Report on Distribution of Nests for Birds and Water bowls

CHARUSAT NSS Unit initiated distribution of nests for bird and water bowls in various rural schools of nearby villages of CHARUSAT on 02-07-2016. NSS Volunteers and Program officers distributed around 60 bird nests and water bowls and installed them at school campuses and public places nearby CHARUSAT.

This initiative was taken up with a view to spread awareness about life around us.

NSS Volunteers prepared the nests on their own waste items available at campus and installed them at various places. They also spread awareness about the same in schools. They demonstrated making of nests out of various waste items that may be available at homes. School students prepared one nest as per the direction and help from the volunteers. The students promised to prepare one nest each and install at their homes and feed birds around their locality.

Nests and water bowls were also installed at public places like shops, temples, hospitals. People were motivated to take responsibility of the nests and water bowls installed near their locality. The response from the people was very motivating.

12 students with 3 teaching & non-teaching staff were participated in this event.

A Report on Tree plantation at Valetava

CHARUSAT NSS Unit organised a Tree plantation programme under National Mission to Clean India at nearby village with a view to spread awareness about environment among people. The details of the same are as follows:

Date: **August 6, 2016**

Time: **10:00 am to 4 pm**

Venue: **Mankameshwar Temple and nearby area, Valetava**

Tree plantation was organised at Mankameshwar Temple and nearby area at Valetava village. Tree plantation was initiated by one of the Sages of the temple. At the beginning, the sage delivered inspiring speech and shared essential details about Ayurveda, use of natural items and role of trees and vegetation in human life, especially health.

NSS Volunteers and program officers from various constituent institutes of CHARUSAT participated in the tree plantation. Around 80 saplings were planted with all the appropriate procedure necessary for plantation. Saplings were chosen on the basis of the types, land and climate for appropriate upbringing. Saplings of fruit trees, flowers and vegetables were selected and planted at suitable places.

Along with temple premises, saplings were planted at places like Primary School, public road, panchayat office. People of the village took responsibility to grow and take care of the plants and water them regularly. Volunteers took responsibility to regularly examine the progress of the plants. The initiative was well appreciated by the villagers and were motivated to serve and save Mother Nature. 30 students with 8 staff members participated in this event. 22 peoples and places were benefited by this event.

A Report on Visit to Sardar Memorial, Karamsad

NSS Unit organised visit to Sardar Memorial, Karamsad for the NSS Volunteers and Program Officers of different constituent institutes of CHARUSAT. Following are the details of the same:

Date: **August 13, 2016**

Day: **Saturday**

Time: **10:00 am to 3:00 pm**

The visit was organised as a part of 70th Independence Day celebration week. Sardar Memorial is situates at Karamsad, Gujarat, the Birth place of the great Son of India and Charotar region of Gujarat Shri Sardar Vallabhbhai Patel.

The objective of the visit is to make student-volunteers aware about the life, deeds and thoughts of great son of Charotar and Gujarat, Shri Sardar Patel. The volunteers visited the home of Shri Sardar Patel at Karamsad first. They had an opportunity to see place where Shri Sardar Patel spent his childhood and see different memories of him.

NSS Volunteers then visited Sardar Memorial where they saw exhibition of monuments, photographs, clothes, household items of Sardar. An exhibition on documents related to life of Sardar like letters, News Papers, Sessions on Parliaments, his speeches, visits to various places, his time at jails etc were part of the exhibition.

Various books written on and About Sardar were also exhibited at the memorial. A documentary movie on Sardar's life was played for the students at the auditorium. Students were given useful literature having insightful overview of life and philosophy of Sardar.

Total 55 volunteers with 150 students and 8 staff members from different constituent institutes of CHARUSAT participated in the visit. A group discussion and feedback session on the visit was organised after the visit at the premises of the Memorial.

CHARUSAT NSS UNIT

Report on awareness rally on organ donation

Date: 8.9.2016

Day: Thursday

Timings: 10.00 am-12.30 pm

Organizers : NSS unit, MTIN
Venue : Surroundings of MTIN building

I. Introduction:

Organ donation is when a person allows an organ of theirs to be removed, legally, either by consent while the donor is alive or after death with the assent of the next of kin. Donation may be for research, or, more commonly healthy transplantable organs and tissues may be donated to be transplanted into another person.

Common transplantations include: kidneys, heart, liver, pancreas, intestines, lungs, bones, bone marrow, skin, and corneas. Some organs and tissues can be donated by living donors, such as a kidney or part of the liver, part of the pancreas, part of the lungs or part of the intestines, but most donations occur after the donor has died

In order to create awareness among people CHARUSAT NSS Unit with the collaboration of MTIN organized an Awareness Rally on Organ Donation on September 8, 2016. The awareness rally was organized from S P University Circle, V V Nagar to Town Hall, Anand. Total 150 NSS Volunteers / students along with NSS Program Coordinator and Program Officers from constituent institutes of CHARUSAT enthusiastically participated

in the rally. In charge Professor, NSS, Dr. A D Patel lead the rally along with Dr. Anil Sharma Sir, Principal, MTIN.

II. Objectives:

- To spread the awareness about organ donation among public.
- To aware public about importance of organ donation.
- To motivate public for organ donation so that the life of mankind can be saved.

III. Participants/Beneficiaries: NSS volunteers of MTIN and CHARUSAT. 150 students with 35 staff members and 46 beneficiaries were present in this event.

IV. In detail explanation of the event with colored print of photographs

CHARUSAT NSS Unit organised an Awareness Rally on Organ Donation on September 8, 2016 with a view to spread awareness in people about Organ Donation. The awareness rally was organised from S P University Circle, V V Nagar to Town Hall, Anand. Total 150 NSS Volunteers / students along with NSS Program Coordinator and Program Officers from constituent institutes of CHARUSAT enthusiastically participated in the rally. In charge Professor, NSS, Dr. A D Patel lead the rally along with Dr. Anil Sharma Sir, Principal, MTIN. The rally was started at 10.00 am from University circle, VV Nagar. Then All the students spoke different slogan and created awareness among people. The rally completed at Town hall, Anand at 12.00 pm. The students were provided refreshment there. The students spoke following slogans to create awareness among people about organ donation.

- Organ donation is where the person donates their organ or issue for transplant.
- Giving the gift of life at the end of life.
- People of any age wishing to become organ and tissue donors should inform their families they wish to donate.
- Don’t take your organ haven; haven knows we need them here.
- Do you want to give life to others? Donating organ is a great thing as donating life.
- 1 organ donor can save up to 8 lives.
- Globally around 500000 people are waiting for organ transplant.
- Organ donation is allowed by all religion.
- Be a organ donor save a life.

- You can save a life.
- Give someone a second chance. Be a donor, be a hero

Following students and faculties participated in rally.

Conclusion:

The rally was very successful in creating awareness among the people related to organ donation. The faculties and students were thankful to CHARUSAT for organizing such a noble task.

A Report on NSS Day Celebration

State Level Celebration of NSS Day was organised at Vallabh Vidya Nagar. CHARUSAT NSS Unit participated in the celebration. As a part of the Three- Day celebration, various sessions, events as well as competitions were organised. A team of 10 Volunteers and NSS Coordinator took part in various activities and competitions. The details of the same are as follows:

Date: **22 to 24, September, 2016**
Time: **9:00 am to 10:00 pm**
Venue: **Sardar Patel University, V V Nagar**

A team of CHARUSAT NSS Unit participated in the activities like awareness Rally, Exhibition, Movie screening, Group discussion as well as cultural activities. Members of the team participated in various competitions like Skit, Debate, Mono Acting, Short Film making. It was for the first time that team of CHARUSAT NSS Unit participated in the state level events. Although participating for the first time, the team secured Two prizes out of 7 different competitions it took part in.

We secured First Rank in Short Film Making at State level. The short film was on the theme – Prayas, that talks about the contribution of youth in the educational upliftment of the rural school students.

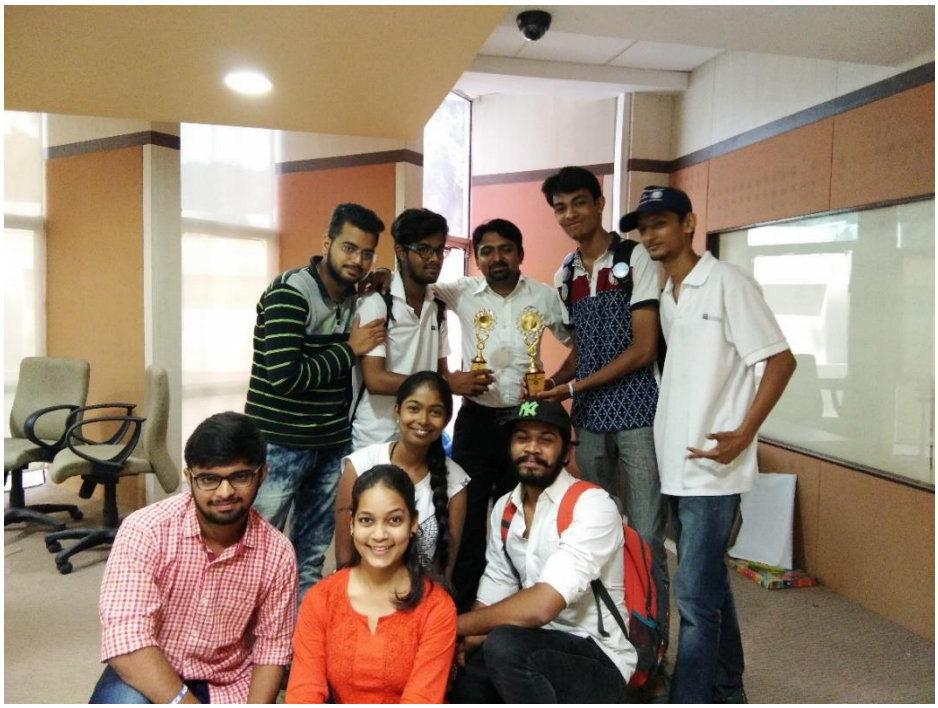

The secured Second rank in Skit at State Level that was based on the theme of family relations. Specifically it talked about neutral family and joint family where the poor, unable parents are sent to Old – Age homes and face ill- treatment at homes.

It is notable that total 24 Universities from Gujarat and Union Territories participated in the celebration. Provost, Dr. B G Patel and Registrar, Mr. Devang Joshi, congratulated the team and motivated them with their inspiring words.

10 students with 2 staff members participated in this event.

A Report on Blood Donation Camp

A Blood Donation Camp was jointly organised by CHARUSAT NSS Unit, Charusat Hospital and Red Cross Society- Anand. Details of the same are as following:

Day & Date: **19th October 2016**

Venue: **Physiotherapy Clinic, CHARUSAT Hospital**

Time : **9.30 A.M to 3:30 P.M**

An official announcement was made through Email, NEWSPAPER advertisement and other means to promote and motivate people to donate blood. NSS Volunteers motivated the students and staff of CHARUSAT for Blood Donation to promote maximum number of participation. Total 250 students donated blood for a noble cause.

This camp was organised in collaboration with CHARUSAT Hospital. To serve the society and community in a better way, CHARUSAT Healthcare and Research Foundation (CHRF) a not-for-profit organization has established a world-class multispecialty CHARUSAT hospital, holding motto of 'Care with Compassion'.

CHARUSAT hospital has been conducting various activities in the areas of Child Care, Woman Care, Healthcare related to lifestyle diseases and more. It also undertakes awareness programs and conducting camps in nearby villages for providing effective & timely healthcare facilities to the community.

CHARUSAT Hospital is also providing clinical training and quality healthcare education to the students in the area of Physiotherapy, Nursing, Pharmacy, and Paramedical sciences. It is functional since 2015, with 100 bed capacity with a team of doctors and supporting staff. Presently, it is treatment with 100 bed capacity with a vision to expand upto 450 beds.

250 students with 12 faculty members and 8 non-teaching staff members were participated in this event.

Dear Secretary,

Subject: " Nation Salutes Sardar Vallabhbhai Patel , the Unifier of India" - nation-wide campaign of " Rashtriya Ekta Saptah" from October 31 - November 6, 2016 - reg:

It has been decided to hold a nation-wide campaign, "Nation Salutes Sardar Vallabhbhai Patel on 'Rashtriya Ekta Saptah' on 31st October, 2016 and subsequently upto 6th November, 2016, to honour the memory of Sardar Patel by conducting programmes & events which reflect his decisive efforts in unifying a diverse country like India, so as to create a single political, socio-economic and administrative entity for governance under Independent India. The activities/events which are to be conducted by Higher Educational Institutions and Schools in the country need to be built around the theme of unification, strengthening and bonding of the nation. The following is a list of events that can be carried in memory of the great 'Unifier' that was Sardar Patel, by **Higher Educational Institutions** in the country :

i. **Unity Runs - in cities, towns and rural areas by students with the message of a unified Bharat**
ii. **Institutions to bring out creative short clips on Unification - the best three would be selected for presenting to PMO**
iii. **Inter-Department competitions within every institution in the area of unity.**
iv. **Dramas, Songs and Plays on the theme of unity with an award for most creative theme**
v. **Historical essays on the character and contribution of Sardar Patel with prizes**
vi. **Essay writing and elocution on "Relevance & Importance of Sardar Patel in today's India"**
vii. **Competition of designing T-shirts and caps on the theme of Unification**
viii. **Most creative slogan contest on the Unity theme**
ix. **Competition for writing/composing/singing original songs on the unity theme**
x. **Mobilisation and felicitation of former freedom fighters in the region by students - recording of their stories/recollections of Sardar Patel and views on current issues of unity.**

CHARUSAT NSS UNIT

A Report on Distribution of Warm Clothes to Needy People

Volunteers of CHARUSAT NSS Unit distributed warm clothes to needy people as an act of kindness. The volunteers distributed warm clothes like sweaters, shawls and clothes to poor and needy people at various places like Bus- stop, Railway station as well as various public places around Anand.

The students had collected clothes and other things from their homes and relatives. Students had spread a message to offer a hand of help to those who do not have needed clothes and are facing difficulty in the winter. Many students donated new and old as well as usable clothes for the needy ones. More than 60 pairs of clothes, sweaters, shawls and other warm clothes were collected from different students. The clothes were divided among different teams of volunteers and all the teams were allotted different areas to distribute the clothes. Late night around 10 pm all the teams of volunteers took the task of searching the needy people on the road and give them the clothes. The teams also took food packets for any needy one who may not had food. There were 12 students as volunteers leading each team. They were joined by 10 staff members. Approx 30 needy people were benefited under this activity.

This was well appreciated by local people and many of the passers-by agreed to join hands with CHARUSAT NSS Unit to donate clothes and other essentials to the unprivileged class of the society.

A Report on Bird Rescue Campaign at CHARUSAT

CHARUSAT NSS Unit initiated BIRD- RESCUE Campaign at CHARUSAT Campus during Uttarayana Week. It has been observed that many birds get injured during Uttarayana season and meet an end to their lives. Usage of fatal threads (especially Chinese threads) during Uttarayana days prove to be very harmful for thousands of innocent birds causing mutilation, blindness and death.

With a view to save and protect birds from all such dangers, a Bird -Rescue Camp is established near CHARUSAT Campus.The details of the same are as following:

Time: **9:00 am to 6:00pm**

Dates: **January 13 to 16, 2017**

Venue: **Charusat Bus- Stop, opposite Nisarg Hostel, Changa road side**

Supporting NGO: **MAA Animal Foundation, Nadiad**

10 NSS Volunteers and 2 Program Officers with 1 non-teaching staff living nearby CHARUSAT coordinated the campaign during the mentioned period. Pamphlets and leaflets were distributed in nearby villages and public places to spread awareness about the campaign. Helpline Numbers were also shared for immediate / emergency support to the injured birds.

The campaign was initiated in collaboration with Maa Animal Foundation. Maa Animal Foundation is a non-government animal welfare organization that provides medical care and Food to un-owned domestic animals. Our objective is to help animals in pain and suffering, and we try our best to nurture them back to a healthy and happy life.

Their Mission to help all kind of un-owned domestic Animals. Our Foundation is Giving 24/7 help to Animals. We Give Free Treatment, Medicine, and Food to domestic Animals.

Around 12 injured birds were rescued and treated. A team of veterinarian or veterinary surgeon and volunteers of MAA Foundation treated the injured birds.

CHARUSAT NSS UNIT

A Report on Baby Monkey Rescue

CHARUSAT NSS Unit has been involved in act of humanities since its inception. A team of CHARUSAT NSS Unit has rescued, treated and worked hard for the rehabilitation of injured, abandoned and physically challenged birds and animals in and around CHARUSAT Campus.

A team of NSS Volunteers found an injured baby monkey on the campus on 8TH FEBRUARY 2017. It was abandoned as his mother died of electric shock and was facing danger of being killed by stray dogs and other animals. Volunteers found it crying in pain and looking for his mother. It was surrounded by stray dogs. Volunteers rescued it and brought to NSS Unit and comforted it.

The baby monkey was fed well with some food and was much comfortable in the company of the volunteers. It was found that the baby monkey was badly injured and one of the hands was decaying.

We approached an NGO (Non- Government Organisation) based at Vidyanagar called Ray of Light Foundation. It is founded by a social work student Pulkit Bhatt in the year 2014. It carries out activities like rescuing, rehabilitation, adoption of birds, animals, reptiles etc.

3 NSS Volunteers with program officers treated and kept the baby monkey safe till a team of Ray of Light Foundation, reached CHARUSAT Campus late at 10 pm. The team took the baby

monkey with them and treated it well. Updates about the health and status of baby monkey was conveyed to NSS Team regularly.

When, recovered, the baby monkey was brought to CHARUSAT Campus to help it reunite with the group of monkeys. But it was not accepted by the group and was abandoned as it lost its mother and a left hand too. It was later sent to rescue centre, where it found new companions.

The act of humanities was well appreciated by the executives of CHARUSAT as well as CHARUSAT Family.

Charusat Rural Education Development Program

Report on Training Program at School

Charusat Rural Education Development Program (CREDP) organised training program at Padgol High School, Padgol under National Literacy Mission Program to facilitate learning process for the students in English and Mathematics.

Date: **15/02/2017**

Time: **10:30 am to 12:00 pm**

Venue: **Padgol High School, Padgol**

The training program was organized for students of standard 9 and 10 of Padgol High School, Padgol. Total 82 students participated in the training program. As the training program was organized for the students of standard 9 and 10, topics from their textbooks were selected for the training. Prior to the training program, the teachers were approached and important topics to be covered in training sessions were discussed. As per the selected topics given by the teachers, teachers and students of CHARUSAT prepared different models and charts to facilitate the grasping of the topics by the students.

Various activities were organized from 10:30 am to 12:00 pm. Volunteers and faculty members from CHARUSAT carried out various activities to help students train in language development process. Students were involved in activities like grammar

games, On- Minute competitions, poetry recitation, story-telling, quiz, vocabulary antakshari, picture descriptions and role play in English language.

CREDP Cell facilitated innovative activity like Workshop on drama techniques wherein students prepared, practiced and performed small dramas on day today events in English language. Students learnt small conversations / dialogues in English and started using them in routine. On the last day students presented report of the workshop in English.

For the topics on Mathematics, various models of Mathematics were prepared and some were collected from CHARUSAT and were utilized to explain difficult topics of the Maths. Through different activities, difficult topics were explained in Fun and Learn method. Total 82 students participated in this event.

CHARUSAT NSS UNIT

A Brief Note on celebration of International Day of Yoga

Yoga is a 6,000+-year-old physical, mental and spiritual practice having its origin in India (Bharat) that aims to transform body and mind. This is matter of pride for all of us that the United Nations General Assembly has declared 21st June as International Yoga Day.

CHARUSAT NSS Unit organised celebration of **International Day of Yoga** at **CHARUSAT** Campus with a view to spread awareness about Yoga and motivate practice of Yoga among people. The details are as following:

Date: **21-Jun-2017**

Time: **8:00 am to 8: 30 am**

Venue: **Central Lawn, CHARUSAT Campus**

The celebration was organised from 8:00 am to 8: 30 am at Central Hall at CHARUSAT Campus. The participants were provided essential information about the benefits and techniques of yoga.

Various yoga steps were practiced by the participants under guidance of experts of the field. Total 5 Yoga experts performed and demonstrated various steps and instructed the participants to follow.

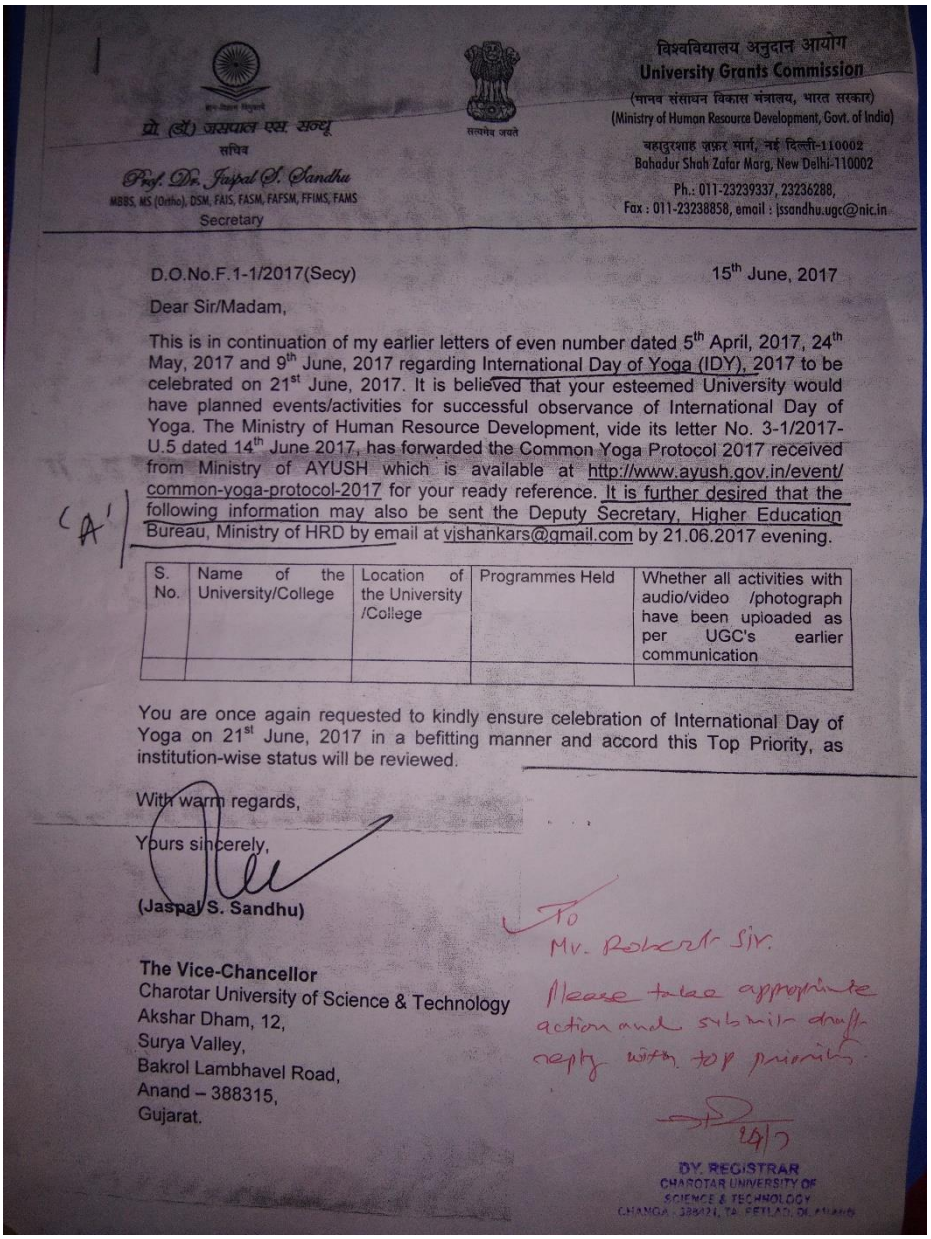

Students and Teachers of Rural Schools nearby CHARUSAT and interested people from nearby area also joined members of CHARUSAT family along with MS. Madhuben Patel, Joint Secretary, for the celebration. Three girl students accompanied the expert in demonstrating various steps of yoga. Around 600 students, 40 Staff, 60 teachers of charusat, also participated in the practice and demonstration of yogasanas. Lemon juice and biscuits were catered to the participants after the practice.

D.O.No.F.1-1/2017(Secy) 15th June, 2017

Dear Sir/Madam,

This is in continuation of my earlier letters of even number dated 5th April, 2017, 24th May, 2017 and 9th June, 2017 regarding International Day of Yoga (IDY), 2017 to be celebrated on 21st June, 2017. It is believed that your esteemed University would have planned events/activities for successful observance of International Day of Yoga. The Ministry of Human Resource Development, vide its letter No. 3-1/2017-U.5 dated 14th June 2017, has forwarded the Common Yoga Protocol 2017 received from Ministry of AYUSH which is available at http://www.ayush.gov.in/event/common-yoga-protocol-2017 for your ready reference. It is further desired that the following information may also be sent the Deputy Secretary, Higher Education Bureau, Ministry of HRD by email at vjshankars@gmail.com by 21.06.2017 evening.

S. No.	Name of the University/College	Location of the University /College	Programmes Held	Whether all activities with audio/video /photograph have been uploaded as per UGC's earlier communication

You are once again requested to kindly ensure celebration of International Day of Yoga on 21st June, 2017 in a befitting manner and accord this Top Priority, as institution-wise status will be reviewed.

With warm regards,

Yours sincerely,

(Jaspal S. Sandhu)

The Vice-Chancellor

About CHARUSAT University

Charotar University of Science and Technology (CHARUSAT) has been conceived by *Shri Charotar Moti Satavis Patidar Kelavani Mandal* - a not for profit premier education trust of India having a social lineage of more than 118 years. CHARUSAT has been established by promulgation of Gujarat Private University Act, 2009. It is empowered to confer degrees under Section 22 of UGC Act, 1956. It has been accredited with "Grade A" by Knowledge Consortium of Gujarat, Education Department, govt. of Gujarat. Also it has been accredited with "GRADE A" by NAAC, Government of India. Presently, CHARUSAT offers 62 programs from UG to PhD under the tutelage of 8 Institutes and 6 Faculties. They are in the allied disciplines of Technology & Engineering, Pharmacy, Computer Applications, Management, Applied Sciences, Nursing, Physiotherapy, and other Paramedical Sciences.

Department of Information Technology

The Department of Information Technology offers B.Tech. and M.Tech. in Information Technology. The department has strong collaboration with industries and has signed MOU with many leading industries. The graduates have found remarkable placements in prestigious national and international companies and many are pursuing their higher studies from premier institutes in India and abroad. The department has competent and devoted faculty. Department was accredited for two year w.e.f 01/07/2016 by National Board of Accreditation.

ACM – Association for Computing Machinery

The Association for Computing Machinery is an international learned society for computing, founded in 1947. ACM is the world's largest educational and scientific computing society, delivers resources that advance computing as a science and a profession. ACM is solely dedicated to computing. ACM provides the computing field's premier digital library and serves its members and the computing profession with leading-edge publications, conferences and career resources.

CHARUSAT is an official Student Chapter of ACM initiated by Department of Information Technology, CSPIT.

About the Seminar

Activities carried out

Talk 1: Dawn of Women in Computing

Expert: Dr. Arati M. Dixit, Professor, Department of Technology, Savitribai Phule University, Pune

Time: 9:30 am To 11:00 am

Women were very much active members of the community contributing to the field of computing since its inception. Women have been involved with the development of historically significant technology which has created the third wave of - 'Information Age', after the first 'Agricultural Age' and second 'Industrial Age'. The talk would focus to answer few questions like: Have we heard about these women? Who were the major contributors? What have been their major contributions? Are they on the pages of history? How have they carved their names on the pages of history? The talk aims to take into account historical, social, cultural and technological perspective resulting in an impressive dawn of women in computing.

Talk 2: Women's Law in India

Expert: Dr. Jyotsna Rathod, Director, Former Principal Judge, City Civil &Sessions Courts, Ahmedabad

Time: 11:00 am To 12:30 pm

This talk related to women rights and law in India. Women policies and laws (Fundamental Rights-Equality before law for women (Article 14)) that help women and girls to achieve their potential throughout their lives – at school, at work, at home and in their community.

Talk 3: Achieving your Leadership Potential

Expert: Dr. Anuradha Gajjar, Professor, Department of Pharmaceutical Chemistry and Analysis, RPCP, CHARUSAT, Changa

Time: 01:30 pm To 03:00 pm

This talk related to initiative and leadership, developing teamwork, improving your effectiveness. Also ensure that team members share the same goals, encourage competition between ideas, not individuals, allow new people and teams to prove how good they are, reward real merit openly, but never appear to have any favourites.

Event Report:

"Demonitization: Its Prospective in Investment Opportunity"

HRDC organized a Seminar on, "Demonetization: It's prospective in Investment Opportunity", on December 27, 2016. It was a Divya Bhaskar CSR Programme, initiated by HRDC with the objective of highlighting the broad based impact of Demonetization as investment opportunity. The Seminar was attended by nearly 280 participants.

The Session was addressed by Mr. Nishant Mehta – VP, Divya Bhaskar, Mr. Jignesh Madhwani- MD Torin Wealth Management and Mr. Girish Patel – Insurance Expert. The session has elaborately discussed on the effects of Demonetization, its impact and how people shall have more options to invest. The session ended with Open House Interaction with the participants.

It was well attended by around 240 participants consisting of 136 Teachers, 80 Students and 24 other members of Charusat Family.

CHARUSAT

Submitted By: V Prakash,
Institute Coordinator (ARIP),
Equal Opportunity Cell,
CHARUSAT

This access audit was carried out using the Harmonised Guidelines and Space standards for Barrier Free Environment for Persons with Disabilities (released on 23rd March 2016) provided by Ministry of Urban Development, Govt of India

CHARUSAT
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

Ashok & Rita Patel
Institute of Physiotherapy

ACCESS AUDIT Report

Building Name: Ashok & Rita Patel Institute of Physiotherapy

Date of Audit: 28-07-2016

Audit done by:

1. Garima Gedamkar, Assistant Professor, ARIP
2. Sonal Rathod, IInd semester MPT,ARIP
3. Aditi Gandhi, IInd semester MPT,ARIP

Executive Summary

The growth and development of physical infrastructure provides an abundance of opportunities and experiences for many people, free of limitations imposed of the built environment. The built environment, however, imposes numerous obstacles for Persons with Disabilities (PWDs) that limit their ability to move about freely and safely without concern. Many buildings and areas would require redesigning and retrofitting to ensure a barrier free environment for persons with disability and the elderly.

An access audit rates an existing building against given criteria for usability and accessibility. The Department of Empowerment of Persons with Disabilities (DEPwD) has launched Accessible India Campaign (Sugamya Bharat Abhiyan) as a nation-wide Campaign for achieving universal accessibility for Persons with Disabilities (PwDs). In line with this campaign, we have conducted access auditing of the built Environment of the ARIP for Persons with Disability and Elderly Persons.

Key findings

- Non availability of accessible or designated parking space for PWDs
- Front entrance door has high resistance for opening
- Emergency exits is not clearly marked with directional arrow signs
- Water taps are not accessible for persons using wheel chair and cannot be easily manoeuvred by a person with poor hand function
- Side entrance ramp does not have railings on both sides
- Direction signages indicating the location of accessible facilities such as toilet or water are non-existent

Recommendations

- To install hand railings for ramp on both side
- To modify front entrance by making a provision for ramp
- To improve accessibility of water for PWDs
- To restructure existing ramp for facilitating the manoeuvrability of self-propelled wheel chair users
- To consider installing automatic door at the from entrance to ease the existing barriers in using front door such as high resistance in opening door, forceful closure due to strong wind and other reasons.
- To designate parking space for PWDs located closer to entrance

A comprehensive audit checklist attached with this report would provide the detailed version of findings of this audit.

