		
3.2	Einstein coefficients		
3.3	Gas laser ( Co <sub>2</sub> Laser), Solid (Nd – YaG) Laser		
3.4	Hologram- Introduction, construction and reconstruction process		
3.5	Applications of Lasers		
3.6	General ideas of optical fibre		
3.7	NA of fibre, step index and graded index fibre		
3.8	multi-mode and single mode fibre – applications of optical fibre		
<b>4</b>	<b>Solid State Physics</b>	<b>10 Hours</b>	<b>22%</b>
4.1	Introduction: Conductors and Semiconductors: Band theory of solids		
4.2	Energy gap, Fermi energy, electrical conductivity and mobility		
4.3	Hall effect		
4.4	X-Ray: Properties		
4.5	Applications of X-Rays		
4.6	Super conducting materials: Properties		
4.7	Types of super conductors		
4.8	Josephson effects		
4.9	Applications of Super conductors		
4.10	Numericals		
<b>5</b>	<b>Structure of Material</b>	<b>07 Hours</b>	<b>16%</b>
5.1	Introduction: Atomic and molecular structure		
5.2	Crystal structure, crystalline and non-crystalline materials		
5.3	Space lattices and Miller indices		
5.4	Relation between interplanar distance and cubic edge		
5.5	Numericals		
<b>6</b>	<b>Nano science</b>	<b>07 Hours</b>	<b>15%</b>
6.1	Introduction		
6.2	Structure of nanomaterials, examples of nanomaterials		
6.3	Synthesis (qualitative idea only)		
6.4	Properties and applications nanostructured materials		

#### **D. Instructional Method and Pedagogy:**

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures and laboratory which carries 10 Marks weightage.
- Two internal exams will be conducted and average of the same will be converted to equivalent of 15 Marks as a part of internal theory evaluation.
- Assignment/Surprise tests/Quizzes/Seminar will be conducted which carries 5 Marks as a part of internal theory evaluation.

- The course includes a laboratory, where students have an opportunity to build an appreciation for the concepts being taught in lectures.
- Experiments/Tutorials related to course content will be carried out in the laboratory.

### E. Student Learning Outcomes:

On the successful completion of the course:

1. The student would be able to apply the concepts of physics in various branches of engineering.
2. An ability to identify, formulate and solve engineering problems.
3. An ability to use the techniques, skills and modern tools of physics necessary for engineering applications.
4. An ability to design and conduct experiments, analyze and interpret data.

### F. Recommended Study Material:

#### ❖ Text Books:

1. Vijayakumari, G., Engg. Physics, Vikas Publishing house Pvt. Ltd.
2. Rajagopal, K., Engg. Physics, Prentice Hall of India Pvt. Ltd.
3. Avadhulala, M. N. & Kshirsagar, P. G., A text book of Engg. Physics, S. Chand Pub.

#### ❖ Reference Books:

1. Nayak Abhijit, Engg. Physics, S. K. Kataria and Sons Pub.
2. Topping, J., Errors of Observations and their Treatment, 3rd Ed. Chapman and Hall Ltd. London
3. Kittle, C., Solid State Physics
4. Resnick and Haliday, Physics Part-I & II, Wiley Eastern publication
5. Beiser Arthur, Concept of Modern Physics
6. Ghatak, Optics, Tata McGraw Hill, 3<sup>rd</sup> Edition
7. Pillai, S.O., Solid State Physics, Wiley Eastern Ltd.

**FACULTY OF MANAGEMENT STUDIES  
DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES  
HS121 A: STUDY OF ENGLISH LANGUAGE & LITERATURE**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	2		2	2
Marks	50	50	100	

**A. Objective of the Course:**

To help learners to

1. Develop familiarity with and proficiency in English language
2. Learn the use of language at personal, academic and professional fronts
3. Become accomplished, active readers who appreciate ambiguity and complexity, and who can articulate their own interpretations with an awareness and curiosity for other perspectives.
4. Gain a knowledge of the major traditions of literatures, and an appreciation for the diversity of literary, cultural and social voices within

**B. Outline of the course:**

Sr. No.	Title of the unit	Minimum number of hours
1	Communicative English <ul style="list-style-type: none"> <li>• Introduction to Communicative Grammar and Usage</li> <li>• Parts of Speech</li> <li>• Tenses and Moods</li> <li>• Reading Literature for English Language</li> </ul>	08
2	Functional English <ul style="list-style-type: none"> <li>• Introduction to Functional English</li> <li>• English for Personal and Social Use</li> <li>• English for Career and Professional Use</li> </ul>	08
3	Literature Text and Appreciation <ul style="list-style-type: none"> <li>• Introduction to Literature and Appreciation</li> <li>• Appreciation of Prose or Fiction</li> <li>• Appreciation of Poetry</li> </ul>	08
4	Language, Literature and Contemporary Issues <ul style="list-style-type: none"> <li>• Language, Culture and Society</li> <li>• Literature and contemporary issues</li> </ul>	06

Total hours: 30

**C. Instructional Method and Pedagogy:**

Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, critical reading, group work, independent and collaborative research, presentations, etc.

- Out of 100 marks, 50 marks are for internal evaluation and 50 marks would be external evaluation.

#### D. Evaluation:

##### Internal Evaluation

The students' performance in the course will be evaluated (25 marks for theory and 25 marks for practical) on a continuous basis through the following components:

##### Theory

Sr. No.	Component	Number	Marks per Incidence	Total Marks
1	Assignment	02	10	20
2	Attendance			5
Total				25

##### Practical

Sr. No.	Component	Number	Marks per Incidence	Total Marks
1	Project	01	10	20
2	Term-work	-	10	10
Attendance				5
Total				25

##### External Evaluation

The University examination will be for 50 marks (25 marks for theory and 25 marks for practical). The examination will avoid, as far as possible, direct questions on usage, grammar, errors, etc. and will focus on applications.

##### Theory

Sr. No.	Component	Number	Marks per Incidence	Total Marks
1	Theory Paper	01	25	25
Total				25

##### Practical

Sr. No.	Component	Number	Marks per Incidence	Total Marks
1	Viva	01	25	25
Total				25

#### E. Student Learning Outcomes:

At the end of the course, the students should have developed the ability to communicate effectively, they should be able to communicate message accurately, handle intercultural situation that require thoughtful communication, to use appropriate words and tones and so on. They should be able to understand and demonstrate communicative and functional use of English language. They should be able to appreciate literature and understand socio-cultural context.
