Case studies are used as a tool to facilitate learning on the part of the participants by the trainer in the session. Case studies portray real life situations involving decision making by participants on either a set of questions or through an open-ended discussion in the classroom.

## **Clinical Education**

Targeted Audience: UG and PG students Objective: To impart the clinical skills with contemporary problems of the patients

Mini Project Date of Organized: 31/07/2020 Targeted Audience: 3<sup>rd</sup> semester CE/CSE/IT Students Course Name: Java Programming

Mini-projects are helpful that they provide employers a chance to distinguish between students with related backgrounds. They also support students to show their talent and they might not have a direct effect on employment.