1. MAIN ENTRANCE	YES	NO	NOT APPLICABLE	REMARKS
▪ Is the main entrance of the building accessible?		✓		
▪ Are there any steps at the entrance?	✓			
▪ Do the steps have a handrail?		✓		
▪ Are there handrails on both the sides?			✓	
▪ Is there a ramp?		✓		Not adjacent to steps
▪ Does the ramp have a railing?		✓		
▪ Are there handrails on both the sides?			✓	
▪ Is the clear door width at least 1000 mm?	✓			2250mm
▪ Can the entrance door be operated independently?	✓			Only till mid-way
▪ Is the height of the door handle between 800 mm and 1000 mm?	✓			1100mm
▪ Does the accessible entrance permit access to an elevator?			✓	
▪ Is the accessible entrance clearly identifiable?	✓			
▪ Is the landing surface non-slippery?	✓			

2. RAMPS	YES	NO	NOT APPLICABLE	REMARKS
▪ Is there a ramp next to the stairs?		✓		
▪ Is the location of the ramp clearly identifiable?	✓			
▪ Is the ramp gradient no steeper than 1:12?				1:1.74
▪ Is there a landing of at least 1500 mm x 1500mm, at 9m intervals provided?			✓	
▪ Is there a landing at every change in direction?			✓	
▪ Is there landing at the top and bottom of every ramp?	✓			
▪ Is the minimum width of the ramp 1500 mm?	✓			
▪ Are there continuous handrails, on both sides, at a height between 760 mm – 900 mm?		✓		
▪ Is the surface of the ramp non-slip?	✓			Grating present
▪ Is there an edge protection on both sides of the ramp?		✓		

3. PARKING	YES	NO	NOT APPLICABLE	REMARKS
▪ Are there accessible parking facilities?		✓		
▪ Is the number of accessible parking spaces sufficient?			✓	
▪ Are the designated spaces wide enough 3600mm x 5m?			✓	
▪ Are accessible parking spaces marked by the international symbol of accessibility?			✓	
▪ Accessible parking spaces are not misused or used by non-disabled people?			✓	
▪ If the drop-off area has a kerb, is there a kerb ramp leading to the pathway?			✓	

▪ Is the drop-off area marked by signage?			✓	
▪ Is there an accessible path of travel form the drop-off area to the main entrance?			✓	

4. RECEPTION & INFORMATION COUNTERS	YES	NO	NOT APPLICABLE	REMARKS
▪ Are the counters easily indefinable?		✓		
▪ Is the counter at two height?		✓		
▪ Is a part of the counter lowered to accessible height of 800 mm?		✓		1220mm
▪ Is a loop induction unit installed at the counter?		✓		
▪ Are there tactile pictographic maps of the building near the counter?		✓		
▪ Is the counter well illuminated?		✓		

5. DOORS	YES	NO	NOT APPLICABLE	REMARKS
▪ Are there any automatic doors at the entrance?		✓		
▪ Can the doors be operated without much effort?	✓			But till half way
▪ Do automatic doors have sufficient long opening intervals?			✓	
▪ Are push buttons for automatic doors located at a maximum height of 1m?			✓	
▪ Is there sufficient space beside the latch side of the doors (450-600mm)?	✓			
▪ Are accessible door placed adjacent to the revolving doors			✓	

and turnstiles?				
▪ Are glazed doors marked with a colour band at eye level?	✓			
▪ For double leaf doors, is the width of one of the leaves at least 1m?	✓			1125mm
▪ Do doors fitted with spring closers have an extra pull handle?		✓		
▪ Is manual door accessories/ hardware (handle,lock pull etc.)lower than 800mm?		✓		1100mm

6. CORRIDORS	YES	NO	NOT APPLICABLE	REMARKS
▪ Is the minimum unobstructed width of corridors at least 1500 mm?	✓			2980mm
▪ Does the corridors width allow manoeuvring through doors located along its length?	✓			
▪ Are differences in level, bridged with by ramps or lifts?			✓	
▪ Can a sightless person with a cane detect all protruding objects with in the corridor?		✓		
▪ Are all over hanging obstructions mounted above a minimum height of 2200mm?		✓		Between 1070mm-1840mm
▪ Can a person with low vision, identify all obstacles in the corridor?	✓			

7. LIFTS	YES	NO	NOT APPLICABLE	REMARKS
▪ Is there an accessible path leading to the elevator?			✓	
▪ Is the clear door opening width 1m or more?			✓	
▪ Are the minimum internal dimensions of the elevator 1500 mm x1500 mm minimum or having 13 persons capacity?			✓	
▪ Is the height of the call button (outside the lift) between 800 mm – 1m, from the floor level?			✓	
▪ Is the control panel placed at a height between 800 mm – 1m, from the floor level?			✓	
▪ Is there an audio and video system installed in the lift indicating arrival at a floor?			✓	
▪ Are there Braille/raised numbers on the control panel?			✓	
▪ Is the elevator provided with a handrail on the three sides?			✓	
▪ Are the handrails mounted at a height between 800 mm and 1m?			✓	
▪ Is the elevator door easy to identify?			✓	
▪ Is the emergency intercom provided inside the elevator?			✓	
▪ Are there tactile or Braille instructions for the communication system?			✓	
▪ Is the emergency intercom usable without the voice communication?			✓	
▪ Is the door opening/closing interval long enough?			✓	
▪ Is the finish of the elevator floor skid-resistant?			✓	

8. STAIRS	YES	NO	NOT APPLICABLE	REMARKS
▪ Is the minimum width of the stairs 1200mm?	✓			2500mm
▪ Are there continuous handrails, on both sides, at a height between 760mm-900mm?		✓		1110mm
▪ Is the handrails installed in the centre of the stair width, which is more than 3m wide?			✓	
▪ Is the landing length not less than 1200mm?	✓			
▪ Are the step edges of a different colour or texture easily identifiable by low-vision & vision impaired persons?		✓		
▪ Are there warning blocks installed at the beginning and end of all flights?		✓		
▪ Is the location of emergency (fire escape) stairs clearly identifiable?		✓		
▪ Does the height of the risers is 150 mm maximum & tread 300 mm minimum?	✓			Riser=220mm Tread=360mm
▪ Do treads have a non-slip surface?	✓			
▪ Are the risers having open gaps in the steps?		✓		

9. HANDRAILS(at entrance)	YES	NO	NOT APPLICABLE	REMARKS
▪ Are handrails mounted at a height between 760mm – 900 mm?	✓			
▪ Are handrails easy to grip?	✓			
▪ Are handrails securely attached?	✓			
▪ Do handrails extend horizontally 300 mm at the top and bottom of every staircase or ramp?	✓			Top=1200mm Bottom-No
▪ Are the ending of the handrails grouted in the ground or turn downward?	✓			
▪ Is the space between the handrails and the wall no less than 50mm?	✓			
▪ Are the handrails painted in contrast colours to be easily indefinable?		✓		
▪ Are there tactile strip/ Braille plates identifications on the handrails for emergency stairs & floor levels?		✓		

9. HANDRAILS(inside building)	YES	NO	NOT APPLICABLE	REMARKS
		✓		
▪ Are handrails mounted at a height between 760mm – 900 mm?				
▪ Are handrails easy to grip?	✓			
▪ Are handrails securely attached?	✓			

▪ Do handrails extend horizontally 300 mm at the top and bottom of every staircase or ramp?	✓			Bottom-No
▪ Are the ending of the handrails grouted in the ground or turn downward?	✓			
▪ Is the space between the handrails and the wall no less than 50mm?	✓			600mm
▪ Are the handrails painted in contrast colours to be easily indefinable?		✓		
▪ Are there tactile strip/ Braille plates identifications on the handrails for emergency stairs & floor levels?		✓		

10. TOILETS	YES	NO	NOT APPLICABLE	REMARKS
▪ Are there accessible toilets for Persons with Disabilities?	✓			
▪ Are the toilets easily identifiable?		✓		1.90m x 1.80
▪ Is there sufficient space of 2m x 2.2m inside the toilets to manoeuvre a wheelchair?	✓			
▪ Are water closet (WC) and bidets mounted at a height between 450mm – 480mm?	✓			480mm
▪ Is the space between the WC and the closest adjacent wall, fitted with a grab bar is between 450 mm – 500mm?	✓			400mm
▪ Is the accessible washbasin mounted at a height between 750mm – 850mm?	✓			780mm
▪ Is the lower edge of the mirror positioned at a height not exceeding 1m?		✓		1130mm

▪ Are the accessible showers provided with a folding seat?			✓	
▪ Are the grab bars installed near WC and showers at a height between 750 – 850 mm?		✓		690mm-960mm
▪ Do grab bars have a diameter of 38 mm?		✓		50.9mm
▪ Do wall mounted grab bars have knuckle space 50 mm?	✓			
▪ Are grab bar non slippery?	✓			
▪ Can the grab bars withstand the load of 200kg minimum?				Could not test
▪ Are faucets easy to grip and operate with one hand?		✓		
▪ Are shower fixtures with at least 1500 mm long hoses?			✓	
▪ Are hot water pipes insulated or covered?			✓	
▪ Is the toilet equipped with an emergency alarm system?		✓		
▪ Can doors be locked from inside and releasable form outside under emergency situations?	✓			

▪ Are flushing arrangements, dispensers and toilet paper mounted between 300mm and 800mm?		✓		930mm
▪ Are flushing equipments easy to operate?	✓			
▪ Is the floor material skid proof, well drained and waterproof?	✓			
▪ Do pivoted doors open outwards?		✓		

11. CANTEEN	YES	NO	NOT APPLICABLE	REMARKS
▪ Is the eating outlet accessible for PwD"s?			✓	

▪ Is there a circulation path of at least 900 mm wide to allow a wheelchair user to move around the eating outlet?			✓	
▪ Are the cash and service counter height below 800mm?			✓	
▪ Is the table accessible with a height of 750mm to 850mm and knee space of 750mm wide and 480mm deep?			✓	
▪ Do the table with fixed stools have accessible spaces for wheelchairs?			✓	

12. DRINKING WATER	YES	NO	NOT APPLICABLE	REMARKS
▪ Is the Water tap accessible?		✓		
▪ Can it be easily manoeuvred by a person with poor hand function?		✓		
▪ Is the area dry?	✓			Not always
▪ Are glasses provided?	✓			

13. SIGNAGES	YES	NO	NOT APPLICABLE	REMARKS
▪ Are accessible spaces identified by the international symbol of accessibility?		✓		
▪ Are there directional signs indicating the location of accessible facilities?		✓		
▪ Are maps, information panels and wall-mounted signs placed at a height between 900mm and 1800mm?	✓			Sign board of different rooms with description lowest-900mm

▪ Are signs clear, simple and easy to read?	✓			Sign board of different rooms with description
▪ Is the colour of signs clearly distinguishable?	✓			Sign board of different rooms with description
▪ Is the surface of the sign processed so as to prevent glare?	✓			Sign board of different rooms with description
▪ Is the sign supplement by a text in embossed letters or in Braille available next to information signs?		✓		
▪ Is the lettering size proportional to the reading distance?	✓			

14. EMERGENCY EXITS	YES	NO	NOT APPLICABLE	REMARKS
▪ Are emergency exits clearly marked with directional arrow signs?		✓		Route of entry & exit is same

15. PUBLIC TELEPHONES	YES	NO	NOT APPLICABLE	REMARKS
▪ Are there public telephones accessible to wheel chair users?			✓	
▪ Is there at least one telephone in the building equipped with a loop induction unit?			✓	
▪ Are the numerals on the telephone raised to allow identification by touch?			✓	

▪ Is there proper signage directing to the public telephone?	✓	
▪ Are the heights of the operable parts of the telephone between 800mm and 1m?	✓	
▪ Is there a clear knee space of 750mm?	✓	

16. RESTING FACILITIES	YES	NO	REMARKS
▪ Where there are large spaces, are resting facilities provided at 30 meters of intervals?	✓		2510mm
▪ Is there an adjoining space for a wheelchair next to benches and public seats?	✓		
▪ Are public seats with height of 450-480mm?	✓		450mm
▪ Are knee spaces at accessible tables with a height of 750mm and knee space of 750mm wide and 480mm deep?	✓

To
The Principal,
CSPIT, CHARUSAT.

Subject: Permission for organizing LOGO design competition under the Equal opportunity cell.

Respected sir,

As you are aware that Equal opportunity cell has been constituted to provide Equal opportunity to every Charusat family member. In this regard a meeting had been conducted to design LOGO of cell on 12th July 2016 1.30 p.m.

It has been decided to involve CHARUSAT Students for the same. A competition to design LOGO will be organized and best design would be selected. Also student would be awarded with Prize money.

To compensate the expenses toward the competition planned, we have approached to various organization for the sponsorship as a result of this "Jumbo Jet Aviation Academy" is ready to provide sponsorship of Rs 5000 to organize the competition. So kindly grant the permission for organizing the competition.

Yours Sincerely

Hardik S. Jayswal

Logo competition:

Equal opportunity cell (EOC) has been constituted to provide Equal opportunity to every CHARUSAT family member. In this regard, a meeting was conducted. It was decided in the meeting that IT department will organize LOGO design competition of EOC.

It has been decided to involve CHARUSAT Students for the same. A competition to design a LOGO will be organized and it has been decided to select best design and awarded with Prize money.

We have received hundreds of logo from the Students of CHARUSAT between 10st august to 25th august..

To select best suitable logo for EOC, scrutiny committee 1 has been formed by the university. Scrutiny committee 1 have Evaluated all received LOGO and selected the top twenty five (25) logo Based on above guideline up to 30th August.

Scrutiny committee 2 that involve head and principal of institution of CHARUSAT they have given their preference to select the logo, With their preference top 3 logo has been selected.

The details of competition are attached in Annexure 1.

Annexure 1.

About the Competition:

The "Equal opportunity cell logo design competition " ("The Contest"), is organized by , Equal opportunity cell at CHARUSAT.

Eligibility:

Open to all CHARUSAT Current Undergraduates, Post Graduate Students. The Competition is not eligible to employees of CHARUSAT.Equal opportunity and CHARUSAT cell reserve the right to disqualify entries that do not meet the eligibility terms and conditions of the Competition.

Duration of Competition:

The Competition begins at 10.00 a.m on 10th August, 2016 to 25th August, 2016 10.00 p.m.. No entry will be considered after 25th August, 2016 10.00 p.m.

Joining the Competition:

Participants can submit logo design as an individual or as Group Entry. Participants are allowed to submit a maximum of 2 entries. The Contest is free of charge for the participants.

Submission Guidelines for Submit a Logo:

- Logo should correspond to the Equal opportunity Cell
- Preferably relate to Equal opportunity at CHARUSAT
- Modern, simple, smart, recognizable, memorable
- Logo must include the words, “Equal opportunity”.

  e.g “We Believe in Equality ”,“Equality is the Best Policy” , “One for all & All for one”
- Submission Must via Online,No printed copy will be accepted.
- Attached Logo file must be in either jpg ,bmp.other format will not be allowed
- Logo files must be at least 256 x 256 pixels. Limit attachment size to not more than 5MB..

Selection of Winner:

Judging Criteria:

The entries will be assessed in the following areas:

	Percentage
Storyline/ Design Rational/Quote	40%
Creativity	30%
Originality	30%

Scrutiny committee 1 will Evaluate all Received LOGO and select the top twenty five (25) logo Based on above guideline up to 30th August.

Scrutiny committee 2 will scrutinize top 3 logo out of final twenty five (25) LOGO selected by Scrutiny committee 1.

Prizes :

There will be 1 winning entry and 2 and 3 consolation prizes as listed in the table below:

Cash Prizes	
Winner (1st Prize)	1500 RS.
1st Runer UP	1000 Rs.
2st Runer UP	500 Rs.

The prizes are not transferable or redeemable for other goods or services.

Announcement of Result

All prize winners will be notified by email.

All prizes must be collected by the winner or his authorized representative within 30 days from the date of notification.

The judges' decision pertaining to the judging, process and award of the prizes is final and no correspondence will be entered tained.

Winner (16TIT009)

Event Report

Name of Institute : Smt. Chandaben Mohanbhai Patel Institute of Computer Applications

Name of Event : Expert Lecture on Developing Soft Skills.

Date and Time of Event : 11th August,2016, 10:10 a.m. to 12:10 p.m.

Event coordinator : Ms. Nirali Honest

Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1	**Dr. Bhaskar Pandya**	Department of Humanities and Social Sciences, I^2 IM , CHARUSAT

Event Schedule:

Date	Time	Session	Activity
11th August , 2016	10:10 a.m. to 12:10 p.m.	• Introduction • Floral Welcome • Content delivery by guest speaker • Vote of Thanks	Lecture and Interaction session with the students on values of life skills

Summary of the Event :

- The event was organized to understand the value of life skills which is one of the most important soft skills that need to be acquired by an individual. The session was commenced with a brief introduction of the guest and speaker Dr. Bhaskar Pandya, which was followed by the floral welcome. Dr. Bhashar Pandya shared his views of life sills by giving numerous

motivational examples and very impressive and effective videos. The major topics covered during the session were, Concept of Life, Concept of Life Skills, Importance of Life Skills, Important Life Skills, Categorizing Life Skills, Developing Life Skills, Basic Principles to follow and important things always to remember for living a happy and successful life. Dr. Bhaskar shared his knowledge on how to take an effective decision, how to handle failures, how to handle critics, how to handle obstacles and how to analyze and identify problems that leads to failure, and above all how to overcome all problems and achieve the goals of your life. He shared some good books students should read to lead a better life, and he showed very motivating speech of Steve Jobs at the convocation function, Stanford University, which helped the student to understand every successful person has faced difficulty and struggles in life, only the person who handles life with right attitude lives a happy and successful life. The session was ended by giving a vote of thanks to Dr. Bhaskar for delivering very valuable content in a very simple and pleasant manner and sharing his content with all, to all the participants for being very good audience and respecting Sir by listening him very carefully and silently, to the Chairperson of EOC for giving the opportunity to host the event , to the Principal CMPICA, for giving permission to carry out the event , to the HOD Sir and staff members of CMPCIA for making all the necessary actions and adjustments required to handle the event smoothly and last but not the least to all the student volunteers for managing the entire event very responsibly.

Registration fee (if any): No registration fees.

Date	Time	Activity
31st August, 216	09:30 a.m. To 11:30 a.m.	Workshop

Summary of the Event (Maximum 200 words):

As a part of EOC we have arrange a Workshop on "How to Face an Interview", on 31st August, 2016. The workshop was conducted Dr. Kamal Chakraborty Head, HRDC, CHARUSAT. The Workshop was started at 09:30 a.m. and continues to 11:30 a.m. After inauguration and welcome the programme was started.

Dr. Kamal Chakraborty sir initiated with what should be contain in curriculum vitae, How to dress up during interview and behavior (talking sense) during the interview. In curriculum vitae they started from student details, education, project details, any curricular activity details and family background, all points are discussed. They suggested that write only those things that you know (master). And same things explained in very details for how to dress up during interview and behavior (talking sense) during the interview. Sir has shared their experience with the students. Ask questions to students and reply their doubts.

The session was very interesting. From the student's feedback, the workshop was very enjoyable and useful for their future interviews.
Thanking you to department head Dr. Praghnesh Bhatt sir, EOC chairperson Dr. Vijay Panchal sir and all EOC members, coordinators for their supports for making this event successful.

1	**Mr. Nandak Pandya**	Corporate & Educational Mentor, Dhyeya Mentoring LLP, Ahmedabad.

Event Schedule:

Date	Time	Session	Activity
9th September, 2016	10:10 a.m. to 12:10 p.m.	• Introduction • Floral Welcome • Content delivery by guest speaker • Vote of Thanks	Counseling and Interaction session with the students on how to improve writing, speaking and avoid delay in work.

Summary of the Event:

The event was organized to understand how one can improve in writing, speaking and can avoid the habit of delaying things. The session was commenced with a brief introduction of the guest and speaker Mr. Nandak Pandya, which was followed by the floral welcome. Mr. Nandak Pandya shared what skills should be considered for writing, including writing mechanics: grammar, sentence structure, spelling, etc. and planning a writing strategy. He made a strong

point to that speaking skills cannot be developed unless we develop listening skills. Students must understand what is said to them to have a successful conversation. Sir shared the ideas of Doff by stating that when one person speaks, the other responds through attending by means of the listening process. In fact, every speaker plays the role of both a listener and a speaker. Therefore, one is certainly unable to respond if he/ she cannot understand what is said. It means speaking is closely related to listening. Speaking includes communicating ideas clearly and concisely, constructing a reasoned, demonstrable argument and effectively marshaling evidence and using sources appropriately in organizing ideas effectively. Sir discussed the action of delaying or postponing because of tactics and hesitation , and he explained the consequences of it. Sir shared videos to make the concept understanding more valuable. He had a very good interaction with the students regarding the concept. The session was ended by giving a vote of thanks to Nandak sir for delivering very valuable content in a very simple and pleasant manner and sharing his content and videos with all, to all the participants for being very good audience and respecting Sir by listening him very carefully and silently, to the Chairperson of EOC for giving the opportunity to host the event , to the Principal CMPICA, for giving permission to carry out the event , to the HOD Sir and staff members of CMPICA for making all the necessary actions and adjustments required to handle the event smoothly and last but not the least to all the student volunteers for managing the entire event very responsibly.

Registration fee (if any): No registration fees.

1	Dr. H.J.Jani	CHARUSAT, Changa

Event Schedule:

Date	Time	Session	Activity
10/09/2016	1.30 pm – 3.00 pm	1 and ½ hour	Expert Talk

Summary of the Event:

The International Labour Organization (ILO) has reported that hundreds of millions of people suffer from discrimination in the world of work. This not only violates a most basic human right, but has wider social and economic consequences. Discrimination stifles opportunities, wasting the human talent needed for economic progress, and accentuates social tensions and inequalities.

Combating discrimination is an essential part of promoting decent work, and success on this front is felt well beyond the workplace. Thus the topic of the expert talk was focused on general Equality and discriminations.

Though the time allotted for the session was not enough to cover all types of discriminations, Dr. H.J. Jani sir nicely delivered their lecture and try to touch all the discrimination and equality act. The key points in the talk of Dr. Jani sir were:

Equality:

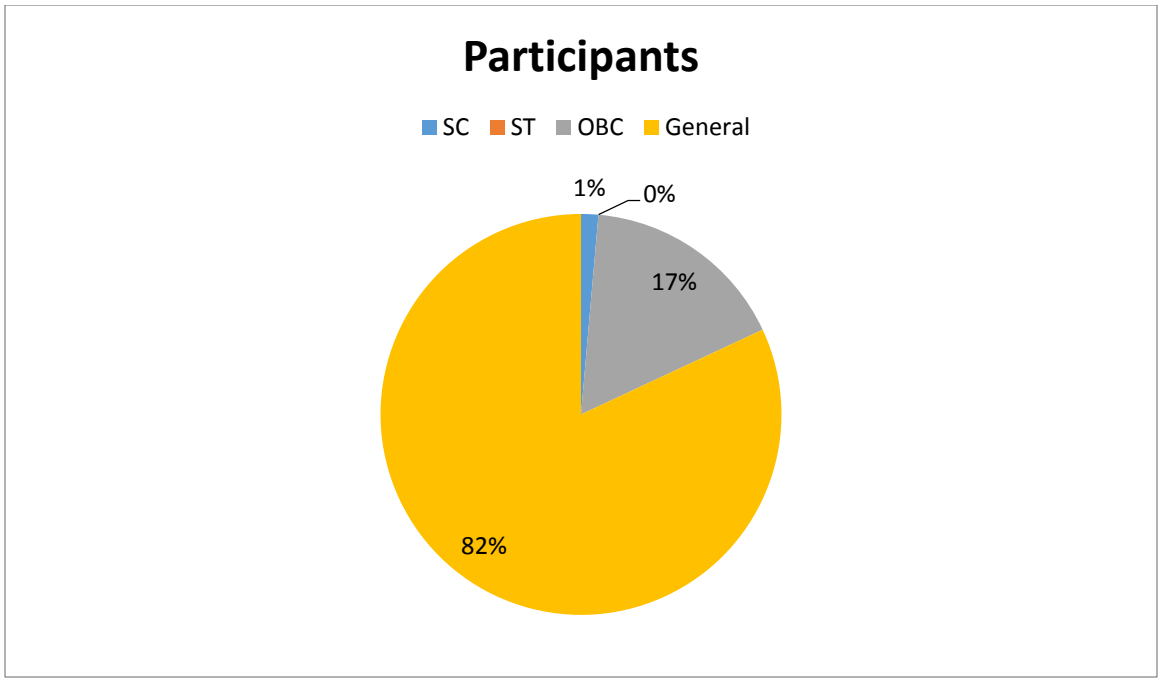

- Equality of opportunity
- Equality of outcome
- Equality of condition
- Patterns of inequality
- The Indian Constitution guarantees equality as 'Fundamental Rights' in Articles 14, 15 and 16 under Part III : Right to equality, Right to freedom, Right against exploitation, Right to freedom of religion, Cultural and Educational rights, Right to constitutional remedies, Right to education

Discrimination:

- Discrimination based on**:** Gender, Ethnicity, Nationality, Age, Caste, Origin, Income or Property, Language, Race, Disability, Civil status, Family status, Sexual orientation, Religion, Convictions, Opinions, or Health.
- The Universal Declaration of Human Rights
- The International Convention on the Elimination of All Forms of Racial Discrimination
- Convention on the Elimination of All Forms of Discrimination against Women
- The Convention on the Rights of Persons with Disabilities
- Anti-Discrimination acts

Event Schedule:

Date	Time	Session	Activity
16/09/2016	10:00 a.m. to 1:00 p.m.	Health awareness Programme	• Door to door counseling • Distributing the pamphlets • Explanation through videos and banner

Summary of the Event (Maximum 200 words):

The Health Awareness programme on Nutrition, hygiene awareness and Lifestyle diseases was held at 'Vaso' Village which is approx. 13 km far from CHARUSAT campus. The transportation facility was provided by CHARUSAT. The students and faculty were divided into the different groups. Each group of students was co-ordinated by the faculty members. The one group visited A. J. high school, Vaso where the students of RPCP displayed various

videos and explained them about the theme of the event. The other groups visited to the market area and to the residential area where they counseled and aware the village people about nutrition, hygiene and healthy lifestyle. They also distributed pamphlets among them. The faculty members also discussed with the people and solved their queries. The students were very happy and enthusiastic while this programme. The villagers expressed their positive response towards our activities and appreciated the initiative taken by CHARUSAT.

Summary of the Event:

Career Guidance and Counselling
- Equal Opportunity Cell

Date: 7/10/2016
CE/IT Seminar Hall

- The event was organized to help students to build their bright career.

On 7/10/2016, 11:10 am, students were invited for a talk regarding their career and future options which was given by Dr. Amit Ganatra. Nearly, 20 students attended the talk and took guidance from Dr. Amit Ganatra Sir.

Dhaval Bhoi, Assistant Professor, Equal Opportunity Cell CE Department Coordinator welcomed Dr. Amit Ganatra. The industry is blooming with opportunities if we have the correct skills. The thoughts of students were limited to either Placement or Post Graduate but not a clear and straight vision of it. Also, most of the students who were opting for placement were having a tendency to stay within Gujarat. Sir informed them about the perks of having a job outside Gujarat and showed us how beneficial it'd be to work in a location like Bangalore, Hyderabad or Pune where every 4^{th} or 5^{th} person belongs to the same field of work as their and how it could help in career growth.

Sir motivated students to appear for competitive exams like GATE to get a self-check on their technical skills. He informed students about job opportunities in government sectors and PSUs. Sir also motivated students to reach out for various internships which can help make our student resume strong. He added the importance of being a part of at least one Computer Society like CSI, IEEE or ACM and what charm it gives to resume.

Sir gave a brief on what difference does it make by having a post graduate degree from India and outside India, which was quite helpful. He talked about fellowship opportunities available at various universities abroad and their benefits. We had small talk about emerging technologies and future trends in Computer Engineering and thereafter the talk came to rest.

Mr. Dhaval Bhoi ended the session by thanking Dr. Amit Ganatra on behalf of all students. All were motivated and had a clearer vision of their future after the enlightening talk.

Registration fee (if any): No registration fees.

Essay Writing competition on the topic

“Equal opportunity for everyone: Where our country stands”

Report

Equal opportunity Cell (EOC), Charusat at Department of Civil engineering have organised an essay writing competition on the topic “Equal opportunity for everyone: Where our country stands”. Patel Priyanka Dipakbhai (ARIP) have secured the FIRST position and cash prize, Sreehari S Nair (EC, CSPIT) have secured second prize and Srishti Bhushan (RPCP) and Vishwa Mitulkumar Patel (EC-CSPIT) have shared THIRD position.
Dr. A.V Thomas, Head, Department of Civil engineering along with Dr. V.R Panchal and Dr. Prabhin Sukumaran have declared the result and distributed the certificates.

Event Report

Name of Department : Indukaka Ipcowala Institute of Management

Name of Event : **"Legal Education and Equality, Awareness about Legal Redressal and Conflict Resolution"**

Date and Time of Event : 12th Nov 2016 (02.30pm to 03.30pm)

Event coordinator : Ms. Reshma Sable, Mr. Binit Patel

Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1.	Mr. Joel Evans	Company Secretary, GMDC

Event Schedule:

Date	Time	Session	Activity
12-11-2016	02.30pm-03.30pm	Session on Legal Education and Equality, Awareness about Legal Redressal and Conflict Resolution	Session conducted with the help of live cases and supported by Article-14 of the Constitution of India.

Summary of the Event (Maximum 200 words):

The event started by introducing the students to the different legal provisions made for protection against any hazard to education right and equality rights. It further highlighted the content of Article-14. It focused on emphasizing Equality before law and the fact that any State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India Prohibition of discrimination on grounds of religion, race, caste, sex or place of birth. The session focused on advocating the phrases "equality to status and of opportunity" and "equal protection of laws". The session was fully based on interactions with students and dealing with their queries. Main focus of the session was on creating the awareness among students, regarding their rights and to know the ways to fight against injustice. Further the session also focused on delivering the inputs regarding the manners in resolving the conflicts whenever they happen.

In short the session was very delighting as it not only created awareness among students but also was successful in resolving their doubts about various issues of equality and Redressal mechanism.

NOTICE

Equal Opportunity cell (PDPIAS)

As part of Equal opportunity cell we have arranged an Orientation on "Competitive exam for B.Sc. Graduates"
Details of the Expert lecture are as follows

Date of event	23rd November, 2016
Time/duration of event	3.15 – 4.30 pm
Name of event	Competitive exam for B.Sc. Graduates
Venue	PDPIAS Conference Hall
Name of Resource person	Dr. Sushil Kajal, Principal, VPAS, SPU, Nadiad.

All the interested students are required to register themselves. For registration, EOC coordinators are requested to send the names of interested students to jankithakker.bt@charusat.ac.in

Janki N Thakker

Event Report

Name of Department : PDPIAS

Name of Event : Competitive exams for B.Sc. Graduates

Date and Time of Event : 3.15-4.30 pm Event coordinator : Dr. Janki N. Thakker Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1	Dr. Sushil Kajal, Principal , VPAS, SPU, Nadiad	Vinayaka Institute of Pure and Applied Sciences, SPU, Nadiad

Event Schedule:

Date	Time	Session	Activity
23/11/2016	3.15- 4.30	one	Expert lecture

Summary of the Event (Maximum 200 words):

Dr. Thakker, introduced the speaker to the participants.

Dr. Kajal briefed students about various competitive exams like Combined

biotechnology entrance exam (CBEE), Central Defense services entrance exam

CDSE (for IMA, Naval, Airforce), JAM etc which can be given by B.Sc. Students of Biological Sciences and Nursing. He also discussed various career options with students after B.Sc. He explained the importance of B.Sc. and how a B.Sc. graduate can contribute to society. He narrated many short stories to motivate students. Few questions were raised by students and Dr. Janki, which were answered by Dr. Kajal.

