MESSAGE

Human Development is a development paradigm which is beyond mere rise or fall of national incomes. It is about creating an environment where people can develop their full potential and lead productive, creative lives in accordance with their needs and interests. People are the real wealth of nation. Development is thus about expanding the choices people have to lead lives that they value.

The District Human Development Report is a document which gives the present status of Human Development in different talukas of the District. Human Development requires focus on the basic as well as crucial indicators of Human Development. This report has highlighted three important pillars of Human Development which are: Education, Health and Livelihood.

I commend the efforts put in by stakeholders in preparing this publication and hope that this will be useful to all the state & district level officials, policy makers and planners in working towards improving Human Development scenario of the District.

Preface

A District Human Development Report (DHDR) has to basically address the issue of formulation of a strategy which will accelerate the pace of Human Development. Therefore, the objective of preparation of Vadodara DHDR is to get deeper understanding of the issues related to Human Development at the district & taluka level and thus help in formulation of developmental plan & policies for the district.

This report covers four main aspects of Human Development—Demography & culture, livelihood & employment, Education and last but not the least Health & nutrition. The recommendations of the report are indicative and point towards planning for further development of the State.

The first is an overview of the demography, and peripherals of the district which includes population status, population growth rate, sex ratio, percentage of ST/SC/other & religion wise population etc., examined at taluka level. It has a higher urban growth of population as compared to rural. Remarkable population has migrated from rural area to urban area in one decade (Year 2001-2011). District has a higher child sex ratio and overall sex ratio than State average.

The status, issues and challenges of education of Vadodara district has been discussed in second chapter. Analysis of literacy rate across gender, region (rural-urban) and social group, along with enrolment and dropouts rates (primary) is presented. Chapter also discusses education infrastructure like number of schools, access to drinking water and sanitation facilities in school, etc. as well as the quality of the educational status of the district. There is a constant linear increase in number of government schools added each year (2009-2014).

Chapter third has been concentrated on the overall health Status of the District. The access to healthcare organizations like Hospital, CHCs, PHCs and sub-centres, along with the mother & child health care indicators have been discussed elaborately. The details of various diseases are also discussed in this chapter. Report shows that Vadodara district performs well in institutional deliveries; immunization of young children against polio, BCG & measles. Increased preference for Institutional delivery is vividly evident in the district while observing the decline in home delivery.

The chapter fourth touches briefly upon the livelihood and employment status and opportunity. Livelihood generated through agriculture, industries, MSMEs is discussed in the report. Household assets and amenities have also been discussed to understand the quality of the standard of living of people of Vadodara district (which includes access to drinking water, sanitation and drainage facilities, slum free area etc.)

The report has also shown the overview of the Vadodara city. This chapter provides details of history, development, present status and future plans of the city.

This report is an attempt to raise the status of Vadodara District in the aspect of Human Development. It is hoped that this report would be a very useful document to those who are involved in District Human Development Plan.

Foreword

Human Development is a development paradigm that is about much more than the rise or fall of national incomes. It is about creating an environment in which people can develop their full potential and lead productive, creative lives in accord with their needs and interests. People are the real wealth of nations. Development is thus about expanding the choices people have to lead lives that they value.

The Human Development approach arose in part as a result of growing criticism to the leading development approach, which presumed a close link between national economic growth and the expansion of individual human choices. As of 1990, the human development concept was applied to a systematic study of global themes, as published in the yearly Global Human Development Reports under the auspice of the UNDP.

The Human Development story of India is unique in its kind. India initiated Human Development issues during 8th Five Year Plan (1992-97). In order to integrate Human Development into state planning in India the preparation of reports at state level has been started. Now-a-days the Gujarat State is on the fast track of development. Planning Commission-Government of India and UNDP had partnered Strengthening State Plan for Human Development (SSPHD) programme, under which the Government of Gujarat had initiated the process of integrating Human Development in planning and policy documents.

The preparations of DHDR (District Human Development Report) marks the beginning of the process whereby people is mobilized and actively participate in the development process. In the year 2008-09, the state government has initiated the work of preparing District Human Development Report.

The DHDR is expected to be an important document for formulating the District Human Development Plan. The report has examined the status of Human Development in different talukas of Vadodara District. The report depicts the present status of the district with available information for various indicators of Education, Health and Livelihood.

I hope that this report will form a milestone in the overall planning and development of the district. DHDR will also be very useful to concerned State and District level Officials, policy makers, decision maker and NGOs.