Dr. Kajal shared his email address and contact number for the students who wished to get more guidance

At the end Dr. Thakker thanked Dr. Kajal and students filled the feedback forms. After analysis of feedback forms, it indicated that

- Communications skills and knowledge was very good
- Most of the students found that everything in the talk was important
- Few students suggested that in future talks, we can include scope in foreign countries
- Most of the students found the talk to be very good and few of them found the talk to be excellent.

Registration fee (if any): NA

No. of Participants: 122

List of Participants: Details as per entered in Registration form is submitted to EOC coordinator

Accounts details: Rs. 1000 for lecture and Rs. 300 for Travel. Total Expense Rs. 1300 only

Overall impact of workshop: Very Good

ACCESS AUDIT REPORT

MANIKAKA TOPAWALA INSTITUTE OF NURSING (MTIN), CHARUSAT

ABOUT ACCESS AUDIT

- **Accessible India Campaign (Sugamya Bharat Abhiyan)** is launched by the Department of Empowerment of Persons with Disabilities, Ministry of Social Justice & Empowerment as a nationwide flagship campaign for achieving universal accessibility for persons with disabilities. In line with this campaign, ARIP team has conducted access auditing of the built Environment of MTIN for Persons with Disability and Elderly Persons.
- **ACCESS STANDARD:** "Harmonized Guidelines and Space Standards for Barrier Free Built Environment for Persons with Disabilities and Elderly Persons" 2016 by Ministry of Urban Development are sited.
- **DATE OF AUDIT:** 10th February 2017
- **ACCESS AUDIT DONE BY:**
    1. Dr. Garima Gedamkar, Assistant Professor, ARIP
    2. Students of 8th Semester BPT, ARIP
- **ACCESS AUDIT REPORT PREPARED BY:** Dr. Garima Gedamkar (PT), Assistant Professor, ARIP

INDEX

Serial No.	Title
1.	Introduction
2.	Executive summary
3.	Access audit check list
4.	Observations and Recommendations

1. INTRODUCTION

NAME OF THE BUILDING: Manikaka Topawala Institute of Nursing

BUILDING TYPE AND USE: Educational Building

ADDRESS: CHARUSAT Campus, Gujarat State Highway 139, Anand, Gujarat- 388421

Manikaka Topawala Institute of Nursing (Formerly known as Charotar Institute of Nursing) established as a constituent of CHARUSAT in 2009. MTIN is committed to provide a qualitative nursing education with advance knowledge, skills and caring heart, which will be responsible for nation's prosperity with a humanistic approach and maintain a high standard of professional care at all times to meet the needs of changing society through continuing education and contribution to professional growth.

2. EXECUTIVE SUMMARY

MANDATORY IMPLEMENTATION:

1. Accessible parking in the building premises.
2. Ramp and/or lift inside the building
3. Handrails on both sides of ramp and stairs at recommended height and painted in contrast color.
4. Accessible drinking water unit on all floors.
5. Accessible toilets on all floors.
6. Controls and operations - height between 600-1100 mm
7. Appropriate signage and international symbol of accessibility should be clearly marked
8. All signage should be multi lingual, tactile, and simple.
9. Emergency evacuation measures needs to be updated per the guidelines provided.

3. ACCESS AUDIT CHECK LIST

1.MAINENTRANCE	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the main entrance of the building accessible?	✓			
▪Are there any steps at the entrance?	✓			
▪Do the steps have a handrail?	✓			
▪Are there handrails on both the sides?		✓		
▪Is there a ramp?	✓			
▪Does the ramp have a railing?	✓			
▪Are there handrails on both the sides?	✓			
▪Is the clear door width at least 1000 mm?			✓	
▪Can the entrance door be operated independently?			✓	
▪Is the height of the door handle between 800 mm and 1000 mm?			✓	
▪Does the accessible entrance permit access to an elevator?			✓	
▪Is the accessible entrance clearly identifiable?	✓			
▪Is the landing surface non-slippery?	✓			

2.RAMPS	YES	NO	NOTAPPLICABLE	REMARKS
▪Is there a ramp next to the stairs?	✓			At entrance only, not inside the building
▪Is the location of the ramp clearly identifiable?	✓			
▪Is the ramp gradient no steeper than 1:12?		✓		
▪Is there a landing of at least 1500mm x 1500mm, at 9m intervals provided?			✓	
▪Is there a landing at every change in direction?			✓	

▪Is there landing at the top and bottom of every ramp?	✓			
▪Is the minimum width of the ramp 1500 mm?		✓		
▪Are there continuous handrails, on both sides, at a height between 760 mm– 900 mm?		✓		
▪Is the surface of the ramp non-slip?	✓			Grating present
▪Is there an edge protection on both sides ofthe ramp?	✓			

3.PARKING	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there accessible parking facilities?	✓			
▪Is the number of accessible parking spaces sufficient?		✓		
▪Are the designated spaces wide enough 3600mm x5m?			✓	No designated space
▪Are accessible parking spaces marked by the international symbol of accessibility?		✓		
▪Accessible parking spaces are not misused or used by non-disabled people?			✓	
▪If the drop-off area has a kerb, is there a kerb ramp leading to the pathway?			✓	
▪Is the drop-off area marked by signage?			✓	
▪Is there an accessible path of travel form the drop-off area to the main entrance?			✓	

4.RECEPTION&INFORMATION COUNTERS	YES	NO	NOTAPPLICABLE	REMARKS
▪Are the counters easily indefinable?			✓	
▪Is the counter at two height?			✓	
▪Is a part of the counter lowered to accessible height of 800 mm?			✓	
▪Is a loop induction unit installed at the counter?			✓	

▪Are there tactile pictographic maps of the building near the counter?			✓	
▪Is the counter well illuminated?			✓	

5.DOORS	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there any automatic doors at the entrance?		✓		
▪Can the doors be operated without much effort?		✓		
▪Do automatic doors have sufficient long opening intervals?			✓	
▪Are push buttons for automatic doors located at a maximum height of 1m?			✓	
▪Is there sufficient space beside the latch side of the doors(450-600mm)?		✓		
▪Are accessible door placed adjacent to the revolving doors and turn stiles?			✓	
▪Are glazed doors marked with a colour band at eye level?		✓		
▪For double leaf doors, is the width of one of the leaves at least 1m?		✓		
▪Do doors fitted with spring closers have an extra pull handle?			✓	
▪Is manual door accessories/ hardware (handle, lock pull etc.) 800mm?		✓		

6.CORRIDORS	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the minimum unobstructed width of corridors at least 1500 mm?	✓			
▪Does the corridors width allow manoeuvring through doors located along its length?	✓			
▪Are differences in level, bridged with by ramps or lifts?		✓		

▪Can a sightless person with a cane detect all protruding objects with in the corridor?		✓		
▪Are all over hanging obstructions mounted above a minimum height of 2200mm?		✓		
▪Can a person with low vision, identify all obstacles in the corridor?	✓			

7.LIFTS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is there an accessible path leading to the elevator?			✓	
▪Is the clear door opening width 1m or more?			✓	
▪Are the minimum internal dimensions of the elevator 1500mmx1500mmminimum or having 13 persons capacity?			✓	
▪Is the height of the call button (outside the lift) between 800 mm– 1m, from the floor level?			✓	
▪Is the control panel placed at a height between 800mm– 1m, from the floor level?			✓	
▪Is there an audio and video system installed in the lift Indicating arrival at a floor?			✓	
▪Are there Braille/raised numbers on the control panel?			✓	
▪Is the elevator provided with a handrail on the three sides?			✓	
▪Are the handrails mounted at a height between 800 mm and 1m?			✓	
▪Is the elevator door easy to identify?			✓	
▪Is the emergency intercom provided inside the elevator?			✓	
▪Are there tactile or Braille instructions for the communication system?			✓	
▪Is the emergency intercom usable without the voice communication?			✓	
▪Is the door opening/closing interval long enough?			✓	
▪Isthefinishoftheelevatorfloor skid-resistant?			✓	

8.STAIRS	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the minimum width of the stairs 1200mm?	✓			
▪Are there continuous handrails, on both sides, at a height between 760mm-900mm?		✓		
▪Is the handrails installed in the centre of the stair width, which is more than 3mwide?			✓	
▪Is the landing length not less than 1200mm?	✓			
▪Are the step edges of a different colour or texture easily identifiable by low-vision& vision impaired persons?		✓		
▪Are there warning blocks installed at the beginning and end of all flights?		✓		
▪Is the location of emergency (fire escape)stairs clearly identifiable?			✓	
▪Does the height of the risers is 150mm maximum &t read 300 mm minimum?	✓			
▪Do treads have a non-slip surface?	✓			
▪Are the risers having open gaps in the steps?		✓		

9.HANDRAILS	YES	NO	NOTAPPLICABLE	REMARKS
▪Are handrails mounted at a height between 760mm–900 mm?		✓		
▪Are handrails easy to grip?	✓			
▪Are handrails securely attached?	✓			
▪Do handrails extend horizontally 300mm at the top and bottom of every stair case or ramp?		✓		

▪Are the ending of the handrails grouted in the ground or turn downward?	✓			Except at entrance
▪Is the space between the handrails and the wall no less than 50mm?	✓			
▪Are the handrails painted in contrast colours to be easily indefinable?		✓		
▪Are there tactile strip/Braille plates identifications on the handrails for emergency stairs & floor levels?		✓		

10.TOILETS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are there accessible toilets for Persons with Disabilities?	✓			
▪Are the toilets easily identifiable?		✓		
▪Istheresufficientspaceof2mx 2.2m inside the toilets to manoeuvre a wheelchair?		✓		
▪Are water closet (WC) and bidets mounted at a height between 450mm– 480mm?		✓		
▪Is the space between the WC and the closest adjacent wall, fitted with a grab bar is between 450 mm– 500mm?			✓	
▪Is the accessible washbasin mounted at a height between 750mm– 850mm?	✓			
▪Is the lower edge of the mirror positioned at a height not exceeding 1m?	✓			
▪Are the accessible showers provided with a folding seat?		✓		
▪Are the grab bars installed near WC and showers at a height between 750 – 850mm?		✓		Grab bars notprovided
▪Do grab bars have a diameter of 38 mm?			✓	
▪Do wall mounted grab bars have knuckle space 50 mm?			✓	
▪Are grab bar non slippery?			✓	
▪Can the grab bars withstand the load of 200kg minimum?			✓	

▪Are faucets easy to grip and operate with one hand?	✓			
▪Are shower fixtures with at least 1500 mm long hoses?			✓	
▪Are hot water pipes insulated or covered?			✓	
▪Is the toilet equipped with an emergency alarm system?		✓		
▪Can doors be locked from inside and releasable form outside under emergency situations?		✓		

11.CANTEEN	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is the eating outlet accessible for PwD's?			✓	
▪Is there a circulation path of at least 900mm wide to allow a wheelchair user to move around the eating outlet?			✓	
▪Are the cash and service counter height below 800mm?			✓	
▪Is the table accessible with a height of 750mm to 850mm and knee space of 750mm wide and 480mm deep?			✓	
▪Do the table with fixed stools have accessible spaces for wheelchairs?			✓	

12.DRINKING WATER	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is the Water tap accessible?		✓		
▪Can it be easily manoeuvred by a person with poor hand function?	✓			
▪Is the area dry?	✓			
▪Are glasses provided?		✓		

13.SIGNAGES	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**

▪Are accessible spaces identified by the international symbol of accessibility?	✓			
▪Are there directional signs indicating the location of accessible facilities?	✓			
▪Are maps, information panels and wall-mounted signs placed at a height between 900mm and1800mm?		✓		1900mm
▪Are signs clear, simple and easy to read?	✓			
▪Is the colour of signs clearly distinguishable?	✓			
▪Is the surface of the sign processed so as to prevent glare?	✓			
▪Is the sign supplement by a text in embossed letters or in Braille available next to information signs?		✓		
▪Is the lettering size proportional to the reading distance?				Could not assess

14.EMERGENCYEXITS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are emergency exits clearly marked with directional arrow signs?		✓		

15.PUBLICTELEPHONES	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are there public telephones accessible to wheel chair users?			✓	
▪Is there atleast one telephone in the building equipped with a loop induction unit?			✓	
▪Are the numerals on the telephone raised to allow identification by touch?			✓	
▪Is there proper signage directing to the public telephone?			✓	

▪Are the heights of the operable parts of the telephone between 800mmand 1m?			✓	
▪Is there a clear knee space of 750mm?			✓	

16.RESTINGFACILITIES	YES	NO	NOTAPPLICABLE	REMARKS
▪Where there are large spaces, are resting facilities provided at 30 meters of intervals?		✓		
▪Is there an adjoining space for a wheelchair next to benches and public seats?		✓		
▪Are public seats with height of 450-480mm?		✓		370mm
▪Are knee spaces at accessible tableswithaheightof750mm and knee space of 750mm wide and 480mmdeep?			✓	

4. OBSERVATIONS & RECOMMENDATIONS

4.1MAIN ENTRANCE

OBSERVATIONS	RECOMMENDATIONS
1. The accessible entrance is clearly identifiable 2. Brown colour mat is placed at the entrance 3. The landing surface is non-slippery 4. There is no door at the entrance 5. It has no tactile guiding path including directional, hazard warning and positional tiles directing from the entrance till inside the building 6. There is no accessible identification signage to identify the accessible entrance	1. There should be no obstacles on the floor such as floor mats 2. It should have a tactile guiding path including directional, hazard warning and positional tiles directing from the entrance till inside the building 3. There should be accessible identification signage to identify the accessible entrance 4. Signage at the entrance should be multi lingual and tactile

STEPS

OBSERVATIONS	RECOMMENDATIONS
1. There are three steps at the entrance 2. There is no color contrasting strip at the edge of the stairs 3. Hand rail is installed on right side only 4. The handrail of main stairs does not project beyond the end of the flight and curve back in accordance with section on handrails	1. There should be a color contrasting strip at the edge of the steps/stairs 2. The steps should have handrails on both sides that should be continuous on the landing 3. Height of handrails should be between 760 mm- 900 mm 4. Handrails must extend 300 mm at top

5. Height of handrail= 960 mm 6. No warning blocks at beginning and end of stairs	and bottom of stairs 5. Install warning blocks at beginning and end of the stairs
RAMP	
OBSERVATIONS	**RECOMMENDATIONS**
1. There is a ramp at the main entrance 2. The location of the ramp is clearly identifiable 3. Ramp gradient is more than 1:12 4. Ramp width= 1390 mm 5. Grating is present 6. Handrails are provided on both side of the ramp but not continuous on the landing 7. Height of handrails= 330 mm-990 mm	1. Increase ramp width to minimum of 1500 mm 2. Adjust the height of handrails (between 760 mm- 900 mm) 3. Handrails must extend 300 mm at top and bottom of ramp 4. Handrails should be continuous on the landing
HANDRAILS	
OBSERVATIONS	**RECOMMENDATIONS**
1. Handrails have been provided on both side of the ramp and right side of steps 2. Handrails of ramp and stairs are securely attached 3. Handrails of ramp are circular and non-slippery 4. Handrail is not in contrast color 5. Handrail neither extend beyond the steps/ ramp nor turned downwards	1. Handrails should be provided on both sides of the stairs 2. Handrails should be provided at the height of 760 mm and 900 mm 3. The handrails should extend horizontally 300mm at the top and bottom of steps& ramp 4. Handrails should contrast in color from the background wall and the floor 5. The end of the handrail should be either grouted or turned downwards 6. There should be at least 50mm hand clearance between the wall and the handrail
4.2 RAMP	
OBSERVATIONS	**RECOMMENDATIONS**
1. There is no ramp provided to access different floors 2. No provision in future	Not applicable
4.3 PARKING	

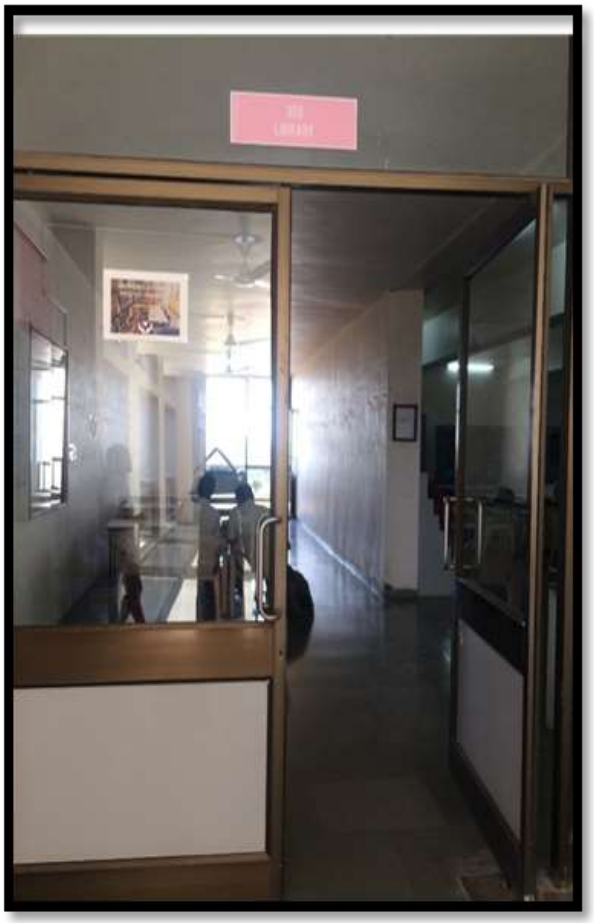

OBSERVATIONS	RECOMMENDATIONS
1. There is parking space provided but the distance is more than 30m from the accessible entrance. 2. There is no parking lot available for visitors and staff within 30m 3. There are no accessible parking bays reserved for persons with disabilities 4. The parking provided has no shelter 5. There is no tactile floor guidance. 6. There is inadequate artificial light in the outside parking after sunset 7. No signage provided.	1. There should be a parking lot available for visitors and staff within the campus 2. There should be sufficient accessible parking bays reserved for persons with disabilities 3. The size of the bay should be 3600mm x 5000mm 4. The parking bay should have firm and leveled surface 5. Parking should be located within 30m from the accessible entrance 6. There should be a drop off point for persons with disabilities next to the accessible parking 7. Minimum accessible route width should be 1200mm 8. There should be a tactile floor guidance including directional, hazard warning and positional tiles in the parking area for independent mobility for persons with blindness and low vision specifically routes guiding from parking area to entry points of buildings, emergency exits 9. Appropriate signage and international symbol of accessibility should be

	clearly marked 10. Car parking at entrance must have height clearance of minimum 2400 mm 11. At least 2 accessible parking for every 25 car parking 12. Signage of the parking at the entrance gate should be multi lingual and tactile 13. The accessible parking spaces should be marked by international symbol of accessibility

4.4 RECEPTION & INFORMATION COUNTERS

OBSERVATIONS	RECOMMENDATIONS
1. Not available	1. Not applicable

4.5 DOORS

OBSERVATIONS	RECOMMENDATIONS
1. The glazed doors are not marked with the colour band at eye level 2. Door handle type is D-shape 3. Resistance to open the doors is more (Room no. 108, 109, 110, 201, 302, 303, terrace door) 4. Double leaf doors- width of one leaf is < 1m 5. Door accessories (handles, lock etc.) are	1. Mark the glazed doors with colour band at eye level 2. Reduce the resistance to open the doors 3. Increase the width of the leaf of doors (which is frequently used for opening) to at least 1m 4. Readjust the door accessories at height lower than 800 mm

placed at a height more than 800 mm (Room no. 101, 103, 105, 106, 107, 108, 109, 110, 201, 202, 203, 204, 205, 206, 206A, 207, 301, 302, 303, 306, 404, administrative office, terrace door, sports room) 6. Door handle is not fastened tightly 7. There is inadequate space available to open the door by a wheelchair user from inside	5. Fasten the door handle tightly (Room no. 303) 6. Adjust the benches in the lecture hall to provide adequate space to open the door by a wheelchair user from inside
4.6 CORRIDORS	
	
	
OBSERVATIONS	**RECOMMENDATIONS**
1. The corridor width is appropriate	1. Make the floor even or mark the dip

2. The corridor width allows maneuvering through doors located along its length 3. There is difference in level of the floor 4. There are no tactile warning blocks at level differences 5. The doors are not opening in the corridor 6. The floor finish is non-slip, non-reflective and without any heavy patterns 7. The corridor is well illuminated 8. The clear circulation space in corridors are kept free of unwanted barriers 9. No tactile floor guidance in the corridor 10. Overhanging obstructions are at a height between 1400 mm to 1510 mm	with contrast colour tape 2. There should be no protruding elements such as display boards, notice boards, control panels, switch boards in the pathway below a clear headroom of at least 2200 mm 3. There should be tactile floor guidance in the corridor for independent mobility for persons with blindness and low vision specifically routes guiding from corridors to the various of rooms, emergency exit 4. There should be accessible directional signage directing to various building facilities like toilets, drinking water fountain, emergency exits etc in the corridor
4.7 LIFT	
OBSERVATIONS	**RECOMMENDATIONS**
1. There is no lift provided to access different floors 2. To be built in future	1. There should be a lift that connects all floors of the building. Probable location can be in the landscaped court adjoining entrance lobby. 2. It should have a step free access from the entrance to the lift 3. The door should be easy to identify 4. The clear door opening width should be 1m or more 5. The minimum internal dimensions of the elevator should be 1500 mm x1500 mm minimum 6. The finish of the lift floor should be skid-resistant 7. The floor finish of the car should be non-slippery 8. There should be handrails on both the sidewalls and the rear wall of the lift car 9. The Lift handrails should be mounted at a height between 800 mm and 1m 10. There should be no level difference between the landing and the lift 11. Horizontal gap between the lift and the landing should be no more than 12 mm 12. There should be a landing 1500 mm x 1500mm in front of the lift 13. There should be signage directing to the accessible lift

	14. There should be floor number and floor directory signage on the lift lobby which should be visible from all lift cars 15. The lift control panel should have buttons and not a touch panel. 16. The elevator controls in the lift (including alarms /speakers/phones) should be between 800mm to 1000mm 17. The walls of the car should be non-reflective 18. A rear mirror should be present in the car 19. The lift should have a live attendant when required and always for public buildings with a heavy footfall 20. Control panel should have a good contrast and buttons should be self-illuminating, in raised numbers and Braille 21. There should be an audio and video system installed in the lift indicating arrival at a floor 22. There should be Braille/raised numbers on the control panel 23. The emergency intercom should be provided inside the elevator 24. The Emergency information given inside the lift car should be mounted at eye level and should be in both tactile and Braille format 25. The emergency intercom should be usable without the voice communication 26. There should be accessible identification signage to identify the elevators 27. Signage should be multi lingual and tactile 28. All signage should be simple, clear and easy to read
4.8 STAIRS	

	
OBSERVATIONS	**RECOMMENDATIONS**
1. There are two staircase blocks present in the building 2. The risers of stairs are mm high and tread are mm wide 3. There is no contrast between rise and tread of steps 4. There is no color contrasting strip at the edge of the stairs 5. Handrails are installed on one side only 6. The handrail of stairs does not project beyond the end of the flight and curve back 7. The handrail starts at second step 8. Height of handrails vary between 980 mm to 1200 mm 9. There is insufficient illumination on the main stairs 10. The floor surface of the steps/stairs is non-slippery and non-glary 11. Stairs are uniform in width 12. No warning blocks at beginning and end of stairs	1. Adjust the height of handrails between 760 mm- 900 mm 2. The handrails should project beyond the end of the flight and curve back in accordance with section on handrails 3. There should be a color contrasting strip at the edge of the stairs 4. Install warning blocks at beginning and end of the stairs

4.9 HANDRAILS

OBSERVATIONS	RECOMMENDATIONS
1. Handrails have been provided on one side of the stairs 2. Securely attached 3. Circular and non-slippery 4. Extent of handrails is not proper 5. Contrast colour is not used	1. Handrails should be provided on both sides of the stairs 2. Handrails must extend 300 mm at top and bottom of stairs 3. Handrails should contrast in color from the background wall and the floor 4. There should be at least 50mm hand clearance between the wall and the handrail

4.10 TOILETS

	
OBSERVATIONS	**RECOMMENDATIONS**
1. Accessible toilets are only on the ground floor 2. Not easily identifiable 3. Direction of door opening is inside 4. Doors have D-shaped and knob type handles 5. Insufficient space to manoeuvre a wheelchair inside toilet 6. Doors can be locked from inside but not releasable from outside under emergency situations 7. There is no color contrast between the floor, wall and sanitary fittings 8. Not designed appropriately for disabled 9. The accessible washbasin is mounted at a height 830mm 10. Mirror is present in accessible toilet 11. Flush is behind the seat 12. No grab bars 13. No emergency alarm system provided	1. Accessible toilets should be present on all floors of the building in ladies and gents block 2. The toilets should be easily identifiable 3. The wash basin should have lever type taps 4. Install horizontal grab bars inside the toilet at a height of 200mm from the WC seat 5. The grab bars should be installed near WC at a height between 750 – 850 mm 6. Grab bars should be non-slippery 7. There should be an alarm system within easy reach to alert persons outside, in case of emergency 8. There signage using the international symbol of accessibility to identify the accessible toilets
4.11 CANTEEN	
OBSERVATIONS	**RECOMMENDATIONS**
1. Not available inside the building	1. Not applicable
4.12 DRINKING WATER	

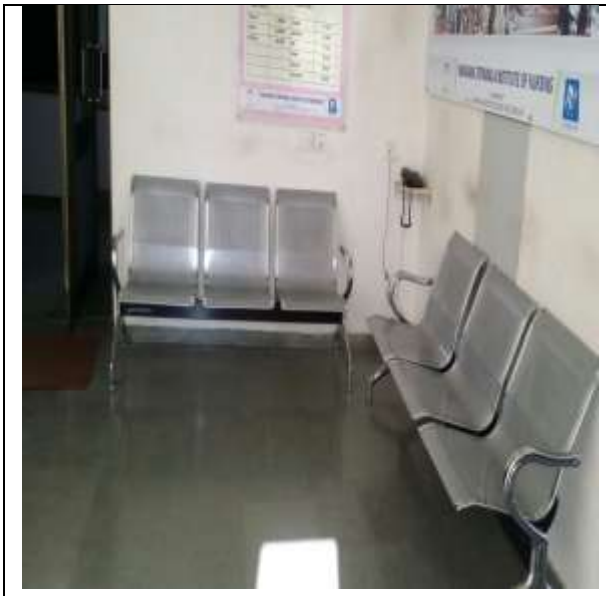

OBSERVATIONS	RECOMMENDATIONS
1. The drinking water facility is not easily accessed by persons with disabilities 2. There is no sufficient maneuvering space in front of drinking water area at ground floor 3. The drinking water fountains are located at both end of the corridors 4. Area is not always dry 5. Tap is not of lever type 6. Glasses are not provided 7. Tap is not of lever type	1. There should be sufficient maneuvering space in front of drinking water fountain 2. Water tap should be accessible for all 3. The tap should be of lever type 4. Provide at least 3 glasses 5. Glasses should be kept at accessible height not higher than 1200mm 6. There should be identification signage to identify the drinking water fountain

4.13 SIGNAGES

	
OBSERVATIONS	**RECOMMENDATIONS**
1. Signage is provided in English 2. No other signage 3. Height varies between 1470mm-2370mm	1. There should be no signage protruding outside the wall below clear headroom of 2200mm 2. All signage should be multi lingual and provided in English, Hindi and local language 3. Supplement by a text in embossed letters/ Braille 4. All Braille and tactile signage placed between the height of 900 mm and 1500mm, with ideal location at 1050 mm above the finished floor level
4.14 EMERGENCY EXIT	
OBSERVATIONS	**RECOMMENDATIONS**
1. Fire extinguishers are mounted on the wall at the height lower than 1000mm 2. No emergency exits identified 3. Evacuation plans displayed are not appropriate for persons with disability.	1. The emergency evacuation provision should consider people with disabilities 2. There should be a step free or ramped accessible evacuation route identified leading to the exit or the ramp or to the refuge area 3. The emergency exits should be clearly marked with directional arrow signs 4. The fire extinguishers should be fixed at the height between 1000mm and 1500mm 5. The alerting system should be provided, both visual and audible

	6. The alerting buttons should be between 600 mm and 1200mm from the floor and have a high contrast with the background wall 7. A refuge area identified should be signposted for wheelchair users 8. There should be a directional signage leading to the refuge area and the evacuation plans have the refuge area marked on them 9. All emergency and directional signage should be accessible 10. There should be an audio and visual two way communication system in the refuge area at the height of 1000mm 11. Evacuation plans should be prominently displayed on all floors 12. The evacuation plans and building maps should be available in tactile Braille formats 13. The accessible evacuation route and the refuge points should be shown on the plan 14. The plan should have 'you are here' point identified on it 15. The plan should contrast well with the background wall 16. The Staff should be trained to assist persons with disabilities in evacuation 17. There should be evacuation chairs available 18. There should be smoke barriers around the refuge area that can hold the smoke for at least one hour
4.15 PUBLIC TELEPHONES	
OBSERVATIONS	**RECOMMENDATIONS**
1. Not available	1. Not applicable
4.16 RESTING FACILITIES	

	
OBSERVATIONS	**RECOMMENDATIONS**
1. Available outside the Principal's office 2. Not available at 30 m interval of corridors 3. Height of chairs- 370mm	1. Recommended height of chairs is between 450-480 mm 2. If possible, provide chairs of appropriate design at every 30m interval

Event Report

Name of Department: Manikaka Topawala Institute of Nursing

Name of Event : Health awareness on AIDS

Date and Time of Event : 30/01/2017

Event coordinator : Ms. Alpna N. Patel

Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1.	Dr. R. R. Fulmali	**District TB Officer** District TB center, Petlad, Dist- Anand

Event Schedule:

Date	Time	Session	Activity
30/01/2017	10.30am to 12.30pm	Expert session on Health awareness on AIDS	Expert session on Health awareness on AIDS

Summary of the Event (Maximum 200 words):

Report

We MTIN organized an Expert session on Workshop/Expert session on "***Health awareness for students on AIDS"*** on 30th January, 2017 at MTIN auditorium. We have invited 01 expert from outside to deliver their expertise on this theme. The participants were nursing students, nursing teachers. 1st & 2nd 3rd year General nursing & midwifery students & 1st year B.Sc. Nursing students from MTIN. 93 nursing students were participated from MTIN, 07 Nursing faculties were participated in expert session. Total 100 delegates were participated in this expert session. The registration was started at 10.00am 0n wards & sessions was started at 10.30 am & end at 12.30pm.

The session about theme and its importance was delivered by Mrs. Alpna Patel. Moreover, She also introduced about EOC, MTIN & todays guest to all.
Mr. Anil Sharma, Principal MTIN welcomes the speaker with flowers as a token of love & appreciation.

The session was delivered by Mr. R. R Fulmali sir, District T.B. Officer, District T.B. center, Petlad, Anand. He acquired his Degree in Bachelor of Medicine and Bachelor of Surgery, Doctor of public health, & AHA. He is having more than twenty years of experience in medical field. He explained on AIDs. He explained about what is AIDS, worldwide & state wise statistical data related to AID, causes, clinical symptoms, diagnostic evaluation, precaution to be taken, treatments, prevention of AIDS.
He is also explained about Tuberculosis with AIDS & AIDS with tuberculosis because this both diseases are vice versa. He explained in details about 99 dots especially for these condition patients. How this is helpful to patients & health workers
Overall the session was interesting; knowledgeable. The expert appreciates effort to organize this session.

Registration fee (if any): No registration fees.

No. of Participants: 100

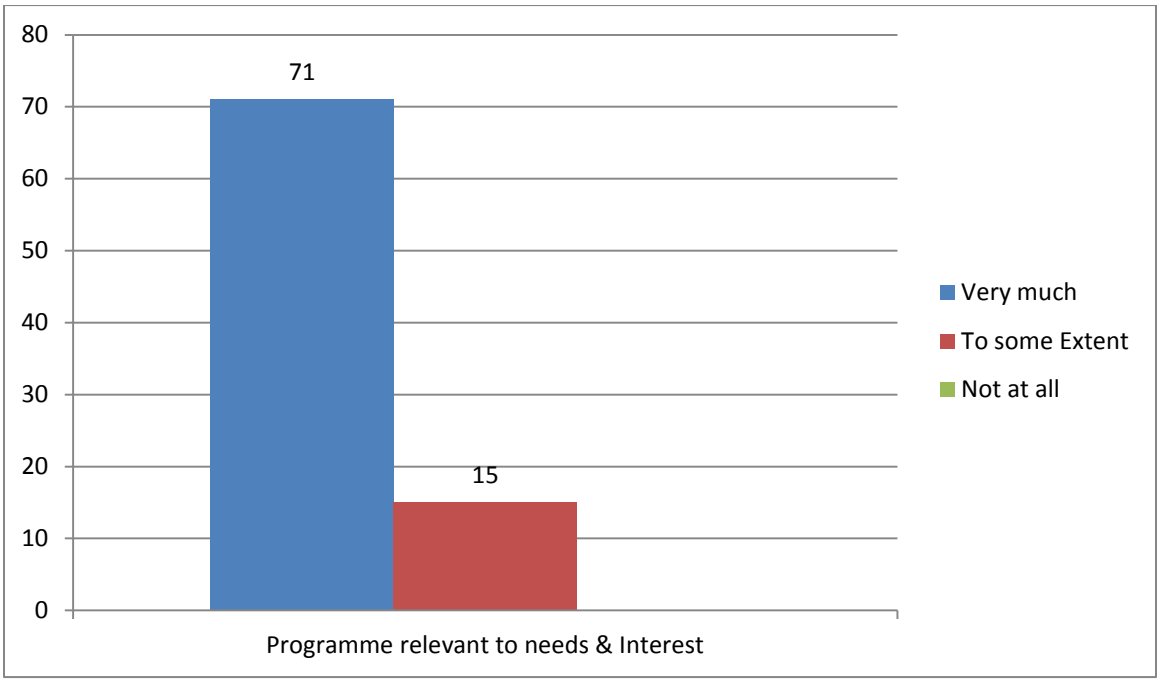

Accounts details:

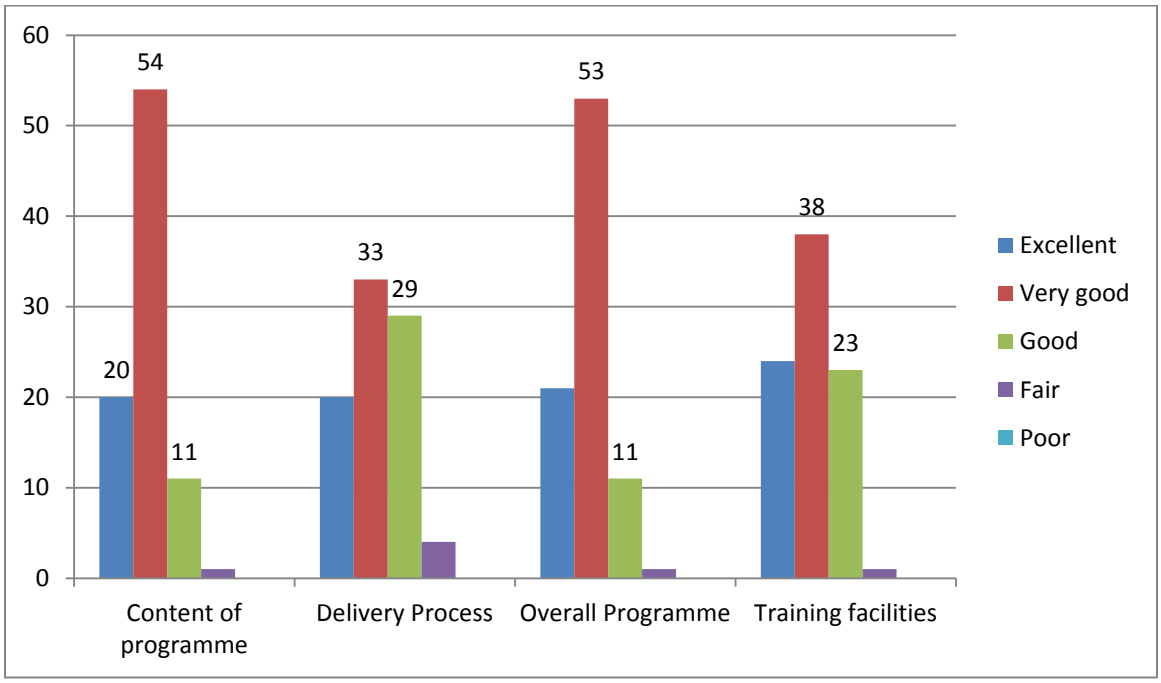

Sr. No.	Details	Rupees
Income		
1.	CHARUSAT, Changa	19000/-Rs.
Expenses		
1.	Expert remuneration & Petrol allowance	2500/-
2.	Banner	500/-
3.	Bouquets	50/-
4.	Certificates	1000/-
Total	**Four thousand fifty rupees**	**4050/-Rs**

Overall impact of workshop: Very Good

Dear Sir

Under the aegis of Equal Opportunity Cell (EOC), CHARUSAT, Department of Information Technology , has arranged Paragraph writing competition (Views on effect of Demonetization With Suitable Slogan) , In this competition we have received entries from various departments , As per our conversation related to assess the paragraph, here i attached the file which consist of participation entries , kindly assess all the paragraph and select best paragraph out of this .

please find the guidelines and judging criteria

for any query please contact me

Guidelines :

- Paragraph should correspond to the Effects of Demonetisation
- Your words cannot be exceed more than 2000 words
- Preferably relate to Demonetisation in India
- Slogan must include the words, “Demonetisation”
- Submission Must via Online, No printed copy will be accepted.
- No entry will be considered after 24th January , 2017 11.59 p.m.

Judging Criteria:

Areas	Percentage
Effects : Positive or Negative	25%
Uniqueness of Paragraph	45%
Slogan	30%

effects of demonetisation.docx
31K

Name : Malav Desai	IDNO : 15IT019

Effects of Demonetization :

â€œLike chemotherapy for cancer, Demonetisation was required to curb black moneyâ€• says Venkaiah Naidu (Minister of Information and Broadcasting), but does Mr. Naidu know that chemotherapy fails 97% of the times it is used for fighting the cancer-causing cells. The same thing is happening with Demonetisation in India, Rs 14.38 lakh crore out of Rs 15.42 lakh crore are deposited in banks till date (Source: hindustantimes). Has the government really succeeded in curbing the black money in our nation? The numbers above tell a different story. Demonetisation has had almost no effect on the rich and upper middle class of the society, itâ€™s the lower middle class and poor who have suffered the most. Many stood in line in front of banks, young and old, practically the whole day from sunrise to sunset before getting a handful of their own money. They had to repeat the tiresome act day after day for the small amount. In the end, dejection, heart attack, despair, suicide has befallen the unfortunate. The black money hoarders have escaped the Demonetisation and have got their money safe in banks, itâ€™s the poor who now have to face whatever comes in their way.

Slogan :

the rich gets richer and the poor gets poorer

Name : Deepali D Patel	IDNO : D14ce148

Effects of Demonetization :

Pros: The Move will help India economically. Iâ€™ll explain you why. Till now an approx. of 65,250 crore worth of black money has been recovered. This money will be used to lift up India economically and the government politically. Well you guys might be thinking what if the govt. is not that loyal and keeps some amt. to itself or uses some of it for personal benefits, guys if so the govt. would not have taken the move in the first place.
This move will also help India revolutionize digitally. The poor who till now have not open bank accounts will move towards it, people will make use of plastic money, also for those who donâ€™t have an internet connection has a way to transfer money using a number provided by the government also PayTM has announced a toll free number to make payments offline. Forcing business to use the plastic money and digital payment will make them pay tax where only 5% of the Indian workers pay actual true income tax, only 15% of the Indian economy is reflected in the tax net and our tax-GDP ratio of 17% is 5 points less than other countries.

Slogan :

Be Patient; Demonetization is like finding lots of needle from a bunch of haystacks!

Name : Hetal Patel	IDNO : 16pgce017

Effects of Demonetization :

"Demonetization effect, the ground topic is after all currency. One need to know the currency system first. Then will able to see the negative side of Demonetization. It's a new scam you will get to know at the end. Let's divide the system in parts. It's purposely made complicated. Will try to simplify. It start from election, the fake promises, spending more money than country's income technically called ""DEFICIT PENDING"". Now to fulfill those promises gov needs money too. They borrow some money from country's treasury by issuing
a bond. Bond is a I.O.U. basically a simple paper which say gave me 1 arab will gave you in 10 years with interest. These bonds are National Debt. The payer are us. The bonds are just to make better present destroy future. Second thing is Treasury auction those bond to the bank. Bank goes to Federal Reserve System. Talking about Fed it's a private corporation owned by stakeholders who got 6% dividend mostly stakeholders are bank owner. The actual balance is zero of Fed. They just provide a cheque or I.O.U. With this money bank again buy another bond, cycle repeats. Actual deal is between treasury and Fed, bank's are just middle man who got commision on each deal. Now gov spends this currency on public war,program and people. People deposit their money in bank. Policy of bank is if you deposit 100$,the bank will only have 10$, with 90$ they can legally do anything like stake gambling or loan because all banks work on Fractional Reserve Banking. The money they kept in this case 10$ called as Walt Money. In a country now 190$ exists. The 100$ you see in account are I.O.U basically a digital number in computer. Bank provide loan by this extra money. . Because of these supply of money increases and the value of the money decreases. That's
the main cause of inflation. Bank are actually not safe in 20% of population got to the bank they would be out of cash. The excess money in this digital world created by the bank only. Can say that it only have a negative impact. Today's monetary system is unconstitutional, theft of prosperity, libearty. Our purchasing power reduces because of inflation. Because of not using the real money, people who actually work hard pay taxes became slave who stood in those queue at ATM, which is worthless. In future National debt will increase it's a burden on people like us only.
"

Slogan :

Mostly negative but cashless system is real gold

Name :	IDNO :
Milap Parmar	14CE076

Effects of Demonetization :

"On November 8th 2016, PMO made a Blunt and risky move of turning down the high value currency from the Indian market.Demonitisation has surely shrinked the black economy while affecting all India's 1.3bn citizens, the poorest most of all.Demonitisation has directly hit trade and consumption. Consumption makes around 56% of India's GDP, as not much cash flow is available a drop in GDP will be seen. Many have militated this move. Demonitisaion has the potential to raise government revenue and encourage bank lending and thus a large amount would be subtracted from RBI's liabilities. Demonitisation indeed has a positive effect because a lot of money that was operated in shadow economy will now be a part of banking structureand as of this bank will have lot more money to support the economy. The banks were struggling because of non-performing assets and now will have more money to lend for agriculture, infrastructure and social sector, as also for trade and industry. Even the private sector investors which were so far lacking behind will now get back into the economy."

Slogan :

"Cash was the new trash after DEMONITISATION

Black money was PMO's perfect PRIORITISATION"

Name : Ajay Agrawal	IDNO : D15CL150

Effects of Demonetization :

As, we know that the govt. have sanctioned a effective step towards black money, terrorism, fake currency, cashless transactions and many more by demonetizing 1000 and 500 rs notes. This step by govt. leads to merits and demerits equally which are faced by normal public resident in this country. due to this demonetization many of the fake notes circulating in the market is now just a piece of paper, black money holders are having problems to renew there old currency to new one due to non taxed money, the notes which were supplied to communist or communal terrorist is totally vanished. Demerits of this demonetization is the rate of fall of GDP of the country from past few years, inconvenience to local resident public to change their money, Trade of locals like merchant shops, market shops, small and large scale industries etc are affected, miscellaneous demerits like emergency, agricultural aspects, occasions etc are also inversely and directly affected. Thus, according to my view new beginning of anything has its on merits and demerits which can be resolved my measures and effective planning.

Slogan :

" Every good thing takes time to come in existence"

Name : Borad Fenil R	IDNO : 15CL007

Effects of Demonetization :

The first impact shall be that people will have lower expenditure power. with that they will not be able to purchase luxurious things. There shall be no ostentatious expenditures on marriages and other ceremonies. So the society will grow lesser materialistic and people more prudent. with the fake money destroyed, the economy will see a big boom and the so far booming real estate sector shall fall on the ground. The things shall be cheaper. The currency shall get respect at the international market. There shall be a great check on the terror- related funding and therefore on terrorist activities. Corruption shall be down to a great extent as people will stop the tendency of accumulating money using wrong means. It will abridge the gap between the haves and the have nots. However, there may be some difficulties for a couple of months. But this inconvenience shall be temporary and for short- term.

Slogan :

"DEMONetisation - Drubbing the Demons of Development"

Name : Jash Kavya	IDNO : 13BPH013

Effects of Demonetization :

With the announcement by PM Modi on 8th Nov.,the entire country complained but nobody thought about the positive outcome â€“â€˜Getting Cash to cashlessâ€™. People were much affected by this move & faced a lot of inconvenience but they welcomed the move at the end. It helped the less privileged people as many people gave advanced salary,hired labour etc. to convert their black to white.People lowered their expenditure on unnecessary things & made a great cut-off in their needs. This troubling scenario of â€œDemonetization in Indiaâ€• after 50 days looks fruitful. Every organization got their online websites done(AMUL),got the debit card machines installed,started using apps(Paytm), started net banking facility, stopped taking extra charge & many more advancements.There has been creation of digital infrastructure & delivering services digitally.People 1st criticized the PM and Indian government about Demonetization but now they are applauding the work Indian economy did to raise respect in the international market. It was all after Demonetization that India moved a step ahead towards Digitization & arose a ray of hope for a DIGITAL INDIA in the near future!

Slogan :

Demonetization is the key to Digitization•

Name : Shivang Bachubhai Rathva	IDNO : 11CL044

Effects of Demonetization :

Let start with what is demonetization….??
Name indicates Demonetization is the combination of DE & Monetization.
Monetization means increase the flow of cash in the economy.
But Demonetization means calling of the currency from the economy. Or
We can say ban of currency in the economy.

Effects of Demonetization

There are multiple reasons why nations demonetize their local units currency, some reasons include to combat inflation to combat corruption and to discourage a cash system.
So let see the impact of Demonetization:-

- After demonetization the circulation of currency become less so GDP will automatically become less, because spending will be less, consumption will be less, investment will be less and net export will become down…that's why GDP will become down
- Due to cash crisis from input is not available in agriculture sector.
- India is more reliant on cash.
- PM Modi's currency purge.
- Effect on parallel economy.
- Effect on money supply.
- Effect on demand.
- A comma on corruption.
- Recession.
- Softening of interest rates chances of rate cut (by RBI).
- Most goods & services will offer discounts ate the end of festive seasons.
- Bank deposit tares to come down with liquidity will go up
- Improve demand scenario in medium to little longer term.
- Price of gold to come down further with this step.

Short term Impact
- Real estate
- Gold
- Consumption

Direct Impact
- Fake currency out of circulation in one stroke.
- Real estate prices dip to be seen in the long run.
- Reduction in inflation.
- Reduction in fiscal deficit.
- Reduction in landing rates.
- Increase in GDP.

Indirect Impact
- Kashmir moved to normalcy.

- Use of apps and cards.
- Increase in revenue collection by the government authorities.
- Simplification in tax policies & reduction in tax rates in the upcoming years.
- Scarity of cash due to demonetization.

Negative Impact of Banning notes in the Economy
- Less business activities.
- Chance of losing business customers.
- Chance of losing job for daily worker.
- Insufficient funds for trade.
- Foreign money still remains untapped.

General Views on Demonetization
- Cashless future is the real Goal of India's Demonetization move.
- The demonetization move could change the face of the Indian Economy.
- Demonetization is the smallest weapon to fight against black money.
- Recession
- Temporary disruption of payments-cycle.
- It will take some time for the cycle to resume normalcy.
- Inconvenience/Harassment of common people.
- Slowdown of rural economy in the short term.
- Details of all bank accounts in the income tax returns.
- Linking of PAN and Aadhar numbers
- Introduction to JAN DHAN YOJANA.
- Income declaration scheme.
- Passing of Benami transaction Act.
- Recalibration of ATM'S

What Next…??
- Details of Swiss/Foreign bank account holders, foreign asset holders etc.
- Jewelary, bullion purchased and hoarded from black money.
- Benami properties.
- Digitization of Indian economy and maintain transparency in the long run.
- Transforming India into a cashless economy.

A Real Big Leap towards Cashless India.

Slogan :

A Surgical Strike on Blackmoney

Name :	IDNO :
Vidhan Dholakia	15ce027

Effects of Demonetization :

The term demonetisation has become a household name since the government pulled the old Rs 500 and Rs 1,000 notes out of circulation. While as per dictionary demonetisation means "ending something (e.g. gold or silver) that is no longer the legal tender of a country", one needs to see if there is anything more to the word.
Following are the main impacts :-

1.) Demonetization is not a big disaster like global banking sector crisis of 2007; but at the same time, it will act as a liquidity shock that disturbs economic activities.

2.) Most active segments of the population who constitute the â€˜base of the pyramidâ€™ uses currency to meet their transactions. The daily wage earners, other labourers, small traders etc. who reside out of the formal economy uses cash frequently. These sections will lose income in the absence of liquid cash. Cash stringency will compel firms to reduce labour cost and thus reduces income to the poor working class.

3.) Prime Minster Narendra Modi's decision to scrap high value notes of Rs 500 and Rs 1,000 has created a shortage of cash in the system, leading to a lot of discomfort for the general public and businesses. Also, since there is a shortage of newly printed Rs 500 and Rs 2,000 notes, the situation has worsened. The move has also led to a shortage of lower denomination notes such as Rs 100 and Rs 50 that are still legal tender, as people have taken to conserving whatever cash they have in hand.

Slogan :

There no shortage of money in India, problem lies
in where the money is.

Name : Adarsh Patel	IDNO : 13ce069

Effects of Demonetization :

The Prime Minister of The Republic of India, Mr. Narendra Modi declared demonetization of the five hundred rupees and the thousand rupee currency notes. This initiative was taken to clean out the black money possessed in and outside India. But, it took a major toll on the Indian economy. The growth of the Indian economy was solid in the quarter from April to June 2016. But this solidity is weakened because of demonetization. This weakness is hailed from the cash-intensive sectors like Fast-moving consumer goods (FMCG's), real estate, construction has taken a major hit in the short term as the consumers are postponing their purchases. So, the GDP growth in the quarters from September to December 2016 and even further few quarters will be less than the previous years. As they say, there are always two opposite sides of the same coin. The Indian economy can grow considerably after curbing the debilitation caused by counterfeit money and an increase in economic activity. A rise in tax flow and lower interest rates are expected to help as well. The effects of demonetization are going to last long in the most positive way as change happens for betterment.

Slogan :

DEMONETIZATION: INDIAS GREATEST ECONOMIC
"BOOM"

Name : jatin daswani	IDNO : 16cl012

Effects of Demonetization :

Our prime minister shri Narendra Modi announced that Rs with the demonetization of 500/- and 1000/- would cease to be the legal tender from 9th of Nov .The great news that stunned India. The main objective of this move was to curb the black money, corruption and fake money.As we know if there is a good side at the same there is also a bad impact. In the running time of demonetization people faced lots of problems, many people lost their lives, our gdp gone down which was even unexpectable by our govt.Though the people faced a lot of inconvenience they lauded the Modi govt for this big move. The housing market known as hot-bed for the indiscriminate use of black money now it seems to be getting down, peoples dream of buying their own houses are going to come true. As indian people wish with the fake money destroyed, Indian economy will see a big change that can bring up India to an another level.

Slogan :

poor people are going to sleep peacefully while
blackmoney holders are going for sleeping pills.

Name :	IDNO :

Jay S. Chauhan	16CL005

Effects of Demonetization :

As everyone already know about what demonetization is. Its the change of the the currency notes of 1000 and 500 rupees. Which apparently our government took to get all the black money out, at least as much as they can or possible.

This step by the government has wildly influenced our daily life in many different ways and being honest it had even created number of problems for the common man too. People were running out of cash and it wasn't even that easy to get cash from the atm too cause of the never ending que in front of atms too. People were facing problems organizing big and important event like weddings and stuff too because of the lack of cash. And the list goes for few more effects.

Demonetization may have had "considerable negative effect" in the first few days but the situation now has improved and it will have a positive impact on the economy.

Some of the important effects are:

Black Money stored in the form on 500 and 1000 rupees notes will be of no use.

Fake Indian Currency Notes (FICN) network will be dismantled by the demonetisation measures.Taking out 500 and 1000 rupee notes out of circulation will have a lasting impact on the syndicates producing FICN's, thus affecting the funding of terror networks in Jammu and Kashmir, North-eastern states and Naxalite hit states.

Demonetization will likely result in people adopting virtual wallets such as Paytm, Ola Money etc.: This behavioural change could be a game changer for India. Which means less of cash transaction so less chances of redevelopment of black money. And less chances of corruption.

Slogan :

Demonetization key to a better and corruption free india

Competition Guidelines, Rules, Terms and Conditions

About the Competition:

The "Equal opportunity cell , Paragraph writing competition " ("The Contest"), is organized by , Equal opportunity cell at CHARUSAT.

Eligibility:

Open to all CHARUSAT Current Undergraduates, Post Graduate Students. The Competition is not eligible to employees of CHARUSAT. Equal opportunity and CHARUSAT cell reserve the right to disqualify entries that do not meet the eligibility terms and conditions of the Competition.

Duration of Competition:

The Competition begins at 10.00 a.m on 30th December, 2016 to 10th January, 2017 11.59 p.m. No entry will be considered after 10th January, 2017 .

Joining the Competition:

Participants can submit Paragraph as an individual or as Group Entry. Participants are allowed to submit a maximum of 2 entries. The Contest is free of charge for the participants.

Submission Guidelines for Submit a Paragraph:

- Paragraph should correspond to the Effects of Demonetisation
- Your words cannot be exceed more than 200 words
- Preferably relate to Demonetisation in India
- Slogan must include the words, "Demonetisation"
- Submission Must via Online, No printed copy will be accepted.

- No entry will be considered after 10th January , 2017 11.59 p.m.

Selection of Winner:

Judging Criteria:

The entries will be assessed in the following areas:

Areas	Percentage
Effects : Positive or Negative	25%
Uniqueness of Paragraph	45%
Slogan	30%

Scrutiny committee 1 will Evaluate all Paragraph and select the top ten (10) Paragraph Based on above guideline .

Scrutiny committee 2 will decide best Paragraph out of top 10 Paragraph selected by Scrutiny committee 1.

Prizes :

Winner will receive the Cash Prize

Cash Prizes	
Winner	500 RS.

The prizes are not transferable or redeemable for other goods or services.

Announcement of Result

All prize winners will be notified by email.

All prizes must be collected by the winner or his authorized representative within 30 days from the date of notification.

The judges' decision pertaining to the judging, process and award of the prizes is final and no correspondence will be entered tained.

Date: 26th December, 2016

To
The Principal,
CSPIT, CHARUSAT.

Subject: Permission for organizing Paragraph writing competition under the Equal opportunity cell.

Respected sir,

As you are aware that Equal opportunity cell has been constituted to provide Equal opportunity to every Charusat family member. In this regard a meeting had been conducted of cell on 12th July 2016 1.30 p.m.

It has been decided to involve CHARUSAT Students for the same. A competition to *writing Paragraph With Slogan will* be organized and best Paragraph would be selected. Also student would be awarded with Prize money.

Subject of the Competition is Effects of Demonetisation.

So kindly grant the permission for organizing the competition.

Yours Sincerely

Hardik S. Jayswal
Dept. Coordinator, EOC

EQUAL OPPORTUNITY CELL

Event Report

Name of Department : CHAMOS Matrusantha Department of Mechanical Engineering

Name of Event : Expert Talk on "Science & Spirituality" by Dr. Pradip Lalwani, Rajkot.

Date and Time of Event : Saturday 04 February, 2017 and 10.00 am – 11.00 am, CE/IT Seminar Hall Room 412

Event coordinator : **Mr. Dattatraya Ganpatrao Subhedar**

Resource person details :

Sr. No.	Name of the resource person	Organization of resource person
1	Dr. Pradip Lalwani	Samarpan Meditation, Rajkot

Event Schedule:

Date	Time	Session	Activity
04/02/2017	10.00 am – 11.00 am	1 hour	Expert Talk

Summary of the Event:

Regular meditation helps in relieving stress and thus improves the quality of sleep. Less stress means more happiness. You will live a happier and healthier life with meditation.

It is believed that meditation improves the immune system and thereby helps in controlling blood pressure and lowering blood cholesterol.

To make aware connection between Spirituality & Science, CHAMOS Matrusanstha Department of Mechanical Engineering and Samarpan Meditation Center, Anand jointly

organized an Expert talk on "Science & Spirituality" for the CHARUSAT teaching and nonteaching staff. Dr. Pradip Lalwani, Samarpan Meditation center, Rajkot delivered a talk.

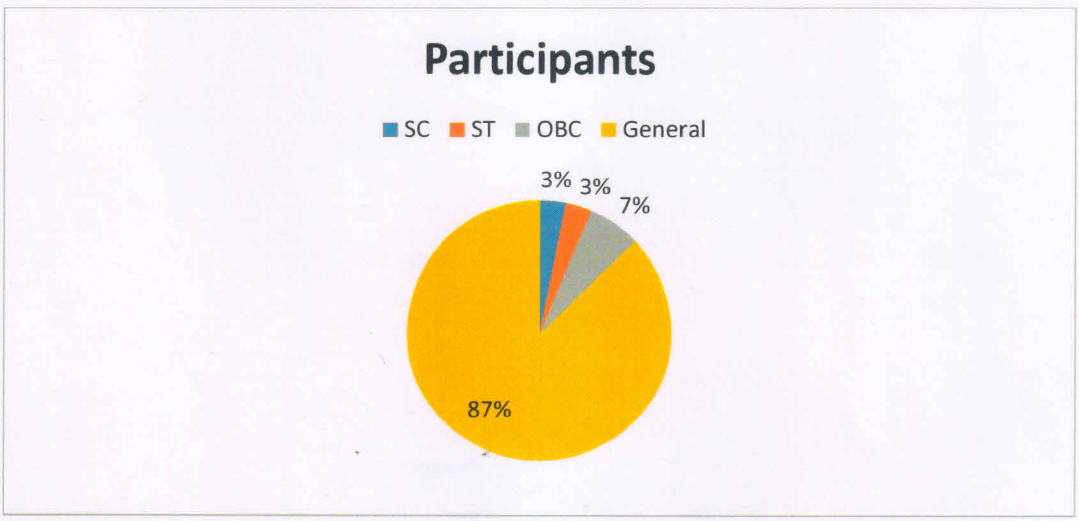

The key points of his talk were:

1. Metaphysics: Science to study beyond our physical body
2. Science of Bioenergy field : Human Energy Pattern
3. Human Biofield
4. Aura, Channels, Energy Centers, Kundalini
5. Cleaning of Aura: By joy of giving, By in contact with Panchmahabhut, By spending time with pets, spending time with peers, and from Living Sadguru.
6. Samarpan Meditation

He also taught the simple meditation technique at the end of his session.

Registration fee (if any): Nil

No. of Participants:62

List of Participants: Registration sheet is attached

Summary of the Event:

Introduction to Research & Its Significance
- Equal Opportunity Cell

Date: 30/01/2017
Seminar Hall[412]

- Research leads to an expansion of knowledge & this event was organized to help students to improve their research work.

On 30/01/2017, 11:10 am, students were given talk regarding "Introduction to Research & Its Significance". From CHARUSAT overall 41 students and 04 faculty members registered for this event. In the beginning Mr. Dhaval Bhoi, EOC Coordinator CE Department, introduced Dr. Gaurang Panchal [Ph. D from IIT Kharagpur] and requested him to deliver talk on "Introduction to Research & Its Significance". Dr. Gaurang Panchal started with explaining "*what is not research*". Then he explained about what is research, its types, research flow, and various methods to do research He guided & motivated students for publishing their work in various conferences & journals. He also gave brief talk on plagiarism and how to check it before publishing. Students were found interactive during session. They raised various questions related to research and its importance. Dr. Gaurang Panchal sir gave them proper guidance to do research and explained its importance.

Mr. Dhaval Bhoi ended the session by showing gratitude to Dr. Gaurang Panchal on behalf of all students. All were motivated and had a clear vision of doing their research work after the enlightening talk.

Registration fee (if any): No registration fees.

Summary of the Event:

Contributor Personality
- Equal Opportunity Cell

Date: 07/02/2017
Seminar Hall[412]

To progress in one's life, it is important to make sure that one always stands out in a crowd. This session was organized to introduce the concept and benefits of having a Contributor Personality to the students & faculty members.

On 07/02/2017, 11:10 am, students were given talk regarding "Contributor Personality". From CHARUSAT overall 50 students and 20 faculty members registered for this event. In the beginning Mr. Ashwin Makwana, from CE Department, introduced Dr. Kamal Chakraborty [Head of HRDC, CHARUSAT] and requested him to deliver talk on "Contributor Personality". Dr. Kamal Chakraborty started with explaining "what is the purpose of life?". Then he explained about what it means to have a Contributor Personality and why does it matters? He carried on by giving examples from real life incidents which he had witnessed and also a short story from Swami Vivekananda's life which gave birth to concept of Contributor Personality. He guided & motivated students to help others. He also made students realise how we often stay confined in our own small world following which he guided students to always walk an extra mile out of our comfort zone. Students were found mesmerized by the new point of view which was introduced to them.

Mr. Dhaval Bhoi ended the session by showing gratitude to Dr. Kamal Chakraborty on behalf of all students & faculty members. All were motivated and had a clear vision of contributor personality.

Event Report

Name of Institute : Smt. Chandaben Mohanbhai Patel Institute of Computer Applications

Name of Event : Expert Lecture on Ability to listen and document what you have heard.

Date and Time of Event : 1st February,2017, 10:10 a.m. to 12:10 p.m.

Event coordinator : Dr. Nirali Honest

Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1	**Dr. Bhaskar Pandya**	Department of Humanities and Social Sciences, I^2 IM , CHARUSAT

Event Schedule:

Date	Time	Session	Activity
1st February , 2017	10:10 a.m. to 12:10 p.m.	• Introduction • Floral Welcome • Content delivery by guest speaker • Vote of Thanks	Lecture and Interaction session with the students on how to be an effective listener and document what you have listened and understood.

Summary of the Event:

- The event was organized to understand the value of listening and enhance the ability to listen and document the important and abstract content. The session was commenced with a brief introduction of the guest and speaker Dr. Bhaskar Pandya, which was followed by the floral welcome. Dr. Bhashar

Pandya shared the information that we share total 70% of time in communication, out total communication time, we spent 9% time in writing, 16% time in reading, 30% time in speaking and 45% time in listening. Dr. Bhaskar Pandya explained the concept by giving examples and effective videos. The major topics covered during the Improving Learning in a Classroom, Develop Effective Listening Skills, Documenting what is Heard in the form of Note Taking, Note Making, Summarizing and Paraphrasing

Dr. Bhaskar shared his knowledge on how meditation can increase a concentration and help us remember the things that we listen. He demonstrated the power of meditation through the video lecture, Dr. Pandya added that music therapy also helps to increase in concentration. The session was ended by giving a vote of thanks to Dr. Bhaskar for delivering very valuable content in a very simple and pleasant manner and sharing his content with all, to all the participants for being very good audience and respecting Sir by listening him very carefully and silently, to the Chairperson of EOC for giving the opportunity to host the event , to the Principal CMPICA, for giving permission to carry out the event , to the HOD Sir and staff members of CMPCIA for making all the necessary actions and adjustments required to handle the event smoothly and last but not the least to all the student volunteers for managing the entire event very responsibly.

Registration fee (if any): No registration fees.

Sponsored by Charotar University of Science and Technology (CHARUSAT)

ACCESS AUDIT REPORT

SMT. CHANDABEN MOHANBHAI PATEL INSTITUTE OF COMPUTER APPLICATIONS (CMPICA), CHARUSAT

ABOUT ACCESS AUDIT

- **Accessible India Campaign (Sugamya Bharat Abhiyan)** is launched by the Department of Empowerment of Persons with Disabilities, Ministry of Social Justice & Empowerment as a nationwide flagship campaign for achieving universal accessibility for persons with disabilities. In line with this campaign, ARIP team has conducted access auditing of the built Environment of MTIN for Persons with Disability and Elderly Persons.
- **ACCESS STANDARD:** "Harmonized Guidelines and Space Standards for Barrier Free Built Environment for Persons with Disabilities and Elderly Persons" 2016 by Ministry of Urban Development are sited.
- **DATE OF AUDIT:**14th April 2017
- **ACCESS AUDIT DONE BY:**
    1. Dr. Garima Gedamkar, Assistant Professor, ARIP
    2. Students of 8th Semester BPT, ARIP
- **ACCESS AUDIT REPORT PREPARED BY:** Dr. Garima Gedamkar (PT), Assistant Professor, ARIP

INDEX

Serial No.	Title
1.	Introduction
2.	Executive summary
3.	Access audit check list
4.	Observations and Recommendations

1. INTRODUCTION

NAME OF THE BUILDING: Smt. Chandaben Mohanbhai Patel Institute of Computer Applications

BUILDING TYPE AND USE: Educational Building

ADDRESS: CHARUSAT Campus, Gujarat State Highway 139, Anand, Gujarat- 388421

2. EXECUTIVE SUMMARY

MANDATORY IMPLEMENTATION:

1. Consider installing automatic door at entrance.
2. Improving accessibility of drinking water for PWDs on all floors.
3. Designate accessible parking near the building premises.
4. Consider building a ramp and/or lift inside the institute.
5. Securely fastened handrails on both sides of ramp and stairs at recommended height and painted in contrast color.
6. Accessible toilets on all floors.
7. Appropriate signage and international symbol of accessibility should be clearly marked
8. All signage should be multi lingual, tactile, and simple.
9. Consider having Emergency evacuation measures as per the guidelines provided.

3. ACCESS AUDIT CHECK LIST

1.MAIN ENTRANCE	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the main entrance of the building accessible?	✓			
▪Are there any steps at the entrance?	✓			
▪Do the steps have a handrail?		✓		
▪Are there handrails on both the sides?		✓		
▪Is there a ramp?	✓			
▪Does the ramp have a railing?	✓			
▪Are there handrails on both the sides?		✓		Present only on left side
▪Is the clear door width at least 1000 mm?	✓			
▪Can the entrance door be operated independently?	✓			
▪Is the height of the door handle between 800 mm and 1000 mm?		✓		1800mm
▪Does the accessible entrance permit access to an elevator?			✓	Elevator not available
▪Is the accessible entrance clearly identifiable?	✓			
▪Is the landing surface non-slippery?	✓			

2.RAMPS (AT ENTRANCE)	YES	NO	NOTAPPLICABLE	REMARKS
▪Is there a ramp next to the stairs?		✓		At entrance only, not inside the building
▪Is the location of the ramp clearly identifiable?		✓		
▪Is the ramp gradient no steeper than 1:12?	✓			Around 1:8.7
▪Is there a landing of at least 1500mm x 1500mm, at 9m intervals provided?			✓	

▪Is there a landing at every change in direction?			✓	
▪Is there landing at the top and bottom of every ramp?	✓			
▪Is the minimum width of the ramp 1500 mm?	✓			
▪Are there continuous handrails, on both sides, at a height between 760 mm– 900 mm?		✓		
▪Is the surface of the ramp non-slip?	✓			Grating present
▪Is there an edge protection on both sides ofthe ramp?		✓		No edge protection on

3.PARKING	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there accessible parking facilities?	✓			
▪Is the number of accessible Parking spaces sufficient?		✓		
▪Are the designated spaces wide enough 3600mm x5m?			✓	No designated space
▪Are accessible parking spaces marked by the international symbol of accessibility?		✓		
▪Accessible parking spaces are not misused or used by non-disabled people?			✓	
▪If the drop-off area has a kerb, is there a kerb ramp leading to the pathway?			✓	
▪Is the drop-off area marked by signage?			✓	
▪Is there an accessible path of travel form the drop-off area to the main entrance?			✓	

Note: Parking distance is approx. 142m from the entrance

4.RECEPTION&INFORMATION COUNTERS	YES	NO	NOTAPPLICABLE	REMARKS
▪Are the counters easily indefinable?			✓	
▪Is the counter at two height?			✓	
▪Is a part of the counter lowered to accessible height of 800 mm?			✓	
▪Is a loop induction unit installed at the counter?			✓	

▪Are there tactile pictographic maps of the building near the counter?			✓	
▪Is the counter well illuminated?			✓	

5.DOOR (AT ENTRANCE)	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there any automatic doors at the entrance?		✓		
▪Can the doors be operated without much effort?			✓	
▪Do automatic doors have sufficient long opening intervals?			✓	
▪Are push buttons for automatic doors located at a maximum height of 1m?			✓	
▪Is there sufficient space beside The latch side of the doors(450-600mm)?	✓			
▪Are accessible door placed adjacent to the revolving doors And turns tiles?			✓	
▪Are glazed doors marked with a colour band at eye level?		✓		
▪For double leaf doors, is the Width of one of the leaves at least 1m?	✓			
▪Do doors fitted with spring closers have an extra pull handle?			✓	
▪Is manual door accessories/ hardware (handle, lock pull etc.) 800mm?		✓		1800mm

5.DOORS (INSIDE THE BUILDING)	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there any automatic doors at the entrance?			✓	
▪Can the doors be operated without much effort?			✓	
▪Do automatic doors have sufficient long opening intervals?			✓	
▪Are push buttons for automatic doors located at a maximum height of 1m?			✓	

▪Is there sufficient space beside The latch side of the doors(450-600mm)?	✓			
▪Are accessible door placed adjacent to the revolving doors And turns tiles?			✓	
▪Are glazed doors marked with a colour band at eye level?		✓		
▪For double leaf doors, is the Width of one of the leaves at least 1m?	✓			
▪Do doors fitted with spring closers have an extra pull handle?			✓	
▪Is manual door accessories/ hardware (handle, lock pull etc.) lower than 800mm?	✓			Except- store room, classroom-3 & 5

6.CORRIDORS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is the minimum unobstructed width of corridors at least 1500 mm?	✓			
▪Does the corridors width allow manoeuvring through doors located along its length?	✓			
▪Are differences in level, bridged with by ramps or lifts?			✓	
▪Can a sightless person with a cane detect all protruding objects with in the corridor?	✓			
▪Are all over hanging obstructions mounted above a minimum height of 2200mm?		✓		
▪Can a person with low vision, identify all obstacles in the corridor?	✓			

7.LIFTS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is there an accessible path leading to the elevator?			✓	
▪Is the clear door opening width 1m or more?			✓	

▪Are the minimum internal dimensions of the elevator 1500mmx1500mmminimum or having 13 persons capacity?			✓	
▪Is the height of the call button (outside the lift) between 800 mm– 1m, from the floor level?			✓	
▪Is the control panel place data height between 800mm– 1m, from the floor level?			✓	
▪Is there an audio and video system installed in the lift indicating arrival at a floor?			✓	
▪Are there Braille/raised numbers on the control panel?			✓	
▪Is the elevator provided with a handrail on the three sides?			✓	
▪Are the handrails mounted at a height between 800 mm and 1m?			✓	
▪Is the elevator door easy to identify?			✓	
▪Is the emergency intercom provided inside the elevator?			✓	
▪Are there tactile or Braille instructions for the communication system?			✓	
▪Is the emergency intercom usable without the voice communication?			✓	
▪Is the door opening/closing interval long enough?			✓	
▪Is the finish of the elevator floor skid-resistant?			✓	

8.STAIRS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Is the minimum width of the stairs 1200mm?	✓			
▪Are there continuous handrails, on both sides, at a height between 760mm-900mm?		✓		1070mm
▪Is the handrails installed in the centre of the stair width, which is more than 3mwide?			✓	
▪Is the landing length not less than 1200mm?	✓			

▪Are the step edges of a different colour or texture easily identifiable by low-vision& vision impaired persons?		✓		
▪Are there warning blocks installed at the beginning and End of all flights?		✓		
▪Is the location of emergency (fire escape) stairs clearly identifiable?			✓	
▪Does the height of the risers is 150mm maximum & tread 300 mm minimum?	✓			
▪Do treads have a non-slip surface?	✓			
▪Are the risers having open gaps in the steps?		✓		

9.HANDRAILS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are handrails mounted at a height between 760mm–900 mm?		✓		Between 995mm to 1070mm
▪Are handrails easy to grip?	✓			
▪Are handrails securely attached?		✓		
▪Do handrails extend horizontally 300mm at the top and bottom of every staircase or ramp?		✓		
▪Are the ending of the handrails grouted in the ground or turn downward?	✓			
▪Is the space between the handrails and the wall no less than 50mm?	✓			
▪Are the handrails painted in contrast colours to be easily indefinable?	✓			
▪Are there tactile strip/Braille plates identifications on the handrails for emergency stairs & floor levels?		✓		

10.TOILETS	YES	NO	NOTAPPLICABLE	REMARKS
▪Are there accessible toilets for Persons with Disabilities?	✓			
▪Are the toilets easily identifiable?		✓		
▪Istheresufficientspaceof2mx 2.2m inside the toilets to manoeuvre a wheelchair?		✓		
▪Are water closet (WC) and bidets mounted at a height between 450mm– 480mm?		✓		Between 580mm-1290mm
▪Is the space between the WC and the closest adjacent wall, fitted with a grab bar is between 450 mm– 500mm?		✓		
▪Is the accessible washbasin mounted at a height between 750mm– 850mm?		✓		870mm
▪Is the lower edge of the mirror positioned at a height not exceeding 1m?		✓		1.15
▪Are the accessible showers provided with a folding seat?		✓		Showers & seat not provided
▪Are the grab bars installed near WC and showers at a height between 750 – 850mm?		✓		600mm-700mm
▪Do grab bars have a diameter of 38 mm?		✓		125mm
▪Do wall mounted grab bars have knuckle space 50 mm?	✓			
▪Are grab bar non slippery?	✓			
▪Can the grab bars withstand the load of 200kg minimum?			✓	
▪Are faucets easy to grip and operate with one hand?	✓			But not suitable for person with disabled hand
▪Are shower fixtures with at least 1500 mm long hoses?			✓	
▪Are hot water pipes insulated or covered?			✓	
▪Is the toilet equipped with an emergency alarm system?		✓		
▪Can doors be locked from Inside and releasable form outside under emergency situations?		✓		

▪ Are flushing arrangements, dispensers and toilet paper mounted between 300mm and 800mm?	✓			Toilet paper not provided
▪ Are flushing equipments easy to operate?		✓		
▪ Is the floor material skid proof, well drained and waterproof?	✓			
▪ Do pivoted doors open outwards?		✓		

11.CANTEEN	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the eating outlet accessible For PwD's?			✓	
▪Is there a circulation path of at least 900mm wide to allow a wheelchair user to move around the eating outlet?			✓	
▪Are the cash and service counter height below 800mm?			✓	
▪Is the table accessible with a height of 750mm to 850mm and knee space of 750mm wide and 480mm deep?			✓	
▪Do the table with fixed stools have accessible spaces for wheelchairs?			✓	

12.DRINKING WATER	YES	NO	NOTAPPLICABLE	REMARKS
▪Is the Water tap accessible?	✓			
▪Can it be easily manoeuvred by a person with poor hand function?		✓		
▪Is the area dry?	✓			
▪Are glasses provided?	✓			

13.SIGNAGES	YES	NO	NOTAPPLICABLE	REMARKS
▪Are accessible spaces identified by the international symbol of accessibility?	✓			

▪Are there directional signs indicating the location of accessible facilities?		✓		
▪Are maps, information panels and wall-mounted signs placed at a height between 900mm and1800mm?			✓	
▪Are signs clear, simple and easy to read?	✓			
▪Is the colour of signs clearly distinguishable?	✓			
▪Is the surface of the sign processed so as to prevent glare?	✓			
▪Is the sign supplement by a text in embossed letters or in Braille available next to information signs?		✓		
▪Is the lettering size proportional to the reading distance?				Could not assess

14.EMERGENCYEXITS	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are emergency exits clearly marked with directional arrow signs?		✓		Emergency exits not identified

15.PUBLICTELEPHONES	**YES**	**NO**	**NOTAPPLICABLE**	**REMARKS**
▪Are there public telephones accessible to wheelchair users?			✓	
▪Is there at least one telephone in the building equipped with a loop induction unit?			✓	
▪Are the numerals on the telephone raised to allow identification by touch?			✓	
▪Is there proper signage directing to the public telephone?			✓	
▪Are the heights of the operable parts of the telephone between 800mmand 1m?			✓	
▪Is there a clear knee space of 750mm?			✓	

16.RESTINGFACILITIES	YES	NO	NOTAPPLICABLE	REMARKS
▪Where there are large spaces, are resting facilities provided at 30 meters of intervals?	✓			
▪Is there an adjoining space for a wheelchair next to benches and public seats?		✓		
▪Are public seats with height of 450-480mm?		✓		400mm
▪Are knee spaces at accessible tableswithaheightof750mm and knee space of 750mm wide and 480mmdeep?			✓	

Note: Available at ground floor only

4. OBSERVATIONS & RECOMMENDATIONS

4.1MAIN ENTRANCE

OBSERVATIONS	RECOMMENDATIONS
1. The main entrance is accessible to all users 2. It is clearly identifiable. 3. The entrance area to the building is covered. 4. The entrance has steps in front and ramp on the right side. 5. The landing surface is non-slippery 6. Brown color mat is placed on the landing surface. 7. There is no automatic door at the entrance instead manually operating door has been installed. 8. There are no obstacles on the floor such as potted plants. 9. It has no tactile guiding path including directional, hazard warning and positional tiles directing from the entrance till inside the building	1. Automatic doors at the entrance should be installed. 2. There should be no obstacles on the floor such as floor mats 3. It should have a tactile guiding path including directional, hazard warning and positional tiles directing from the entrance till inside the building 4. There should be accessible identification signage to identify the accessible entrance 5. Signage at the entrance should be multi lingual and tactile

10. There is no accessible identification signage to identify the accessible entrance	

STEPS

OBSERVATIONS	RECOMMENDATIONS
1. There are three steps at the entrance 2. Hand rails are not installed. 3. Steps are in good condition. 4. The floor surface of the steps is non-slippery. 5. There is no color contrasting strip at the edge of the stairs 6. No warning blocks at beginning and end of stairs. 7. There is a level difference on the landing surface which is covered by a mat.	1. The steps should have handrails on both sides that should be continuous on the landing 2. Height of handrails should be between 760 mm- 900 mm 3. Handrails must extend 300 mm at top and bottom of stairs 4. There should be a color contrasting strip at the edge of the steps/stairs 5. Install warning blocks at beginning and end of the stairs 6. Level the floor surface

RAMP

OBSERVATIONS	RECOMMENDATIONS
1. There is a ramp at the main entrance 2. The location of the ramp is clearly identifiable 3. Ramp gradient is not steeper than 1:12 4. Ramp width is 2110 mm 5. The surface of the ramp is non-slippery. Grating is present. 6. There is no edge protection on left side of the ramp 7. Handrails are provided on left side of the ramp but not continuous on landing. 8. Drainage pipe is identified as a barrier 9. The landing surface is non-slippery. 10. The ramp does not have tactile warning tiles at the beginning and end.	1. Handrails should be provided on both sides of the ramp and should be continuous on the landing 2. There should be an edge protection on left side. 3. Remove the drainage pipe or secure it so that it does not obstruct/ harm. 4. The ramps should have tactile warning tiles at the beginning and end.

HANDRAILS

OBSERVATIONS	RECOMMENDATIONS
1. Handrail has been provided on left side of the ramp. 2. Securely attached 3. Circular and non-slippery. 4. Handrail does not extend beyond the ramp. 5. Mounted at a height of 890 mm 6. No Handrails provided for steps.	1. Handrails should be provided on both sides of the stairs & ramp. 2. Handrails should be provided at the height between 760 mm and 900 mm 3. The handrails should extend horizontally 300mm at the top and bottom of steps & ramp 4. Handrails should contrast in color from the background wall and the floor 5. The end of the handrail should be either grouted or turned downwards 6. There should be at least 50mm hand clearance between the wall and the handrail

ENTRANCE DOOR	
	
OBSERVATIONS	**RECOMMENDATIONS**
1. Manually operated double leaf door is at the entrance. 2. It does not take too much energy to open the door. 3. The color of the doorframe contrasts in color with the door and the background wall 4. Yellow markings are at the entrance door extending to both sides of the corridor 5. The door accessories/ hardware are at a height of more than 800mm 6. Wheel chair is placed behind the door in a corner. 7. There is adequate space available to open the door even by a wheelchair user	1. Automatic doors should be installed. 2. The door hardware/accessories should be at the height lower than 800 mm.

4.2 RAMP

OBSERVATIONS	RECOMMENDATIONS
1. There is no ramp provided to access different floors	Not applicable

4.3 PARKING

OBSERVATIONS	RECOMMENDATIONS
1. There is parking space provided but the distance is more than 30m from the accessible entrance. 2. There is no designated parking lot available for visitors and staff within 30m 3. There are no accessible parking bays reserved for persons with disabilities. 4. It seems that due to large number of vehicles, the sheltered parking space is not sufficient and thus another parking has been provided in a ground near the building. 5. Ground is not leveled, has many barriers (plants & trees) and without shelter. 6. There is no tactile floor guidance. 7. There is inadequate artificial light in the outside parking after sunset 8. No signage provided.	1. There should be a parking lot available for visitors and staff within the campus 2. There should be sufficient accessible parking bays reserved for persons with disabilities 3. The size of the bay should be 3600mm x 5000mm 4. The parking bay should have firm and leveled surface 5. Parking should be located within 30m from the accessible entrance 6. There should be a drop off point for persons with disabilities next to the accessible parking 7. Minimum accessible route width should be 1200mm 8. There should be a tactile floor guidance including directional, hazard warning and positional tiles in the parking area for independent mobility

	for persons with blindness and low vision specifically routes guiding from parking area to entry points of buildings, emergency exits 9. Appropriate signage and international symbol of accessibility should be clearly marked 10. Car parking at entrance must have height clearance of minimum 2400 mm 11. At least 2 accessible parking for every 25 car parking 12. Signage of the parking at the entrance gate should be multi lingual and tactile 13. The accessible parking spaces should be marked by international symbol of accessibility

4.4 RECEPTION & INFORMATION COUNTERS

OBSERVATIONS	RECOMMENDATIONS
1. Not available	1. Not applicable

4.5 DOORS

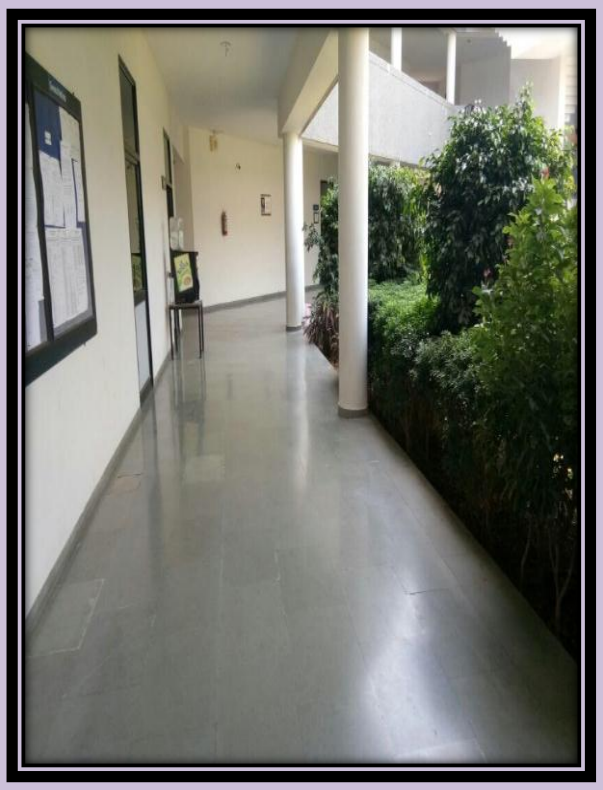

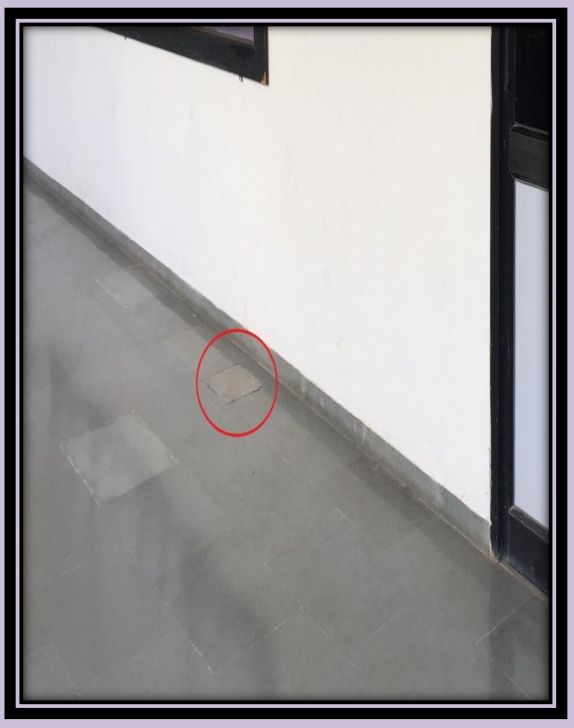

OBSERVATIONS	RECOMMENDATIONS
1. The glazed doors are not marked with the colour band at eye level 2. Door handle type is D-shape 3. Resistance to open the doors is not much except at the CMPICA auditorium 4. The color of the doorframe contrasts in color with the door and the background wall. 5. The color of door hardware contrast from the door. 6. Door accessories (handles, lock etc.) are placed at a height of 800 mm.	1. Mark the glazed doors with colour band at eye level 2. Reduce the resistance to open the auditorium door.

4.6 CORRIDORS

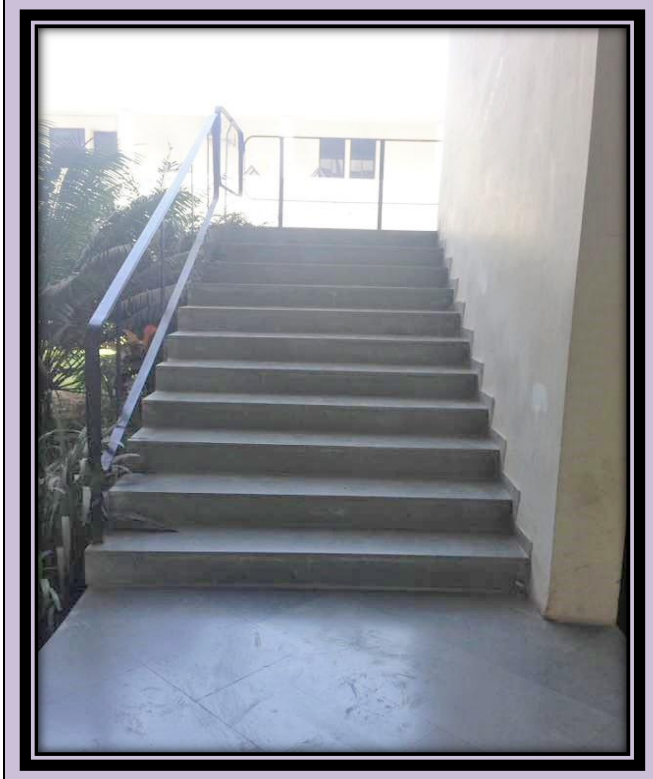

OBSERVATIONS	RECOMMENDATIONS
1. The corridor width is appropriate 2. The corridor width allows maneuvering through doors located along its length 3. There is difference in level of the floor.	1. Make the floor even or mark the dip with contrast colour tape 2. There should be no protruding elements such as display boards,

4. Protruding objects are mounted on wall below 2200 mm 5. There are no tactile warning blocks at level differences 6. The doors are not opening in the corridor 7. The floor finish is non-slip 8. The corridor is well illuminated 9. The clear circulation space in corridors are not kept free of unwanted barriers 10. No tactile floor guidance in the corridor.	notice boards, control panels, switch boards in the pathway below a clear headroom of at least 2200 mm 3. There should be tactile floor guidance in the corridor for independent mobility for persons with blindness and low vision specifically routes guiding from corridors to the various of rooms, emergency exit 4. There should be accessible directional signage directing to various building facilities like toilets, drinking water fountain, emergency exits etc in the corridor

4.7 LIFT

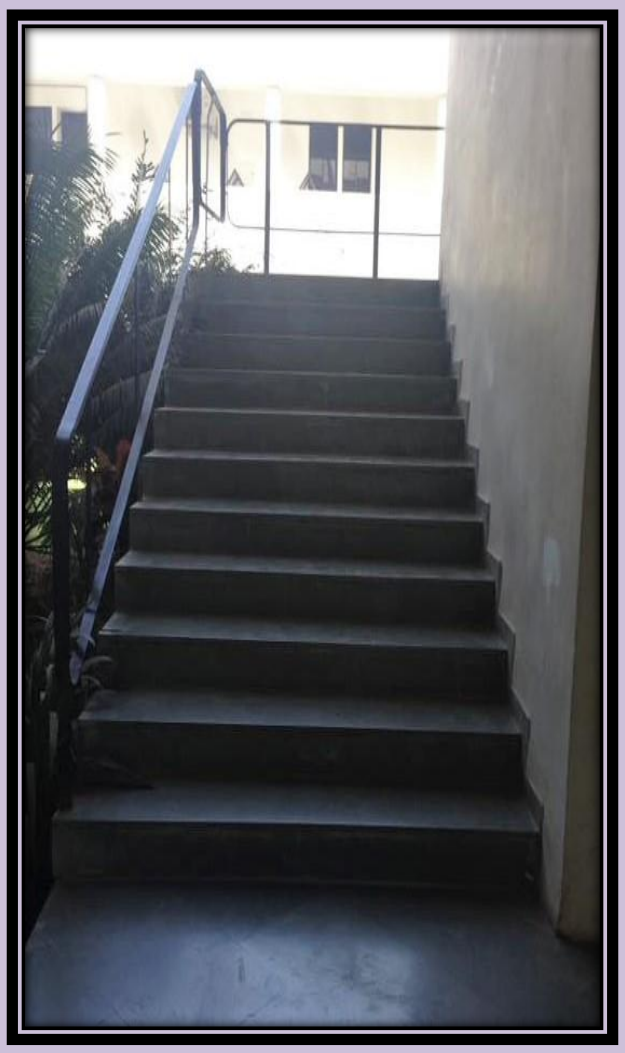

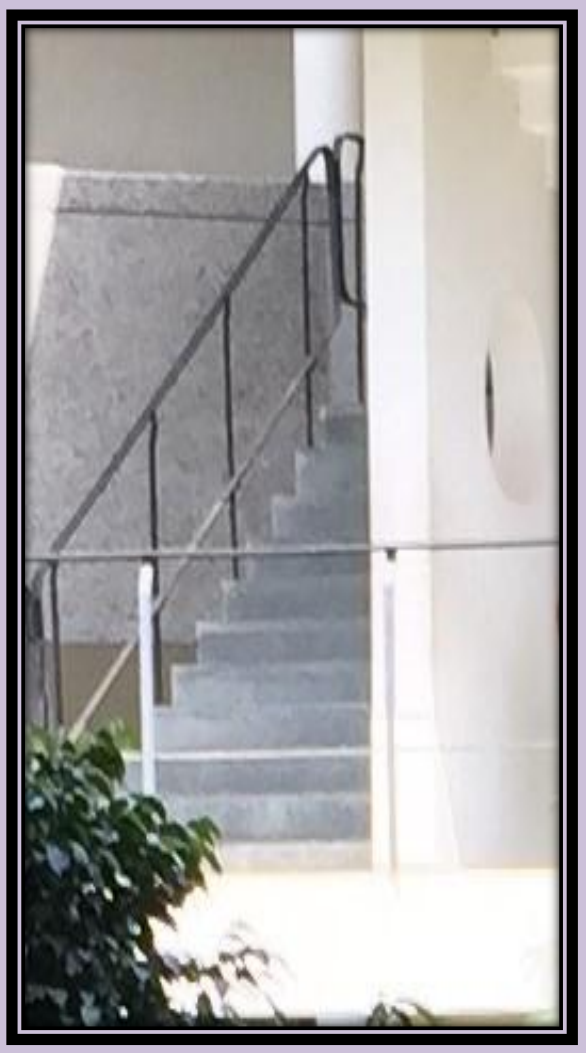

OBSERVATIONS	RECOMMENDATIONS
1. There is no lift provided to access different floors	Not applicable

4.8 STAIRS

OBSERVATIONS	RECOMMENDATIONS
1. There are three staircase blocks present in the building. 2. There are no broken steps/ stairs. 3. There is no contrast between rise and	1. There should be a color contrasting strip at the edge of the stairs. 2. Handrails should be provided on both sides of the stairs

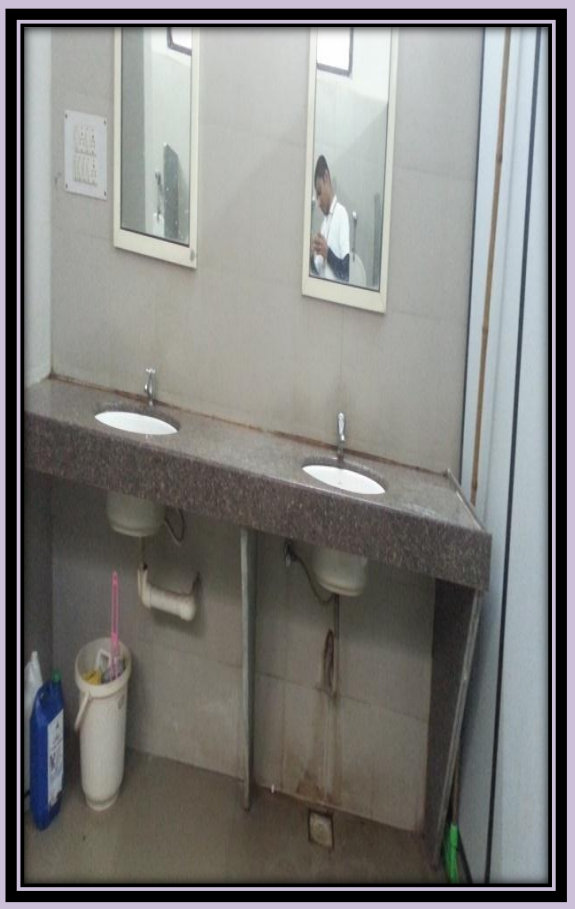

tread of steps 4. There is no color contrasting strip at the edge of the stairs. 5. Handrails are provided on both the sides of the central staircase (at the entrance lobby). 6. Staircase from right and left corridors has handrails on one side (left). 7. The handrail of stairs does not project beyond the end of the flight. 8. There is sufficient illumination on the stairs 9. The floor surface of the steps/stairs is non-slippery and non-glary 10. Stairs are uniform in width 11. Stairs are free of barriers 12. No warning blocks at beginning and end of stairs	3. The handrails should project beyond the end of the flight and curve back in accordance with section on handrails 4. Install warning blocks at beginning and end of the stairs
4.9 HANDRAILS	
	

OBSERVATIONS	RECOMMENDATIONS
1. Handrails are provided on both the sides of the central staircase (at the entrance lobby). 2. Staircase from right and left corridors has handrails on one side (left). 3. Not securely attached 4. Height of handrails vary between 995 mm to 1070 mm 5. Rectangular in shape and non-slippery 6. Extent of handrails is not proper 7. Black in colour 8. There are no tactile strips /Braille plate identifications on the handrails	1. Install handrails on both the sides of staircase. 2. Fasten them securely. 3. Adjust the height between 760mm-900mm. 4. Handrails must extend 300 mm at top and bottom of stairs 5. Handrails should contrast in color from the background wall and the floor 6. There should be at least 50mm hand clearance between the wall and the handrail. 7. There should be tactile warning tiles provided at the beginning and end of each flight.

4.10 TOILETS

	
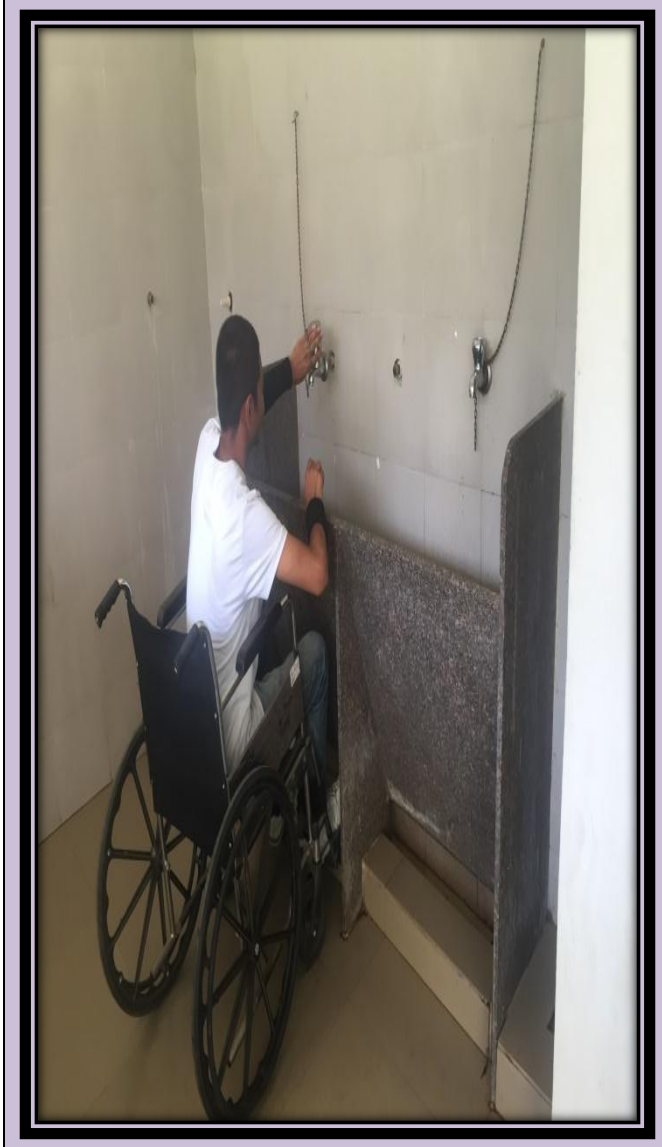

OBSERVATIONS	**RECOMMENDATIONS**
1. Accessible toilets are only on the ground floor 2. There are accessible cubicles in the boys' and girls' toilet block 3. Not easily identifiable. 4. There are no broken tiles/damaged flooring in the toilet blocks. 5. There are no level differences in toilet blocks 6. Direction of door opening is inside 7. Doors have D-shaped handles. 8. Insufficient space to maneuver a wheelchair inside toilet. 9. Grab bars are not installed at proper height. 10. Doors can be locked from inside but not releasable from outside under emergency situations. 11. There is no color contrast between the floor, wall and sanitary fittings 12. Not designed appropriately for disabled. 13. The water closet is mounted at a height of	1. Accessible toilets should be present on all floors of the building in ladies and gents block 2. The toilets should be easily identifiable 3. The wash basin should have lever type taps 4. Install horizontal grab bars inside the toilet at a height of 200mm from the WC seat 5. The grab bars should be installed near WC at a height between 750 – 850 mm 6. Grab bars should be non-slippery. 7. Water closet (WC) should be mounted at a height between 450mm – 480mm. 8. Flushing arrangements, dispensers and toilet paper should be mounted between 300mm and 800mm. 9. The accessible washbasin should be mounted at a height between 750 mm

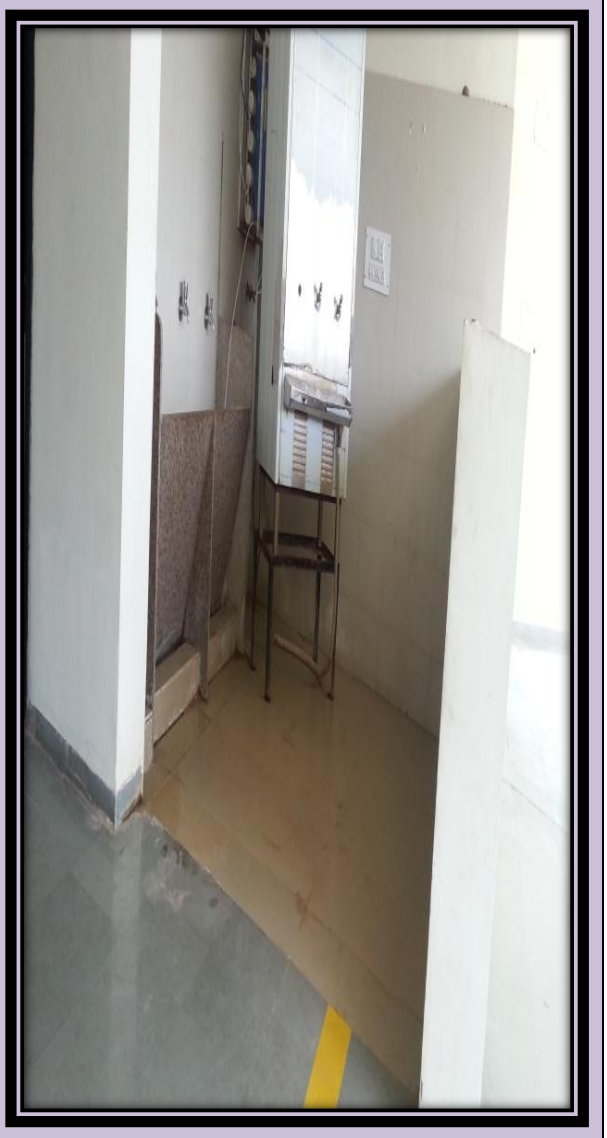

580 mm 14. Flushing arrangements are at a height of 1290 mm 15. The accessible washbasin is mounted at a height 870mm 16. Mirror is present in accessible toilet 17. Flush is behind the seat 18. No emergency alarm system provided. 19. Signage in local language	– 850mm. 10. There should be an alarm system within easy reach to alert persons outside, in case of emergency 11. There signage using the international symbol of accessibility to identify the accessible toilets

5.11 CANTEEN

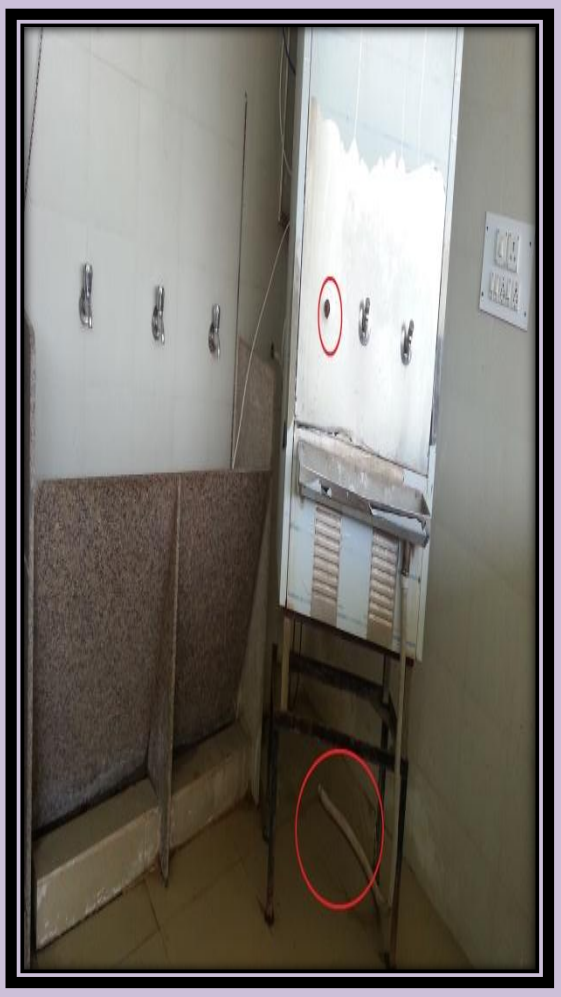

OBSERVATIONS	RECOMMENDATIONS
1. Not available inside the building	1. Not applicable

4.12 DRINKING WATER

OBSERVATIONS	RECOMMENDATIONS
1. All the drinking water facilities are not easily accessed by persons with disabilities 2. There is sufficient maneuvering space in front of drinking water area. 3. There is a level difference/ threshold at the entrance of drinking water area 4. Tiles are of different colour 5. The drinking water fountains are located at both end of the corridors 6. Area is not always dry 7. Tap is not of lever type 8. Glasses are not provided in all coolers	1. Water tap should be accessible for all. 2. Level difference of the floor should be bridged or tactile warnings should be given properly. 3. The tap should be of lever type 4. Provide at least 3 glasses 5. Glasses should be kept at accessible height not higher than 1200mm 6. There should be identification signage to identify the drinking water fountain

4.13 SIGNAGES

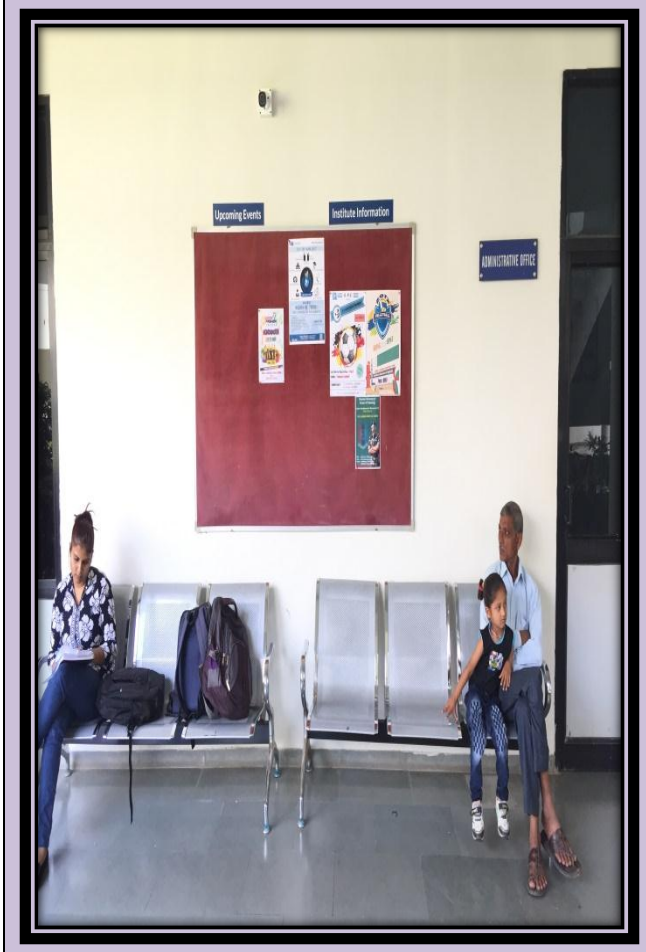

OBSERVATIONS	RECOMMENDATIONS
1. Directional signage are provided in English 2. Available at the entrance lobby only.	1. All signage should be multi lingual and provided in English, Hindi and local language 2. Supplement by a text in embossed letters/ Braille 3. All Braille and tactile signage placed between the height of 900 mm and 1500mm, with ideal location at 1050 mm above the finished floor level

7.14 EMERGENCY EXIT

OBSERVATIONS	RECOMMENDATIONS
1. Fire extinguishers are mounted on the wall at the height lower than 1000mm 2. No emergency exits identified 3. Evacuation plans displayed are not appropriate for persons with disability.	1. The emergency evacuation provision should consider people with disabilities 2. There should be a step free or ramped accessible evacuation route identified leading to the exit or the ramp or to the refuge area 3. The emergency exits should be clearly marked with directional arrow signs 4. The fire extinguishers should be fixed at the height between 1000mm and 1500mm 5. The alerting system should be

	provided, both visual and audible 6. The alerting buttons should be between 600 mm and 1200mm from the floor and have a high contrast with the background wall 7. A refuge area identified should be signposted for wheelchair users 8. There should be a directional signage leading to the refuge area and the evacuation plans have the refuge area marked on them 9. All emergency and directional signage should be accessible 10. There should be an audio and visual two way communication system in the refuge area at the height of 1000mm 11. Evacuation plans should be prominently displayed on all floors 12. The evacuation plans and building maps should be available in tactile Braille formats 13. The accessible evacuation route and the refuge points should be shown on the plan 14. The plan should have 'you are here' point identified on it 15. The plan should contrast well with the background wall 16. The Staff should be trained to assist persons with disabilities in evacuation 17. There should be evacuation chairs available 18. There should be smoke barriers around the refuge area that can hold the smoke for at least one hour
3.15 PUBLIC TELEPHONES	
OBSERVATIONS	**RECOMMENDATIONS**
1. Not available	1. Not applicable

3.16 RESTING FACILITIES

OBSERVATIONS	RECOMMENDATIONS
1. Available at ground floor only 2. Not available at every 30 m interval in all corridors 3. Height of chairs- 400mm 4. Space is not identified for wheelchair	1. Recommended height of chairs is between 450-480 mm 2. If possible, provide chairs of appropriate design at every 30m interval in all corridors 3. Identify space for wheelchair

Dear All,

Under the aegis of Equal Opportunity Cell (EOC), CHARUSAT, Department of Information Technology , has arranged competition of **" MAKING OF RECYCLE PRODUCT" -** with the following details :

About the Competition:

The "Equal opportunity cell , making of Recycle Product , is organized by , Equal opportunity cell at CHARUSAT.

Eligibility:

Open to all CHARUSAT Current Undergraduates, Post Graduate Students. The Competition is not eligible to employees of CHARUSAT. Equal opportunity and CHARUSAT cell reserve the right to disqualify entries that do not meet the eligibility terms and conditions of the Competition.

Duration of Competition:

The Competition begins at 10.00 a.m on 21st February , 2016 to 10th March, 2017 11.59 p.m. No entry will be considered after 10th March, 2017 .

Joining the Competition:

Participants can submit Product as an individual or as Group Entry. Participants are allowed to submit a maximum of 2 entries. The Contest is free of charge for the participants.

Submission Guidelines for Submit a Product :

Ø Product should correspond to the concept of Recycle .

Ø Your product weight cannot be more than 10kg.

Ø Preferably related to the use of waste material.

Ø Exhibition date and venue will announced later.

Ø No entry will be considered after 10th March , 2017 11.59 p.m.

Selection of Winner:

Winner will select based on following criteria:

Areas	Percentage
Use of Waste Material	40%
Product Feasibility	30%
Usefulness of product	30%

Please click on below link for the registration

https://docs.google.com/a/charusat.ac.in/forms/d/e/1FAIpQLSfVGBeWzuy0kpoBx2QWwpIewCaiFPKnq3auBuqdI4ypIGUoPA/viewform

Students are requested come and meet me at 406B (IT building) after completing their registration.

01/04/2017	10:00 a.m. to 1:00 p.m.	A workshop on Digitalization in India and digital payment	• Personalized counseling • Distributing the pamphlets • Explanation through videos

Summary of the Event (Maximum 200 words):

A workshop on Digitalization in India and digital payment was held at 'Petlad' Village which is approx. 20 km far from CHARUSAT campus. The transportation facility was provided by CHARUSAT from CHARUSAT to Petlad. The students and faculty presented a video regarding the introduction and advantages of digitalization and cashless payment to the school teachers and students of N. K. High School, Petlad. The students explained them about the theme of the event. Then the students counseled the other people in nearby premises and made them aware about various methods and process of cashless transaction. They also distributed pamphlets among them. The faculty member and students also solved the queries. The teachers and parents expressed their positive response towards our activities and appreciated the initiative taken by CHARUSAT and suggested to conduct such programs on grand scale.

NOTICE

EQUAL OPPORTUNITY CELL (PDPIAS)

Event Report

As part of Equal opportunity cell we have arranged an expert talk on

"Gender Equality"

Details of the Expert lecture are as follows

Date of event	24th April, 2017
Time/duration of event	1.15pm -3.00 p.m
Name of event	Expert lecture on Gender Equality
Venue	PDPIAS Conference Hall
Name of Resource person	Dr. (Prof.) Abha J Pandya, Shri I V Patel College of Commerce, Nadiad

All the interested students are requested to register themselves. For registration, please fill up the registration form and submit it duly signed and completed, in all respects, to Dr. Janki Thakker (PDPIAS) or mail the scan copy of form to jankithakker.bt@charusat.ac.in before 23 April, 2017

Janki N Thakker

(EOC coordinator, PDPIAS)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY (CHARUSAT), CHANGA – 388 421

EQUAL OPPORTUNITY CELL

Event Report

Name of Department : PDPIAS

Name of Event : Gender Equality

Date and Time of Event : 24th April, 2017, 1.15 -3.00 p.m.

Event coordinator : Dr. Janki N. Thakker

Resource person details:

Sr. No.	Name of the resource person	Organization of resource person
1	Dr. (Prof.) Abha J Pandya	

Event Schedule:

Date	Time	Session	Activity
24/04/2017	1.15-3.00 pm	one	Expert lecture

Summary of the Event (Maximum 200 words):

Dr. Thakker, introduced the speaker to the participants.

Prof. Abha Pandya discussed various issues related to gender equality

She told how any women struggles throughout her life and faces various types of bias. Men would not be ready to accept of realize about such bias

She was happy to see the boys in gender equality lecture
Giving examples she explained how in Gujarat girls do Gaurivrat and throughout the India Karvachauth is practice.
She also explained how a women is suffering not only because of men but due to other women in professional as well as personal life.
She gave some examples how a girl would not attend class due to illness and remain in the girls room but does not prefer to stay at home due to household work her mother would give.

She also gave example of the research work carried out by her team where all the boys in the primary were healty but 80 % girls were malnourished. She gave many such examples and made all of us aware about how very small practice in day to day life can be useful for creating gender equality example male and females seating together for lunch and dinner etc

At the end, I and students gave their feedback about the session.
I thanked Dr. Abha and told her to have such future interactiosn

Total 45 students attended the session
At the end students filled the feedback forms.
After analysis of feedback forms, it indicated that

- They found relevant to their needs to some extend and some of them found

very releavent

- Students found content to be good
- Students also found the facilitator very entusisastic, with good communications skills, timely managed. Most of them found these qualities excellent
- Students rated the overall program very good

HOLISTIC EXPOSURE LEARNING PROGRAMME (HELP) – SEPTEMBER 07, 2016

Holistic Exposure Learning Programme 2016-17 (HELP)

HELP is aimed to provide the students exposure to management concepts through its unique model of "Learning by doing" in societal setting /open system through field based activities wherein personal interactions and observations are focused and students are equipped to develop an understanding about the needs of various stakeholders of the society. It is also aimed to help students to liaise with and understand management models practiced by various agencies like Government, local bodies, private institutions, NGOs etc.

In order to deal with humans and deliver to the humans in particular and society in general; the model is implemented with the help of faculty members and all students belonging to various programmes including UG and PG students. This year on September 7, 2016, as a part of ***Holistic Exposure Learning Programme*** **(HELP)**

- MBA and PGDM Programmes (Batch 2016-18) students were on field visit under Phase - III of their *Orientation Programme* which consist of community outreach activities.
- MBA and PGDM Programmes (Batch 2016-18) and BBA Programme (Batch 2016- 19) students had Pre-Mentor–Mentee interactions.
- MBA and PGDM Programmes (Batch 2015-17) and BBA Programme (Batch 2014-17/19, 2015-18/20) students got a platform for open exchange of academic and nonacademic discussions with their mentors (faculty members) under Mentoring Programme.
- MBA | PGDM and BBA Programmes" Second and Third year (respectively) students got opportunity to interact with First year students and impart the culture of the institute in general and management practice in particular.
- Ten teams (consisting of Faculty Member and Students of MBA, PGDM and BBA Programmes) total 472 students approached to approximately 5,000 households of 100 villages in the state of Gujarat.
- Interactions with I2IMites,
- ***Under Prayaas - an I2IM initiative for community services:***
- To create / increase awareness about CHARUSAT, CHRF-CHARUSAT HOSPITAL ***among 5000 households of 100 Villages of Gujarat State.***
- To profile populations / households in terms of age, education, occupation, diseases prevalent / contracted, annual income, monthly expenses, spending on healthcare, etc.
- To practice management through concept of ***'Learning by doing'*** in societal setting / open systems.
- To develop an understanding about needs of various stakeholders of the society through personal interactions and observations based on field visits.
- Learning to liaise with and understand management models practiced by various agencies like Government, local bodies, private institutions, NGOs, etc.

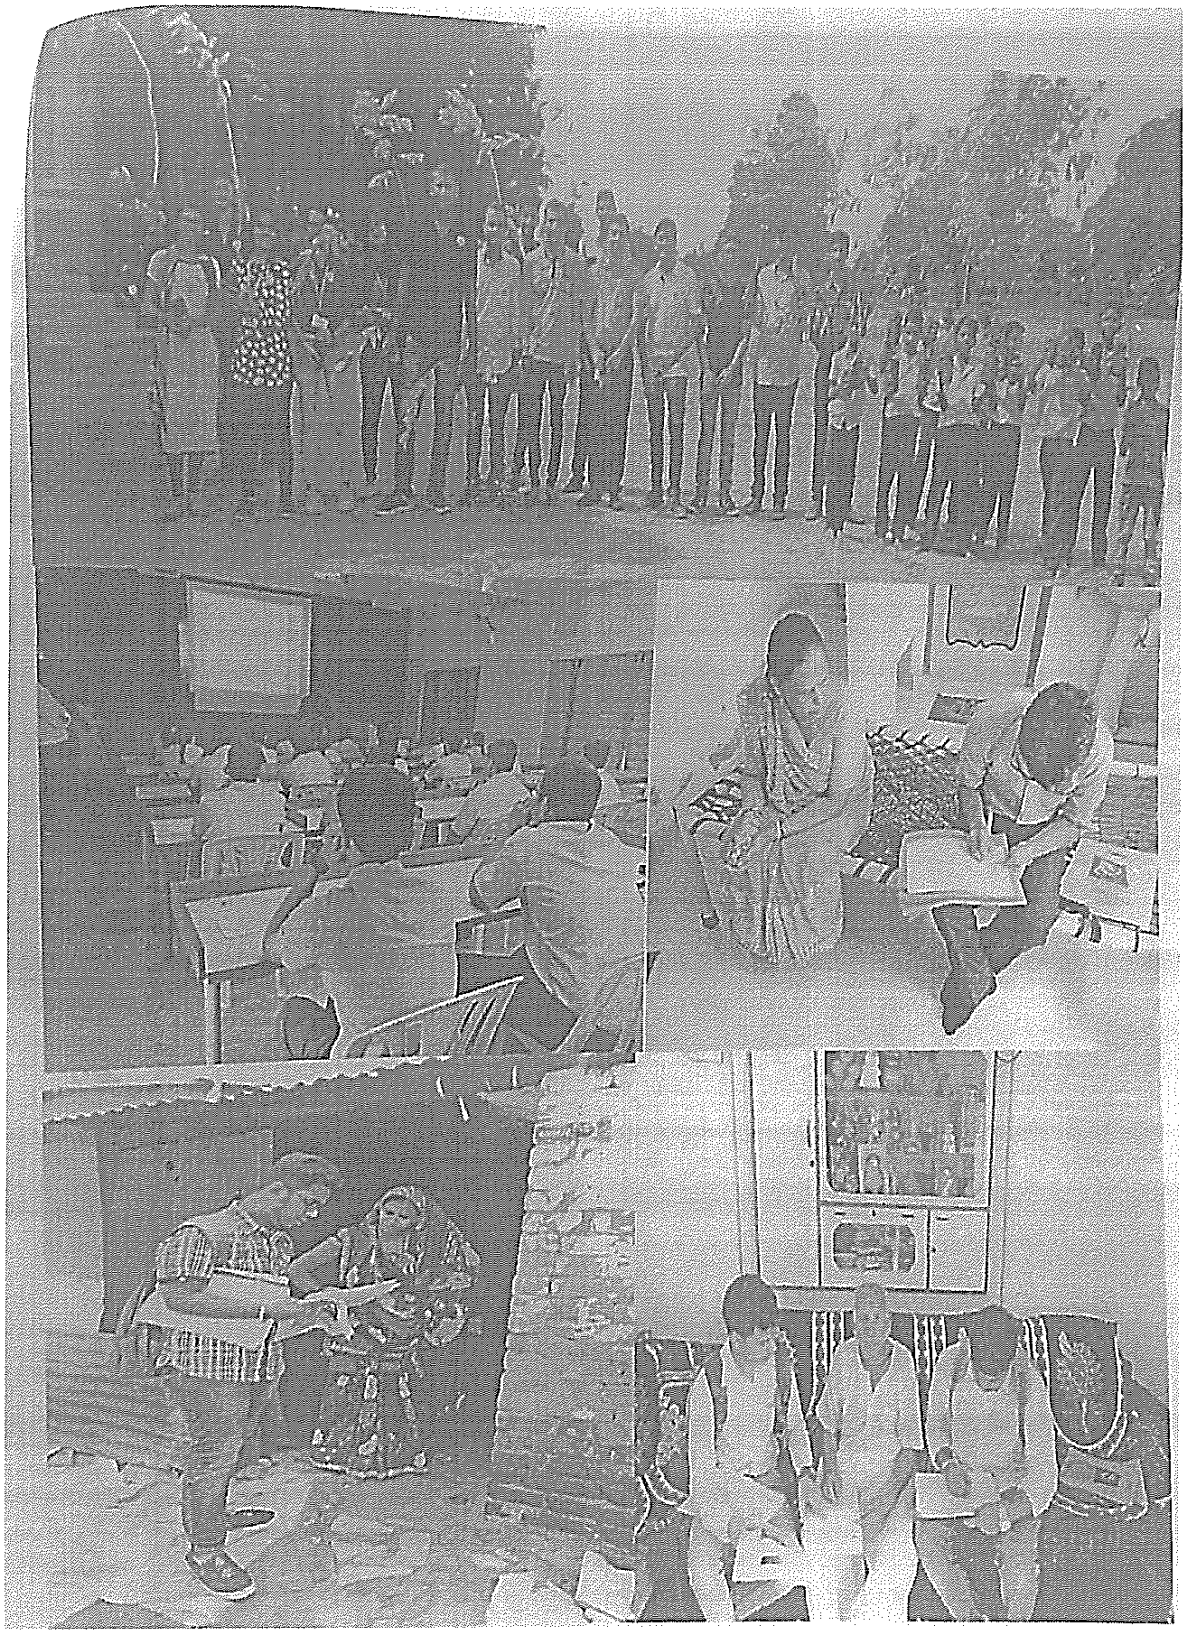

INDUKAKA IPCOWALA INSTITUTE OF MANAGEMENT ★ CHARUSAT CHANGA

- To develop knowledge, skills and attitude among all aspiring managers' undertaking management education / training at I2IM.

Date: 14/06/2017 **Day: Wednesday Timings: 9 a.m. to 3 p.m.**

I. Introduction:

We the students of Manikaka Topawala institute of nursing, celebrating "International blood donor day" on 14th June , 2017 in the remembrance of **Karl Landsteiner** by organizing poster exhibition and role play with the goal to create awareness about blood donation.

We the group of 30 students from 6th semester, 3rd year B Sc nursing along with the faculty of pediatric and child health nursing have contributed our efforts and ideas to make this event a successful one and to spread awareness among people through poster exhibition and role play. This is a report describing overall events organized on international blood donor day.

World Blood Donor Day is celebrated every year by the people in many countries around the world on 14th of June. World Blood Donor Day is celebrated every year on the day of birthday anniversary of Karl Landsteiner on 14th of June in 1868. This event celebration was first started in the year 2004 aiming to raise the public awareness about the need for safe blood donation (including its products) voluntarily and unpaid by the healthy person. Blood donors are the key role player at this day as they donate life-saving gifts of blood to the needed person.

It was first initiated and established to be celebrated annually on 14th of June by "the World Health Organization, the International Federation of Red Cross and Red Crescent Societies" in the year 2004. World Blood Donor Day was officially established by the WHO with its 192 Member States in the month of May in 2005 at the 58th World Health Assembly in order to motivate all the countries worldwide to thank the blood donors for their precious step, promote voluntary, safe and unpaid blood donations to ensure the sufficient blood supplies. World Blood Donor Day celebration brings a precious opportunity to all donors for celebrating it on national and global level as well as to commemorate the birthday anniversary of the Karl Landsteiner (a great scientist who won the Nobel Prize for his great discovery of the ABO blood group system).

WHY WORLD BLOOD DONOR DAY IS CELEBRATED

World Blood Donor Day is celebrated to fulfill the need of blood transfusion and blood products transfusion to the needed person anywhere in the world. This campaign saves more

than millions of lives annually and gives a natural smile on the face of blood receiver. Blood transfusion helps patients suffering from variety of life-threatening health conditions and stimulates them to live longer and quality life. It solves the lots of complex medical and surgical procedures all around the world. This campaign plays a great life-saving role for caring the women during pre and post pregnancy.

The celebration of World Blood Donor Day 2013 was hosted by the France "through its national blood service, the Establishment Français du Sang (EFS)". France is involved in the promotion act of voluntary and unpaid blood donation since 1950s. The slogan of the year 2013 celebration was "Give the gift of life: donate blood" when it has celebrated its 10th anniversary focusing the value of blood donation to the patient.
Donated blood are used to save lives of severely anemic women, anemic kids, accident victims having excess blood loss, surgical patients, cancerous patients, thalassemia patients, people suffering from the hemophilia, sickle cell anemia, blood disorders, blood clotting disorders and many more.

Places devoid of an adequate blood supply face many life-threatening challenges during the arrangement of sufficient blood for the proper donation. Adequate supply of blood and its products can only be fulfilled by the regular and safe donations by the self motivated, voluntary and unpaid blood donors. Some of the objectives of the World Blood Donor Day celebration are mentioned below:

- World Health Organization is aimed to obtain the sufficient blood supplies from the voluntary and unpaid blood donors all over the world by 2020.
- According to the statistics, it has been noted that only 62 countries are getting sufficient blood supplies from the voluntary and unpaid blood donors whereas 40 countries are still dependent for the blood donations on the patient's family member or paid donors. It is celebrated to motivate voluntary blood donors in rest of the countries worldwide.
- To make the blood donation act a precious gift to the receivers and get new life.
- WHO run this campaign by organizing many activities in all countries highlighting people's stories who need immediate blood donation to continue their heart beat.

- It is celebrated to say lots of thank to the voluntary and unpaid blood donors all around the world for saving millions of lives.
- It is celebrated to fulfill the 100% voluntary and unpaid blood donation need worldwide.
- It is celebrated to motivate blood donors for safe blood donation for saving the life of mothers and babies (country's future).
- It is celebrated to reduce the death rates (mortality rate) because of insufficient blood supply. Approximately 800 women are dying off due to malnourish pregnancy, childbirth-related complications, severe bleeding during or after delivery and etc.
- To motivate voluntary blood donors through educational programmes and campaigns in order to strengthen the blood transfusion services.

II. Agenda: "Don't wait until the disaster strikes" What can you do? Give blood, Give now, Give often.

Date	Time	Venue	Event
14.06.2017	9.00am – 1.00 pm	Basement area of KGPCH	Poster exhibition
14.06.2017	11.30am - 12.30 pm	Reception area of KGPCH	Role play

III.Objectives of the event:

- To make aware the participants about the importance of the voluntary blood donation.
- To successfully achieve the target of Voluntary Blood Donation to fulfill the urgent need of the needy patients.
- To promote and emphasize the self esteem of blood donors through a lot of thanks.
- To motivate and encourage people who are not interested in donating blood even being a healthy person.
- To stimulate people to donate blood voluntarily who are interested in donating blood only to their relatives or friends.

- To sensitize participants regarding importance of blood donation.
- To impart knowledge regarding benefits of blood donation.
- To minimize myths/ misconception regarding blood donation

IV.Participants/Beneficiaries: The parents, care-takes, family members, relatives and family friends, visitors.

V. The Program Details:

The B Sc Nursing 6th semester and faculties of Pediatric Nursing of Manikaka Topawala Institute Of Nursing, Changa, organized , on 14th of April 2017. For that we took permission from Mr Jayant Dhosi sir medical Superintendent KGPCH Vadodara, and also she given permission to conduct the program at open place at near smile OPD. We included nursing faculties & nursing students of MTIN for this program.

The main purpose of this program is imparting the knowledge on sufficient blood supplies from the voluntary blood donors, benefits of blood donation; motivate voluntary blood donors through educational program and campaigns in order to strengthen the blood transfusion services.

Venue: The event was planned for one day at **Near Smile OPD** of KGPCH Vadodara, **On the Wednesday (14/06/2017)**.

There are eight official global public health campaigns marked by World Health Organization (WHO) such as World Health Day, World Tuberculosis Day, World Immunization Day, World Malaria Day, World No Tobacco Day, World Hepatitis Day, and World AIDS Day. **World Blood Donor Day is one of those eight campaigns. 14th June of every year is celebrated as World Blood Donor Day (WBDD) since 2004**. This day was established by WHO in 2004, with the intention of creating awareness of the need for safe blood and blood products. WBDD is celebrated to thank blood donors for their voluntary, life-saving gifts of blood on the day of the birth anniversary of Karl Landsteiner. He was the great scientist who won the Nobel Prize for his great research of ABO blood group system.

Every year our country requires 5 crore units of blood, from which only 2.5 crore unit of blood is available. Blood is the key for a healthy body. After any accident or injury to a person there is a big blood loss and at such situations, it is needed that the blood of same blood group should be available. If people donate blood then it will help many lives. **The**

World Blood Donor Day has a motto to spread awareness of the importance of donating blood and encouraging people to donate blood.

The WBDD is celebrated to thank and appreciate the blood donors all over the world. The WHO celebrates this day by arranging different activities in many countries for the voluntary and unpaid blood donors. **Another goal of celebrating this day is to fulfill the 100% need of blood donation worldwide.** Donating blood will save many people's lives who are at the point where they can die because of the lack of blood. Approximately 800 women are dying off due to malnourish pregnancy, childbirth-related complications, severe bleeding during or after delivery etc.

The World Blood Donor Day is celebrated by arranging many activities like events, meetings, discussion, debates, and competitions like quiz, speech, essay writing, elocutions etc. in public places, school, colleges at national and international level.

On the day of 14th June 2017, planned to organize awareness program on voluntary blood donation through poster and health skit. The posters are prepared on in different area blood donation information like what is blood donation, importance of blood donation, theme of blood donation 2017, and some blood donation slogan are selected for poster.

Total 16 poster were prepared by eight groups and two members in each groups, here each groups students has allotted a topic to prepare the poster, the instruction is given about criteria to prepare the posters. All posters are informative, clear and participants received a message about blood donation and its importance.

On the international blood donation day morning we reached at 8 am and started to arrange for poster exhibition at KGPCH basement floor, prior permission is taken from Dr Jayant Dhosi sir. All posters were displayed well in arranged place, exhibition place is had good ventilation, light and it more place to occupy large number of participants at time of exhibition.

Students were placed for interactions with participants for discussions about poster and importance of blood donation; each poster is providing information about blood donation. Students are actively participated in poster exhibition which was helped to participants to change their concept on blood donation, participants were shown positive response to blood donation. By this we can analyze the awareness program were changed knowledge and attitude of participants on voluntary blood donation.

The following are the posters prepared by the students:

- A poster on introduction of international blood donor and theme.

- A Poster on questions to be asked to donor.
- A Poster on benefits of blood donation.
- A poster on criteria for blood donation.
- A Poster on criteria for condition in which blood cannot be donated.
- A poster on after care of blood donation
- A poster showing details of nearby blood banks in Vadodara.

Following were the slogans used in posters:

- "Save a life give blood"
- "every unit donated can save or improve lives of up to 3 people"
- "if you donate money you give food but if you donate blood you give life"
- "Blessed are the young who can give back their life with their blood"
- "1 pint can save 3 lives, give blood, give life, get a free t-shirt"
- "Every 2 seconds someone needs blood. Take a break and donate"

Role play:

After completing the poster exhibition all gathered outside the blood bank and arranged setup for role play. Students performed the skit of 10 minutes and shared the important points regarding blood donation.

In the skit there were 20 characters distributed among 20 students. The main concept of the skit was based on the importance and benefits of blood donation. Some characters used in the skit are the following:

Nurse, doctor, blood donor, village people playing role of showing misconception regarding blood donation and friends playing role showing positive aspect of blood donation.

The skit was divided into 2 scenes, one showing negative aspect of not donating blood that leads to loss of life. The second scene showing the positive aspect by donating blood and saving life.

After completing skit each student uttered one slogan and ended up the skit. We successfully have come up with the good outcome. The visitors are able to understand the importance of blood donation and some were ready to voluntarily donate the blood and the objectives were fulfilled with this organized program.

VI: Feedback Analysis report:

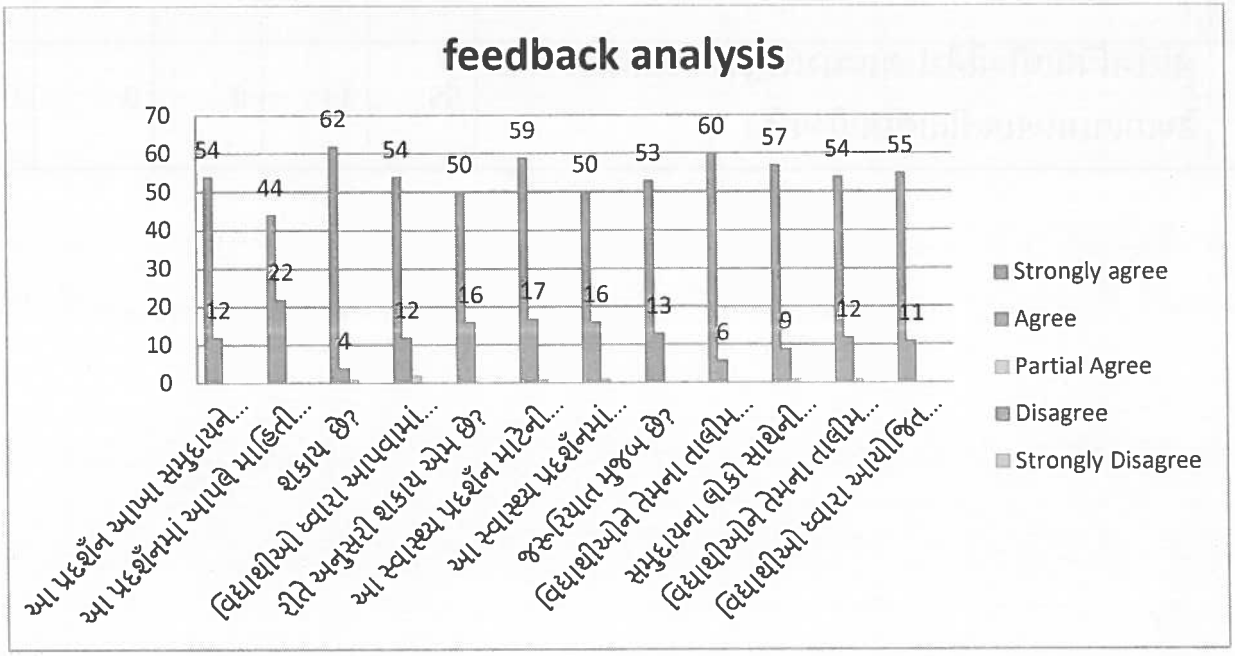

A) 65 participants were participated in this program.

B) Table of feedback form with number of participants' response in each category.

Conclusion:-

The program was more informative to the participants. Through this exhibition they gained much knowledge about voluntary blood donation also changed their perception and attitude. According to feedback of participants and beneficiaries the awareness program was found effective and fruitful.

So for the awareness program is concluded with **"Save a life give blood"**

Date: 29/04/2017 **Day: Saturday** **Timings: 9 a.m. to 3 p.m.**

I. Introduction:

An Awareness programme on Geatstational Diabetes and Glucose tolerance test was conducted Obstetric and gynecological department of V S Hospital, Ahmadabad.

II. Agenda: Health awareness programme on "Gestational Diabetes and Glucose tolerance test".

III. Objectives of the event:

- To create awareness about gestational diabetes among antenatal mothers
- To educate and demonstrate importance of oral glucose tolerance test.

IV. Beneficiaries:

The antenatal mothers, postnatal mothers, women with problems related to gynecology and their relatives.

V. Event

The event was planned for one day at Outpatient department of obstetrics and gynecological Department of V S Hospital at Ahmadabad. We have taken permission from Ms.Parul Shah Madam(HOD of Gynec and obstretrics) and Mira Madam to conduct the programme at OPD area prior to date of event.

Gestational diabetes can cause the fetus to be larger than normal. Delivery of the baby may be more complicated as a result. The baby is also at risk for developing low blood glucose (hypoglycemia) immediately after birth. It occurs in about 4% of all pregnancies. It is usually diagnosed in the later stages of pregnancy and often occurs in women who have no prior history of diabetes. In V S hospital in OPD department we get a huge crowd of Antenatal mothers and their relatives. Planning health awareness programme on gestational diabetes and glucose tolerance test is significant for beneficiaries.

On Saturday (29/04/2017)

The theme was

1. Gestational Diabetes
2. Glucose tolerance test.

We prepared and arranged the programme at Outpatient department of V S hospital on Saturday. We have distributed group of students in two groups. One group was assigned gestational diabetes and the other group was assigned glucose tolerance test. We had allotted students to educate each aspect with well preparation of content and posters. Some students were assigned for collecting feedbacks and some students were managing the crowd.

We have invited Ms. Mira Patel, Nursing superintendent to inaugurate the exhibition. The posers on the theme of gestational diabetes and glucose tolerance test was arranged in the manner of

1. The definition of gestational diabetes

   The diabetes occurs during pregnancy.

2. Risk factors

   Under risk factors we educated about

   a) Mother older than 25 when you are pregnant
   b) Have a family history of diabetes
   c) Gave birth to a baby that weighed more than 9 pounds or had a birth defect
   d) Have high blood pressure
   e) Have too much amniotic fluid
   f) Have had an unexplained miscarriage or stillbirth
   g) Were overweight before your pregnancy

3. Causes

   They explained them that GDM is arised because the many changes, hormonal and otherwise, that occur in the body during pregnancy predispose some women to become resistant to insulin. Insulin is a hormone in the pancreas that allows the body to effectively metabolize glucose for later usage as fuel (energy). When levels of insulin are low, or the body cannot effectively use insulin (i.e., insulin resistance), blood glucose level rise.

4. Signs and symptoms

   Under this educated mothers about

   - Blurred vision
   - Fatigue
   - Frequent infections, including those of the bladder, vagina, and skin

- Increased thirst
- Increased urination
- Nausea and vomiting
- Weight loss despite increased appetite

5. Diagnostic tests

   We had done the Demonstration of oral glucose tolerance test.

6. Therapy

   Under this we educated them that the goals of treatment are to keep blood sugar (glucose) levels within normal limits during the pregnancy, and to make sure that the growing baby is healthy.

7. Home care

   Home care needs specially education about diet. So following points included in diet education.

   a) Eating a variety of foods is recommended, and it is better to eat smaller portions throughout the day (e.g. 3 small to moderate meals and 2-4 snacks) rather than just a few large meals.

   b) Many women with gestational diabetes will be advised to eat fewer carbohydrates than in their normal diet and to eat complex carbohydrates that contain fiber. It's important to limit consumption of foods containing large amounts of simple sugars.

   c) High-fiber foods like fresh fruits and vegetables, as well as whole-grain products, are not only nutritious but also effective in keeping blood sugar levels stable.

   d) Skipping meals is not recommended because this leads to undesirable fluctuations in blood sugar levels.

8. Complications of gestational diabetes.

   a) Women with gestational diabetes have a greater chance of needing a Cesarean birth (C-section), in part due to large infant size.
   b) Gestational diabetes may increase the risk of preeclampsia, a maternal condition characterized by high blood pressure and protein in the urine.
   c) Women with gestational diabetes are also at increased risk of having type 2 diabetes after the pregnancy.

All the posters were prepared with visual images and in Guajarati as it will be easy to understand for local people. For glucose tolerance test we arranged demonstration. We demonstrated procedure of doing GTT. We explained them first importance of doing OGTT. Then we explained following points to prepare for OGTT.

- Eat a balanced diet that contains at least 150 grams (g) of carbohydrate per day for 3 days before the test.
- Fruits, breads, cereals, grains, rice, crackers, and starchy vegetables such as potatoes, beans, and corn are good sources of carbohydrate.
- Do not eat, drink, smoke, or exercise strenuously for at least 8 hours before your first blood sample is taken.

- Then we explained the procedure of OGTT. That she will be asked to drink a sweet liquid containing a measured amount of glucose. It is best to drink the liquid quickly. For the standard glucose tolerance test, you will drink 75 grams.Blood samples will be collected at timed intervals of 1, 2, and sometimes 3 hours after she drink the glucose. Blood samples may also be taken as soon as 30 minutes to more than 3 hours after she drink the glucose.
- A blood glucose level of 140mg/dL or higher on this test will identify 80% of women with gestational diabetes. When that cutoff is lowered to 130mg/dL, the identification rate increases to 90%. Women who had a level of blood glucose greater than 130 mg/dL are typically recommended to take another diabetes screening test that requires fasting (not eating anything) before the test.

Large groups of antenatal, postnatal mothers and their relatives were invited to attend the sessions in groups. The beneficiaries are well explained by our students in detail on mentioned areas. Our team was ready to explain them if they raised any doubts.we conducted the session up to 1 pm. Then we winded up. The event was successful as we could educate larger group of beneficiaries and created awareness about GTT.

Feedback Analysis report:

VI. Conclusion

The awareness programmed on gestational diabetes and glucose tolerance test was successful. We had the opportunity to educate needed beneficiaries at V S Hospital, Ahmedabad. We are very much thankful to our Respected Principal, Anil Sir, Anjali Madam for giving great guidance and support. We are also thankful to Mira Madam(Nursing Superintendent) of V S Hospital for giving us permission and support to conduct the programme.

Students are educating the Visitors of the exhibition

Health Awareness Program gestational diabetes and glucose tolerance test

Date: 21/04/2017 **Day: Friday** **Timings: 9 a.m. to 3 p.m.**

I. Introduction:

The exhibition is focused on prevention and management of common illness which are major responsible for mortality and morbidity among under five children. The common illness are responsible for mortality and morbidity are **malnutrition, respiratory infection, diarrhea and dengue fever.** More than half of under-5 child deaths are due to diseases that are preventable and treatable through simple, affordable interventions. Most of these illness are preventable by simple measures like personal hyiegene, food hyiegene, safe drinking water, regular vaccination , proper sanitations and etc.

The B.Sc. Nursing 6th semester and faculties under Department of Pediatric Nursing of Manikaka Topawala Institute of Nursing, Changa have organized a health awareness exhibition on 21th of April 2017. For that we took permission from Mrs Meeraben Patel,Nursing Superintendent V. S. Hospital. We included nursing faculties & nursing students of MTIN for this program.

KEY FACTS

- million children under the age of 5 years died in 2015.
- more than half of these early child deaths are due to conditions that could be prevented or treated with access to simple, affordable interventions.
- Leading causes of death in children under 5 years are preterm birth complications, pneumonia, birth asphyxia, diarrhea and malaria.
- About 45% of all child deaths are linked to malnutrition.

II.Agenda: "Prevention And Management Of Common Childhood Disorders"

III.Objectives of the event:

- To create awareness regarding a common childhood illness.
- To help parents to understand and identify symptoms of common childhood disorders.
- To impart knowledge among participants through exhibition on prevention and management of childhood illness.

IV. Participants/Beneficiaries: The parents, care-takes, family members, relatives and family friends, visitors.

V. The Program Details:

The B Sc Nursing 6th semester and faculties of Pediatric Nursing of Manikaka Topawala Institute Of Nursing, Changa, organized , on 21th of April 2017. For that we took permission from Ms Meeraben Patel nursing Superintendent V S Hospital, and also she given permission to conduct the program at open place at near surgical ward. We included nursing faculties & nursing students of MTIN for this program.

The main purpose of this program is imparting the knowledge on common preventable and home manageable diseases among under five children. Selected topics for health education are **malnutrition, respiratory infections, diarrheal disorders, and dengue fever.**

Venue: The event was planned for one day at **Near Pediatric Surgical Ward** of V S Hospital at Ahmadabad. **On the Friday (21/04/2017)**

Under-five children's are more susceptible to acquire infections due to low immunity, unhygienic practices, irregular health check up, improper immunization, malpractices and misbelieves, lack of knowledge about food and nutrition, safe drinking water. So these are the important reasons to conduct health exhibition program

Health exhibition is method which can changes the behavior and attitude of participants on health. Its helps them to concentrate on primary prevention of diseases. It also helps them to change in daily life style modification. By the help of these kind program they can identify the causes, factors affecting health, risk factors,

Total 30 students were participated, the students are equally divided in four groups, each group allotted a topic **(Group-I: Malnutrition, Group-II: Respiratory Diseases, Group-III: Diarrheal Disorders, Group-IV: Dengue Fever)**. Instruction given to group members regarding content for health education is to cover introduction to topic, causes and risk factors, clinical features, preventive measures, home care management, proper treatment, immunization, follow-up. According instructions the students are prepared about 47 charts, all chats well and good with more informative, covered most content from topic. We received appreciation from nursing superintendent regarding selection of topic and contents.

At 8 am started for preparation and arrangement of program. The students posted the banner and charts on theme of exhibition. The program was inaugurated by Ms Meeraben Patel, Nursing superintendent at 9:30 am. Program was started by introducing the program schedule and the objectives of the program. Nursing superintendent madam had discussion with all group students, madam asked many questions to students regarding content and topic of each posters and she is impressed students answers and appreciated to all students.

The first group was dealing with malnutrition in children. Students shown charts on types of malnutrition and sign symptoms of malnutrition. Students discussed regarding protein energy malnutrition i.e. kwashiorkor and marasmus. They focused on etiological factors, clinical features, diagnostic evaluation system and follow up along with prevention from protein energy malnutrition. Students majorly stressed on dilatory sources and supplements for protein sources in both vegetarian and non-vegetarian foods and recommended daily announces of protein.

Students also educated public on sources and recommended daily allowances of carbohydrate. Students explained about disorders of carbohydrate deficiency and excess levels of serum carbohydrate. They explained about dilatory sources and supplementation of carbohydrate along with recommended daily allowance and menu planning for adequate dilatory supplementation of carbohydrates.

In the next segment of exhibition students took an account of vitamin deficiency disorders. The explained about both fat soluble and water soluble vitamins. Students explained about vitamin A, its dietary sources in both vegetarian and non-vegetarian foods, it's function's in body and regarding it's deficiency symptoms in both ocular and extra ocular form. In continuation to this students explained about vitamin D and it's forms, it's diatary sources in both vegetarian and non-vegetarian foods, it's function's in body and regarding it's deficiency symptoms.

In the next segment of exhibition students explained about vitamin E it's dietary sources in both vegetarian and non-vegetarian foods, it's function's in body and regarding it's deficiencies symptoms. The section was continued by description of diatary sources and deficiency disorders of vitamin K. continuation to this students explained about water soluble vitamins i.e. vitamin C and major vitamin B group (B1, B2, B6, B12).

In next segment students discussed about government schemes and services for prevention of malnutrition among children's, it's services and facilities. Students described about Hyderabad mix, it's ingredients, importance, preparation methods, utilization and commercial availability.

Students explained basic health needs and nutritional needs required to sustained growth and development of children. They stressed upon the need of balanced diet and nutritional components of day to day menu planning for meeting the demand of child. In major disorders occurring in children diarrhea was considered as one of the leading cause of childhood morbidity and mortality.

One of the major cases in childhood disorders is malnutrition whish composed of various disorders like protein energy malnutrition including kwashiorkor and marasmus. Students

explained about common nutritional deficiency disorders, there possible Etiology and sign-symptoms. The diagnostics and identification at domestic level was major concern. Students explained diatory sources of various nutrients along with basic recommended daily allowances (RDA) along with menu planning in health and illness.

Students explained about government services and programs concerned with malnutrition and it's prevention. They explained about various diatory sources of nutrients along with Government and NGO services to eradicate malnutrition from country. In further continuation of exhibition students took an account of respiratory disorders. They explained about normal anatomy and physiology of respiratory system and common etiological factors of respiratory disorders. Students explained droplet infections, genetic predisposition and other causes of respiratory disorders. Students explained about bacteria and viruses which may cause respiratory disorders. In continuation to this, students explained common sign and symptoms of respiratory infection disorders.

Students explained about normal anatomy and physiology of respiratory system. They Explained common disorders of respiratory system inn both upper and lower respiratory tract. They covered the etiological and contributory factors for respiratory diseases. Students educated visitors regarding treatment options and therapies along with preventive measures from respiratory disorders.

The next segment of exhibition was on diarrhea and it's preventive and curative measures. Students hear explained about fluid and electrolyte balance and it's imbalance effects on body. Students explained the transmission of organism causing gastrointestinal track disturbance. Identification of various signs and symptoms of GI disturbances along with management of diarrheal disorders. In management of diarrheal disorders they included preparation and administration of oral rehydration solution by both readymade sachets and domestic preparation methods. Along with ORS students explained various other management techniques viz fluid and electrolyte supplementation, dietory modification, medication, juices and other home remedies for recovery of fluid loss in diarrhea. In next segment students explained administration of drugs at domestic set up. They included instillation of eye drops, ear drops, nasal drops and other routs of drug administration at home.

In continuation next part was regarding mosquito born diseases and major concern was on dengue and malaria, it causes, sign and symptoms, diagnostic measures, and treatment option with most emphasize on preventive aspects by using various tools like mosquito net, mosquito repellent creams etc.

At the end of exhibition all visitors were requested to provide there feedback. As per the feedback the exhibition was found extreme effective and useful and suggested to carry out such programes on frequent basis

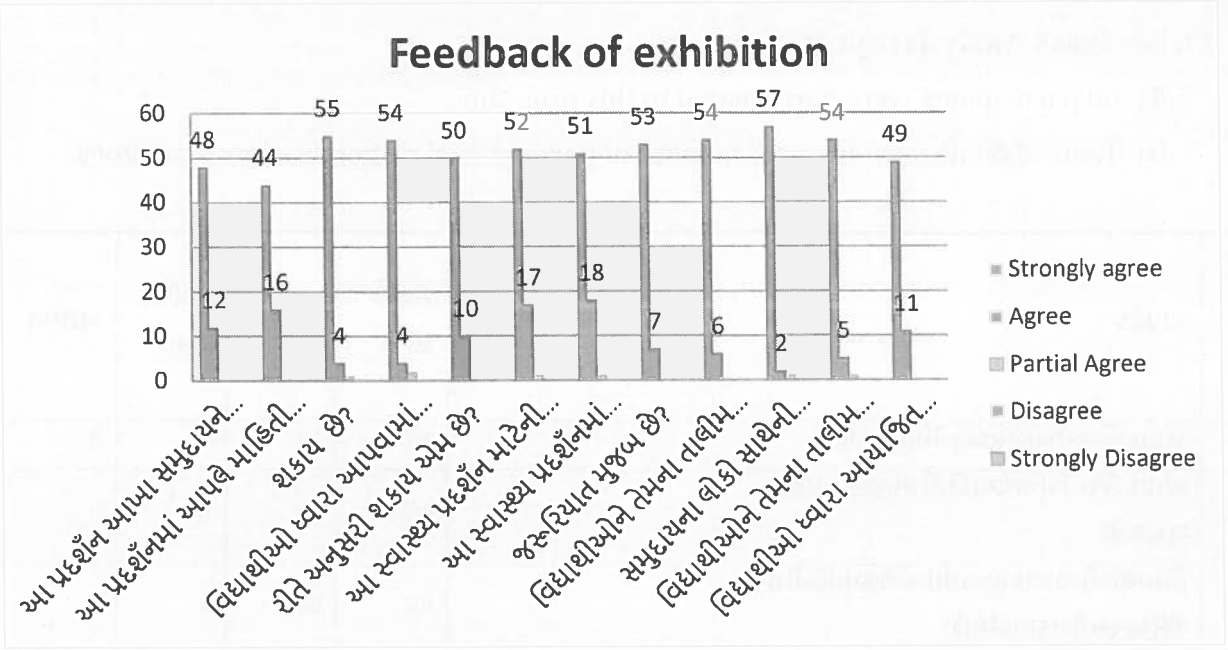

VI: Feedback Analysis report:

A) 60 participants were participated in this program.

B) Table of feedback form with number of participants' response in each category.

Conclusion:-

The program was more informative to the parents, care takers and family members. Through this exhibition they gained much knowledge about some of common diseases among under five children and also changed their perception on health practice. The exhibition shown simple steps of preventive measures of diseases is minimizes a severity of illness. According participants and beneficiaries the exhibition was found effective and fruitful.

So the health education cum exhibition is concluded with....

*****"**Prevention is Better Than Cure**".******

Date: 13/04/2017 **Day: Thursday** **Timings: 12 noon to 1 pm**

I. **Introduction:**The communityhealth nursing department of Manikaka Topawala Institute of Nursing displayed an exhibition on 13thApril 2017 at Primary Health Centre, Nar village.

II. **Agenda:**Exhibition on Diabetes, Anemia and Hypertension

III. **Objectives of the event:**

a) Introduction to the topic.
b) Definition of Diabetes, Anemia and Hypertension
c) Precautions to be taken to avoid such diseases
d) Complications of Diabetes, Anemia and Hypertension

IV. **Participants/Beneficiaries:**Community people of Nar village

V. **In detail explanation of the event with colored print of photographs**

The students of 4th semester B.Sc. Nursing and 3rd year GNM of Manikaka Topawala Institute of Nursing, CHARUSAT exhibited posters related to Diabetes, Anemia and Hypertension at PHC, Nar village. The objective of the event was to educate the village dwellers about the dangers of being affected by Diabetes, Anemia and Hypertension, the precautions to be taken to avoid the diseases and care if at all the disease occurs. About 30 students prepared posters of various sizes, designs and shapes to increase the aesthetic value of the exhibits. The audience consisted of children, adults, old age people as well as staff of Nar PHC. About 60 people came to see the exhibits. The students had made posters defining Diabetes, Anemia and Hypertension respectively, diet to be taken by patients affected by such disease conditions, precautions to avoid such diseases and treatment available for the said diseases. The Medical Officer of Nar PHC Dr Manish Shah inaugurated the function. Subsequently the entire staff of the PHC came to see the displays. Later during the day a number of village dwellers came to witness the posters. The staff of the PHC appreciated the efforts of the students. The villagers were pleased to have the view the posters and learnt a great deal from the exhibition.

Diabetes Mellitus

Diabetes Mellitusis a metabolic disorder characterized by the presence of chronic hyperglycemia either immune-mediated (Type 1 diabetes), insulin resistance (Type 2), gestational or others (environment, genetic defects, infections, and certain drugs). According to International Diabetes Federation Report of 2011 an estimated 366 million people had DM, by 2030 this number is estimated to almost around 552

million. There are different approaches to diagnose diabetes among individuals, The 1997 ADA recommendations for diagnosis of DM focus on fasting Plasma Glucose (FPG), while WHO focuses on Oral Glucose Tolerance Test (OGTT). This is importance for regular follow-up of diabetic patients with the health care provider is of great significance in averting any long term complications.

Some of the symptoms include weight loss, polyurea, polydipsia, polyphagia, constipation fatigue, cramps, blurred vision, and candidiasis. Long lasting type 1 DM patients may susceptible to microvascular complications; and macrovascular disease (coronary artery, heart, and peripheral vascular diseases).

Most cases are diagnosed because of complications or incidentally. Carries a high risk of large vessel atherosclerosis commonly associated with hypertension, hyperlipidaemia and obesity. Most patients with type 2 diabetes die from cardiovascular complications and end stage renal disease. Geographical variation can contribute in the magnitude of the problems and to overall morbidity and mortality.

Type 1 Diabetes is characterized by autoimmune destruction of insulin producing cells in the pancreas by CD4+ and CD8+ T cells and macrophages infiltrating the islets. Several features characterize type 1 diabetes mellitus as an autoimmune disease.

The identification of patients with diabetes or pre-diabetes by screening allows for earlier intervention, with potential reductions in future complication rates, although randomized trials are lacking to definitively show benefit. The patient described in the vignette has risk factors (obesity, hypertension, and a family history of diabetes) and should be screened. About 25% of patients with type 2 DM already have microvascular complications at the time of diagnosis suggesting that they have had the disease for more than 5 years at the time of diagnosis. As a result there are different approaches to diagnose diabetes among individuals.The goals in caring for patients with diabetes mellitus are to eliminate symptoms and to prevent, or at least slow, the development of complications. Microvascular (ie, eye and kidney disease) risk reduction is accomplished through control of glycemia and blood pressure; macrovascular (ie, coronary, cerebrovascular, peripheral vascular) risk reduction, through control of lipids and hypertension, smoking cessation, and aspirin therapy; and metabolic and neurologic risk reduction, through control of glycemia.

Hypertension

High blood pressure, also called "hypertension," is a serious medical condition. It happens when the force of the blood pumping through your arteries is too strong.

When your heart beats, it pushes blood through your arteries to the rest of your body. When the blood pushes harder against the walls of your arteries, your blood pressure goes up. Your blood pressure may be different at different times of the day. It is usually higher when you first wake up, after you exercise, or when you are under stress.

Having higher blood pressure for short amounts of time is normal. However, when your blood pressure stays high for most of the time, it can cause serious health problems.

Aneurysms: When an abnormal bulge forms in the wall of an artery. Aneurysms develop and grow for years without causing signs or symptoms until they rupture, grow large enough to press on nearby body parts, or block blood flow. The signs and symptoms that develop depend on the location of the aneurysm.

Chronic Kidney Disease: When blood vessels narrow in the kidneys, possibly causing kidney failure.

Cognitive Changes: Research shows that over time, higher blood pressure numbers can lead to cognitive changes. Signs and symptoms include memory loss, difficulty finding words, and losing focus during conversations.

Eye Damage: When blood vessels in the eyes burst or bleed. Signs and symptoms include vision changes or blindness.

Heart Attack: When the flow of oxygen-rich blood to a section of heart muscle suddenly becomes blocked and the heart doesn't get oxygen. The most common warning symptoms of a heart attack are chest pain or discomfort, upper body discomfort, and shortness of breath.

Heart Failure: When the heart can't pump enough blood to meet the body's needs. Common signs and symptoms of heart failure include shortness of breath or trouble breathing; feeling tired; and swelling in the ankles, feet, legs, abdomen, and veins in the neck.

Peripheral Artery Disease: A disease in which plaque builds up in leg arteries and affects blood flow in the legs. When people have symptoms, the most common are pain, cramping, numbness, aching, or heaviness in the legs, feet, and buttocks after walking or climbing stairs.

Stroke: When the flow of oxygen-rich blood to a portion of the brain is blocked. The symptoms of a stroke include sudden onset of weakness; paralysis or numbness of the face, arms, or legs; trouble speaking or understanding speech; and trouble seeing.

Health care providers work with you to develop a treatment plan based on whether you were diagnosed with primary or secondary high blood pressure and if there is a suspected or known cause. Treatment plans may evolve until blood pressure control is achieved.

If your health care provider diagnoses you with secondary high blood pressure, he or she will work to treat the other condition or change the medicine suspected of causing your high blood pressure. If high blood pressure persists or is first diagnosed as primary high blood pressure, your treatment plan will include lifestyle changes. When lifestyle changes alone do not control or lower blood pressure, your health care provider may change or update your treatment plan by prescribing medicines to treat the disease. Health care providers prescribe children and teens medicines at special doses that are safe and effective in children.

If your health care provider prescribes medicines as a part of your treatment plan, keep up your healthy lifestyle habits. The combination of the medicines and the healthy lifestyle habits helps control and lower your high blood pressure.

Some people develop "resistant" or uncontrolled high blood pressure. This can happen when the medications they are taking do not work well for them or another medical condition is leading to uncontrolled blood pressure. Health care providers treat resistant or uncontrolled high blood pressure with an intensive treatment plan that can include a different set of blood pressure medications or other special treatments.

To achieve the best control of your blood pressure, follow your treatment plan and take all medications as prescribed. Following your prescribed treatment plan is important because it can prevent or delay complications that high blood pressure can cause and can lower your risk for other related problems.

Anemia

Anemia (uh-NEE-me-uh) is a condition in which your blood has a lower than normal number of red blood cells.

Anemia also can occur if your red blood cells don't contain enough hemoglobin (HEE-muh-glow-bin). Hemoglobin is an iron-rich protein that gives blood its red color. This protein helps red blood cells carry oxygen from the lungs to the rest of the body.

If you have anemia, your body doesn't get enough oxygen-rich blood. As a result, you may feel tired or weak. You also may have other symptoms, such as shortness of breath, dizziness, or headaches.

Severe or long-lasting anemia can damage your heart, brain, and other organs in your body. Very severe anemia may even cause death.

The three main causes of anemia are:

- Blood loss
- Lack of red blood cell production
- High rates of red blood cell destruction

The most common symptom of anemia is fatigue (feeling tired or weak). If you have anemia, you may find it hard to find the energy to do normal activities.

Other signs and symptoms of anemia include:

- Shortness of breath
- Dizziness
- Headache
- Coldness in the hands and feet
- Pale skin
- Chest pain

These signs and symptoms can occur because your heart has to work harder to pump oxygen-rich blood through your body.

Dietary Changes and Supplements

Low levels of vitamins or iron in the body can cause some types of anemia. These low levels might be the result of a poor diet or certain diseases or conditions.

To raise your vitamin or iron level, your doctor may ask you to change your diet or take vitamin or iron supplements. Common vitamin supplements are vitamin B12 and folic acid (folate). Vitamin C sometimes is given to help the body absorb iron.

Iron

Your body needs iron to make hemoglobin. Your body can more easily absorb iron from meats than from vegetables or other foods. To treat your anemia, your doctor may suggest eating more meat—especially red meat (such as beef or liver), as well as chicken, turkey, pork, fish, and shellfish.

Nonmeat foods that are good sources of iron include:

Spinach and other dark green leafy vegetables

Tofu

Peas; lentils; white, red, and baked beans; soybeans; and chickpeas

Dried fruits, such as prunes, raisins, and apricots

Prune juice

Iron-fortified cereals and breads

You can look at the Nutrition Facts label on packaged foods to find out how much iron the items contain. The amount is given as a percentage of the total amount of iron you need every day.

Iron also is available as a supplement. It's usually combined with multivitamins and other minerals that help your body absorb iron.

Doctors may recommend iron supplements for premature infants, infants and young children who drink a lot of cow's milk, and infants who are fed breast milk only or formula that isn't fortified with iron.

Large amounts of iron can be harmful, so take iron supplements only as your doctor prescribes.

Vitamin B12

Low levels of vitamin B12 can lead to pernicious anemia. This type of anemia often is treated with vitamin B12 supplements.

Good food sources of vitamin B12 include:

Breakfast cereals with added vitamin B12

Meats such as beef, liver, poultry, and fish

Eggs and dairy products (such as milk, yogurt, and cheese)

Foods fortified with vitamin B12, such as soy-based beverages and vegetarian burgers

Folic Acid

Folic acid (folate) is a form of vitamin B that's found in foods. Your body needs folic acid to make and maintain new cells. Folic acid also is very important for pregnant women. It helps them avoid anemia and promotes healthy growth of the fetus.

Good sources of folic acid include:

Bread, pasta, and rice with added folic acid

Spinach and other dark green leafy vegetables

Black-eyed peas and dried beans

Beef liver

Eggs

Bananas, oranges, orange juice, and some other fruits and juices

Vitamin C

Vitamin C helps the body absorb iron. Good sources of vitamin C are vegetables and fruits, especially citrus fruits. Citrus fruits include oranges, grapefruits, tangerines, and similar fruits. Fresh and frozen fruits, vegetables, and juices usually have more vitamin C than canned ones.

If you're taking medicines, ask your doctor or pharmacist whether you can eat grapefruit or drink grapefruit juice. This fruit can affect the strength of a few medicines and how well they work.

Other fruits rich in vitamin C include kiwi fruit, strawberries, and cantaloupes.Vegetables rich in vitamin C include broccoli, peppers, Brussels sprouts, tomatoes, cabbage, potatoes, and leafy green vegetables like turnip greens and spinach.

Medicines

Your doctor may prescribe medicines to help your body make more red blood cells or to treat an underlying cause of anemia. Some of these medicines include:

Antibiotics to treat infections.

Hormones to treat heavy menstrual bleeding in teenaged and adult women.

A man-made version of erythropoietin to stimulate your body to make more red blood cells. This hormone has some risks. You and your doctor will decide whether the benefits of this treatment outweigh the risks.

Medicines to prevent the body's immune system from destroying its own red blood cells.

Chelation (ke-LAY-shun) therapy for lead poisoning. Chelation therapy is used mainly in children. This is because children who have iron-deficiency anemia are at increased risk of lead poisoning.

Procedures

If your anemia is severe, your doctor may recommend a medical procedure. Procedures include blood transfusions and blood and marrow stem cell transplants.

Blood Transfusion

A blood transfusion is a safe, common procedure in which blood is given to you through an intravenous (IV) line in one of your blood vessels. Transfusions require careful matching of donated blood with the recipient's blood.

Blood and Marrow Stem Cell Transplant

A blood and marrow stem cell transplant replaces your faulty stem cells with healthy ones from another person (a donor). Stem cells are made in the bone marrow. They develop into red and white blood cells and platelets.

During the transplant, which is like a blood transfusion, you get donated stem cells through a tube placed in a vein in your chest. Once the stem cells are in your body, they travel to your bone marrow and begin making new blood cells.

Surgery

If you have serious or life-threatening bleeding that's causing anemia, you may need surgery. For example, you may need surgery to control ongoing bleeding due to a stomach ulcer or colon cancer.

If your body is destroying red blood cells at a high rate, you may need to have your spleen removed. The spleen is an organ that removes wornout red blood cells from the body. An enlarged or diseased spleen may remove more red blood cells than normal, causing anemia.

Mild to moderate anemia may cause very mild symptoms or none at all.

Conclusion:

Over all it was a very nice experience organizing this exhibition, we extend our thanks to Dr.Anil Sharma sir, Principal of MTIN for his support and suggestions we also would like to extend our thanks to all the team members of PHC, Nar for giving us an opportunity to conduct the programme and supporting us in every step. Hope the programme created awareness about Hypertension, Diabetes and Anemia among the villagers.

Date: 13/04/2017 **Day: Thursday** **Timings: 11am to 12noon**

I. **Introduction:** The communityhealth nursing department of Manikaka Topawala Institute of Nursing organized a role playon'Environmental Sanitation' on 13thApril 2017 at Nar village.

II. **Agenda:**Role Play on 'Rehabilitation of Mentally Ill'

III. **Objectives of the event:**

a) Introduction to the topic.
b) Definition of the term environmental sanitation
c) Importance of environmental sanitation
d) Sources of infection
e) Methods of waste disposal

IV. **Participants/Beneficiaries:**Community people of Nar village

V. **In detail explanation of the event with colored print of photographs**

The students of 4th semester B.Sc. Nursing and 3rd year GNM of Manikaka Topawala Institute of Nursing, CHARUSAT organized a role play on environmental sanitation at Nar village. The site for the role play was Vaghari vas. The objective of the event was to educate the village dwellers about the importance of keeping the environment clean especially by having and organized sanitation method. About 20 students enacted the play depicting environmental sanitation. The audience consisted of children, adults as well as old age people. About 50 people watched the role play. The students depicted a village area with improper waste disposal methods and lack of proper sanitation which resulted in presence of various diseases in the area. Contrary, they also depicted an area with proper waste disposal and the benefits of living in such an area. At the end of the role play an explanation was given by the students stating the difference in the two areas and the benefits of proper environmental sanitation.

Environmental sanitation is the hygienic means of preventing human contact from the hazards of wastes to promote health.

Health threats can arise from a number of indoor environmental factorssuch as indoor air quality (polluted for example by use of solid fuels),noise humidity and mould growth, temperature, presence of hazardous substances, for example asbestos, lead, radon and volatile organic compounds (VOC) hygiene and sanitation, and overcrowding.

The control of environmental factors that form links in disease transmission. Subsets of this category are solid waste management, water and wastewater treatment, industrial waste treatment and noise and pollution control.

Waste Management

The environmental conditions of a given area may be affected by waste management, the process used to dispose of garbage. How waste is disposed of varies based on living conditions and the accepted standard of living in a geographical area. While some communities provide wastewater treatment and trash collection, others do not, which reduces the ability to control the well-being of the environment and its people. When waste is not removed and treated properly, pollution may lead to the spread of disease; when proper disposal and treatment methods are followed, disease and pollution can usually be reduced.

Solid Waste Management

Every day, people throw away a large amount of garbage, which is usually referred to as solid waste. In many countries, some form of solid waste management system has been put in place. Some common ways to dispose of the garbage include incarceration, which is the burning of waste, or landfills, which are places to store waste. In the United States and Europe, both of these methods are commonly used to manage solid waste.

Industrial Waste Management

Environmental sanitation is not limited to the pollution of water and the improper disposal of household waste. When factories or businesses dispose of chemical and physical waste in ways that directly affect the environment, it is often referred to as industrial pollution. For example, while the actual dumping site may occur several miles away from a main source of water, drainage and rainfall can cause chemicals and physical waste to mix with the water supply and pollute it. Some countries have developed a system to properly dispose of industrial waste and help protect the environment; as with household waste, some of these systems incorporate incarceration and landfills into their management strategies.

Air Pollution and Noise Control

Another factor of a healthy environment is air pollution; many studies have shown the negative effects of air pollution on the environment. Air pollution can also affect a person's ability to breathe, which can potentially increase the number of lung and heart problems in the members of a community. Irritating

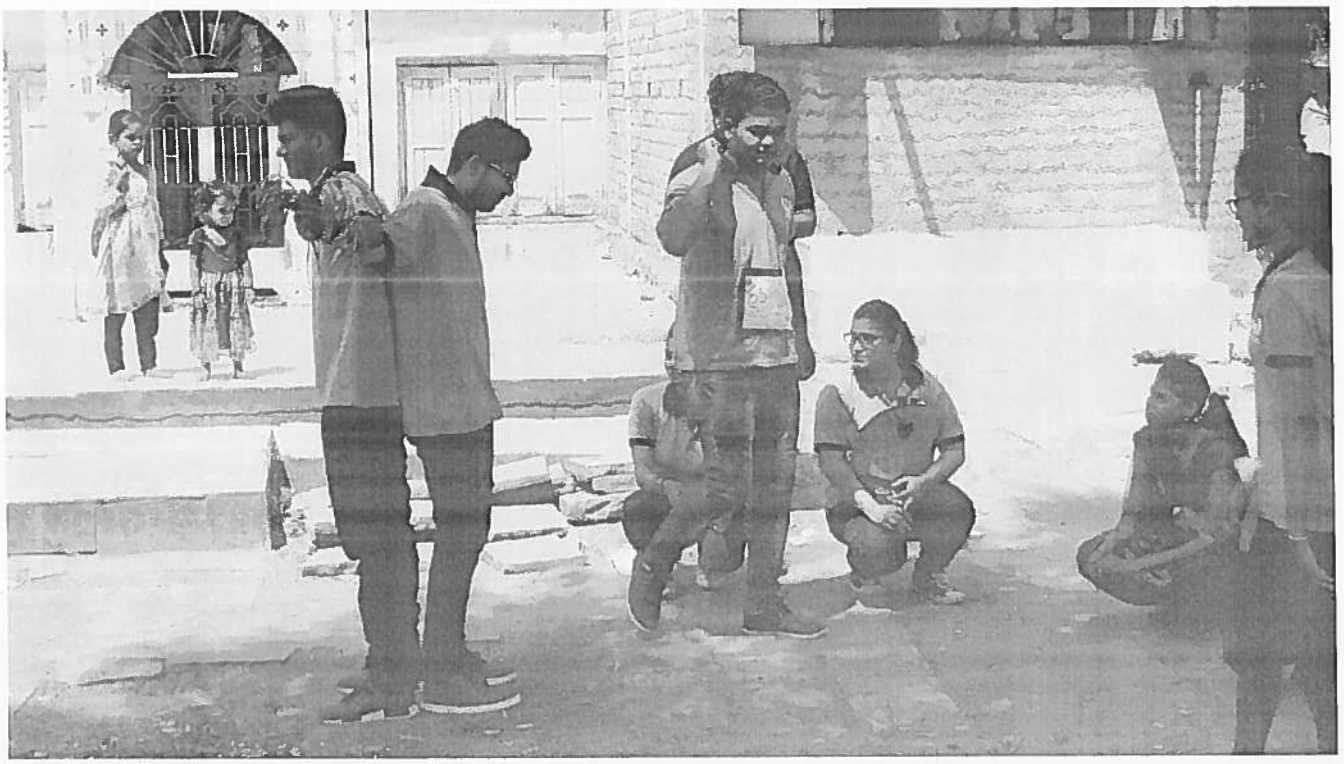

and excessive noise in the environment can also cause anxiety attacks or lead to distractions, among other things, which can lead to accidents and other potentially hazardous situations.

Ways to Help

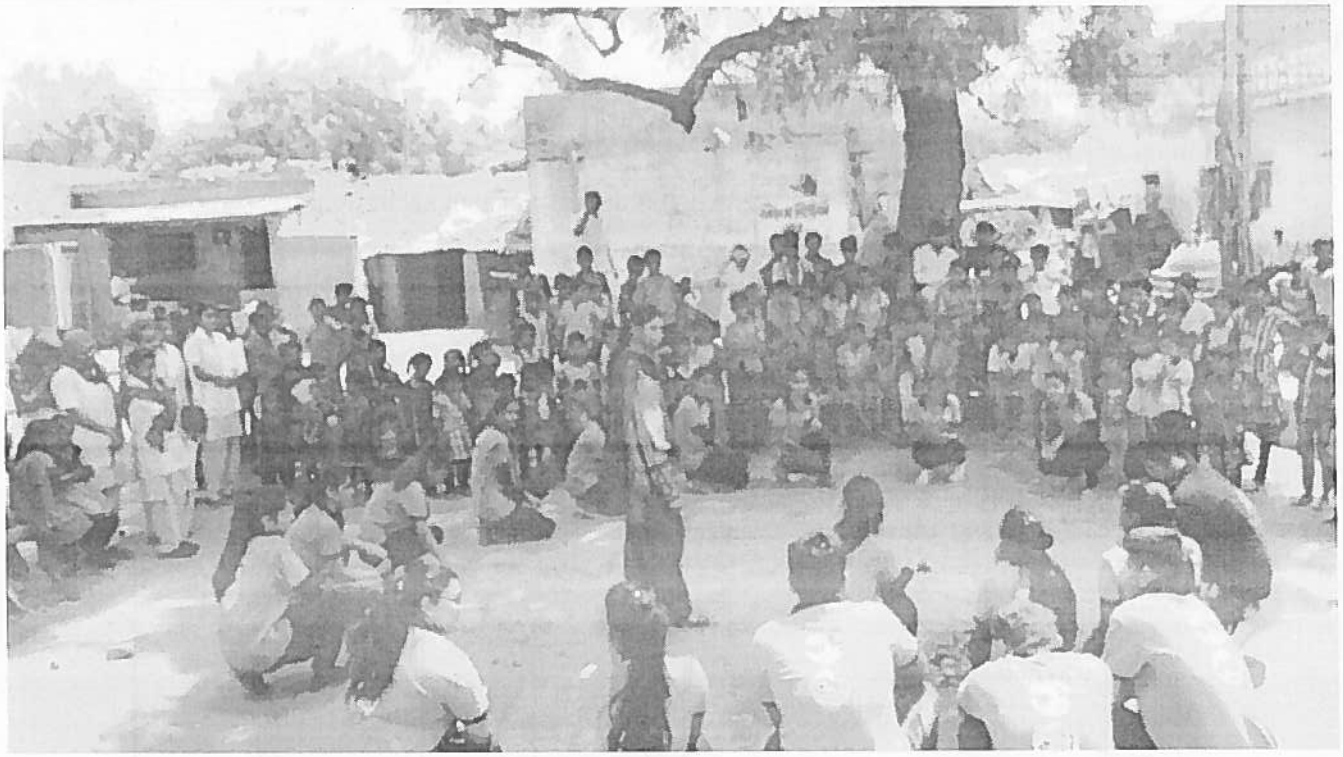

There are a number of ways to help keep the environment clean and help improve people's overall health status:

1. Individuals should avoid wasting water. They can do this by taking shorter showers, not leaving the water running, and using only what water is needed.
2. People should recycle as much as possible to reduce waste. Many major cities offer recycling for plastic, paper, and glass products.
3. Individuals can walk, ride a bike, or carpool to reduce air pollution.
4. Each person can educate others on ways to help improve the environment.

According to the World Health Organization (WHO), there are four areas that must be reviewed in order for environmental sanitation to be effective: planning, water supply, sanitation, and hygiene education. The WHO offers guidelines for these steps on their website to help implement environmental hygiene programs nationwide and improve overall health.

REPORT OF EXHIBITION ON "ANTENATAL CARE AND FEMALE FETICIDE" ON 11TH APRIL, 2017 AT CHC, TARAPUR AND ON 12TH APRIL, 2017 AT V. S. HOSPITAL, AHMEDABAD ON ACCOUNT OF CELEBRATION OF NATIONAL SAFE MOTHERHOOD DAY, 2017

❖ **Introduction:**

To celebrate National Safe Motherhood day, 2017 and create awareness among the community, Exhibitions were conducted at Community Health Center, Tarapur on 11.04.2017 and at Obstetric and gynecological department, V. S. Hospital, Ahmedabad on 12.04.2017 on the theme of "Antenatal care and Female feticide". Antenatal mothers, postnatal mothers, women with gynecological problems and their relatives and general community population visited the exhibitions. It was a good opportunity to educate them. Antenatal care / prenatal care include regular medical and nursing care recommended for women during pregnancy. Female feticide in India is the abortion of a female fetus outside of legal methods. The frequency of female feticide in India is assumed to be an estimation derived from its high birth sex ratio that is the ratio of boys to girls at birth.

❖ **Central Objective:**

At the end of exhibition, the targeted population will gain adequate knowledge regarding importance and measures of proper antenatal care and will develop positive attitude & practice to abolish female foeticide.

❖ **Specific Objectives:**

At the end of the session, the group will be able to:

- ✓ Understand the concepts of biological, physical and psychological, aspects of normal pregnancy.
- ✓ Appreciate, gain awareness and follow the measures demonstrated through exhibition regarding antenatal care which includes diet, exercise, minor ailments & their management, personal hygiene, regular check-up and immunization.
- ✓ Appreciate, gain awareness and understand the importance of female child and be encouraged to abolish the practice of female foeticide.
- ✓ Facilitate networking and sharing of knowledge of care aspects with other antenatal mothers and general community.

❖ **Target Audience/Beneficiaries:**

- Antenatal mothers
- Mothers of infants & Toddler
- Husbands & other family members
- General community
- Health personnels like health workers, nurses, doctors.

❖ **Brief description of the Event:**

The event was organized as a two day event by the OBG Nursing department, MTIN and the 6th semester B.Sc Nursing students by conducting poster exhibition.

Day 1 of the event had the exhibition at CHC, Tarapur on 11th April 2017. The exhibition started at 10.00 am. Dr. Sanjay J Chauhan, Medical Officer, CHC, Tarapur inaugurated the exhibition by cutting the ribbon.

Day 2 of the event had the exhibition at V. S. Hospital, Ahmedabad on 12th April, 2017. The exhibition started at 9.00 am. Ms. Mira Patel, Nursing superintendent, V. S. Hospital, Ahmedabad inaugurated the exhibition.

At both areas, the students were divided into 6 groups. Each group has prepared posters and explained about them in the exhibition to the target population. Students explained all the posters to the group in Gujarati language and even cleared the doubts of the group. The topics covered in the posters broadly included the following:

- Antenatal diet
- Antenatal exercises
- Personal hygiene, habits, life-style modifications
- Travelling, drugs use, immunization, regular check-up
- Minor ailment during pregnancy and their simple management
- Warning signs during pregnancy and female feticide

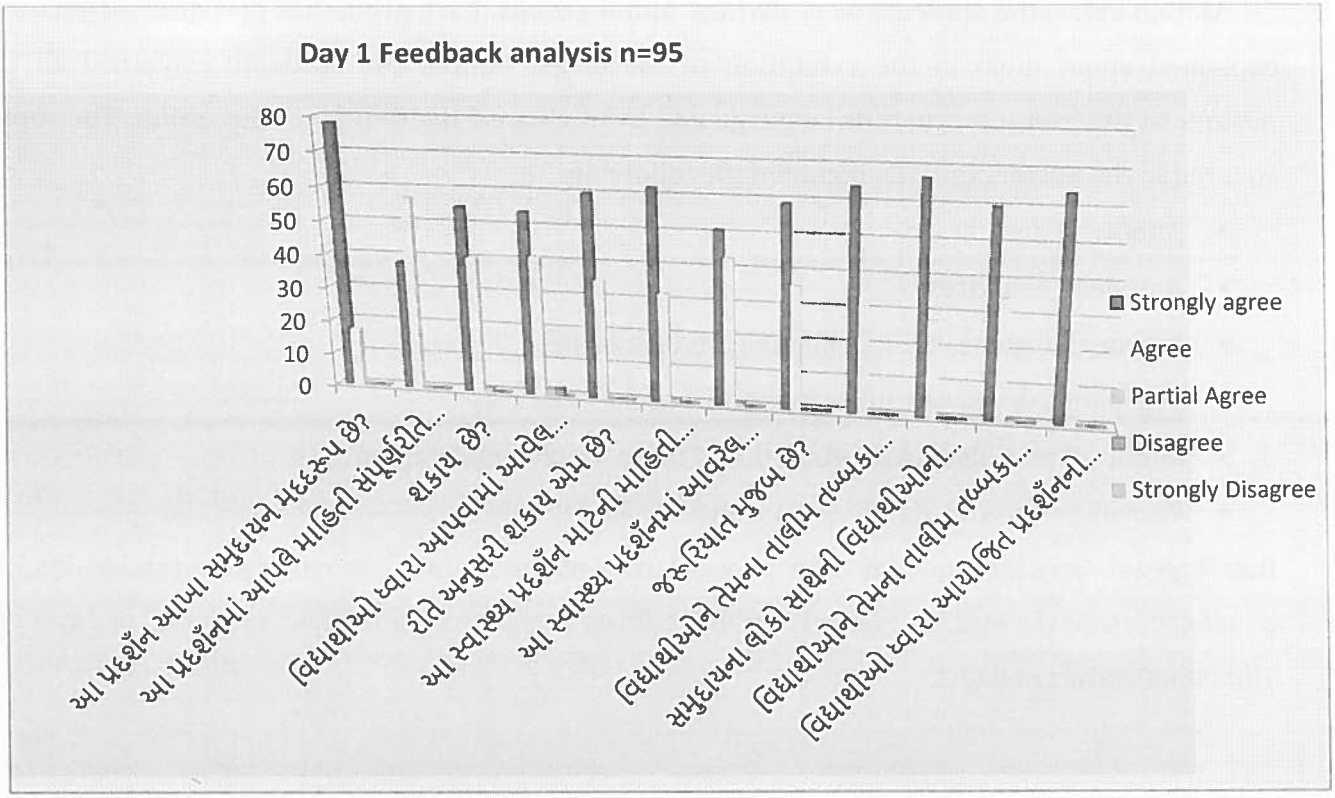

Day 1 event was attended by 160 beneficiaries whereas day 2 event was attended by 200 beneficiaries. At the end of session written feedback was taken from 95 beneficiaries of day 1 and 130 beneficiaries of day 2.

Analysis depicted through graph:

Conclusion

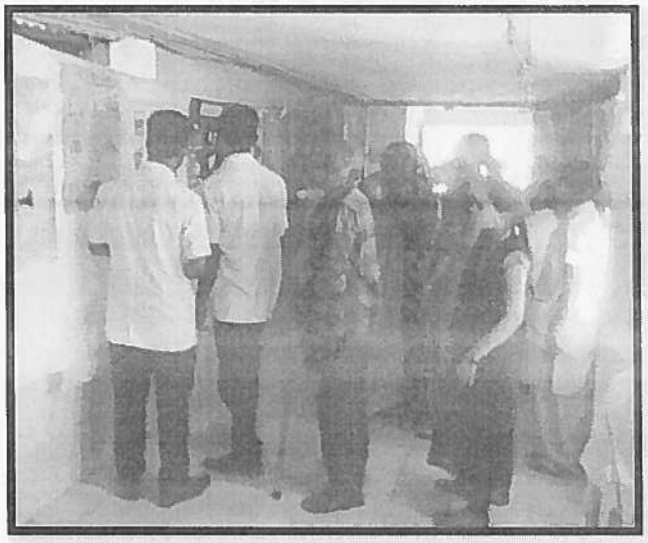

On account of celebration of National Safe Motherhood day, 2017, Exhibitions were conducted at Community Health Center, Tarapur on 11.04.2017 and at Obstetric and gynecological department, V. S. Hospital, Ahmedabad on 12.04.2017 on the theme of "Antenatal care and Female feticide". The exhibition was successful. We had the opportunity to educate needed beneficiaries at both settings. We are extremely thankful to CHARUSAT and our Respected Principal sir, Dr. Anil Sharma for giving us the opportunity to successfully organize the event.

ANGANWADI REPORT

Introduction:

As a part of their curriculum students of 4th semester / 2ndyear B.Sc Nursing and 3rd year GNM students have carried out health assessment of Anganwadi Children at Ajarpura village under the supervision of Mr. GururajGuggari, Nursing Tutor Mr.JayeshPatidar Assist. Professor and Mrs. Shilpa Dalwadi, Nursing Tutor on 1st and 6th April, 2017 with following objectives

Objectives:

At the end of the visit the students will be able to

1) Assess the health status of anganwadichildren's
2) Explain the organization chart of ICDS
3) Describe various services rendered by anganwadi
4) Elaborate job description of anganwadi worker and helper
5) Discuss role of various health agencies in ICDS
6) Elucidate records and reports maintained at anganwadi

The anganwadi is handled by anganwadi worker and her helper. Students have covered all five Anganwadi's which are under PHC, Ajarpura. These anganwadi renders its services to children from age group of 0-6 years, adolescent girls from age of 11-18 years, antenatal women and lactating women.

The details of the Anganwadi is fallowing

Sl No	Area name	Name of AWW	Population covered	Total no of children present during assessment
1	Mata vaduFaliya	Mrs.Beenaben Patel	1200	19
2	Christivas	Mrs.NandabenVaghela	1026	13
3	Pagivaggu	Mrs.MeenabenParmar	1100	09
4	Meldimata	Mrs.RenukabenAtadiya	1026	14
5	Luharvas	Mrs.Reetaben	835	08

Organization of ICDS:

Activities Performed atAnganwadi

Every anganwadi has been provided with the schedule of activities that are to be followed regularly on daily basis by the anganwadi worker, this schedule is as follow:

Revised Supplementary Nutritional norms:

Sr No.	Category	K Cals/day	Protein (g/day)
1	Children(6-72 months)	500	12--15
2	Pregnant and nursing mothers	600	18-20
3	Severely malnourished children(6-72 months)	800	20-25

Job description of anganwadi worker:

Primary Functions:

- Listing pregnant mothers and identification of at risk mothers
- Maternal weight recording
- Food supplementation
- Iron and folic acid supplementation
- TT motivation
- Depot holding for contraceptives
- Recording of birth weight and referral of low birth weight babies to VHN
- Ensuring breastfeeding for newborns
- Identification children for immunization
- Follow-up of immunized children
- Growth monitoring – children under 6 months
- Growth monitoring – children 6 months to 3 years
- Identification of children for feeding

- Referral for growth failure and other health problems
- Vitamin–A supplement – children under 6 years
- Iron and folic acid supplementation
- Treatment of children for minor ailments
- Referral of ARI cases to VHN
- ORT education and distribution of ORS
- Maintain village based health records

Records and Reports of Anganwadi:

These are the following record and reports maintained atanganwadi:

- Registration book
- Daily food stock register
- Vaccination register
- Survey Register
- Vitamin-A stock register
- Annual register
- Growth chart
- Home visit register
- Antenatal women food supplementation register
- Balbhog register
- Referral register
- Weekly children's weight registers

Graphical Presentation of Health status of School Children:

Total students: 126

Sl. No	Condition	Frequency	Percentage
1.	Vision	4	3.2
2.	Wasting	34	27.0
3.	Stunting	29	23.0
4.	Abdominal Pain	1	0.8
5.	Anaemia	2	1.6
6.	Breathing Difficulties	1	0.8
7.	Cold & Cough	17	13.5
8.	Dental Carries	36	28.6
9.	Skin disease	3	2.4

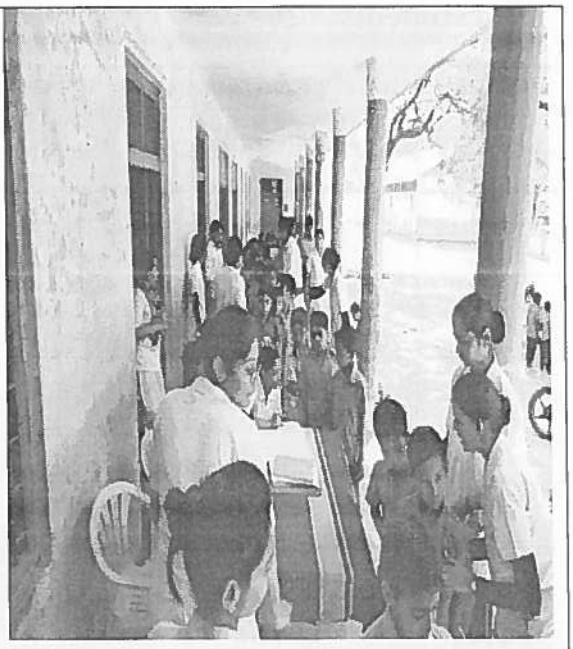

Conclusion:

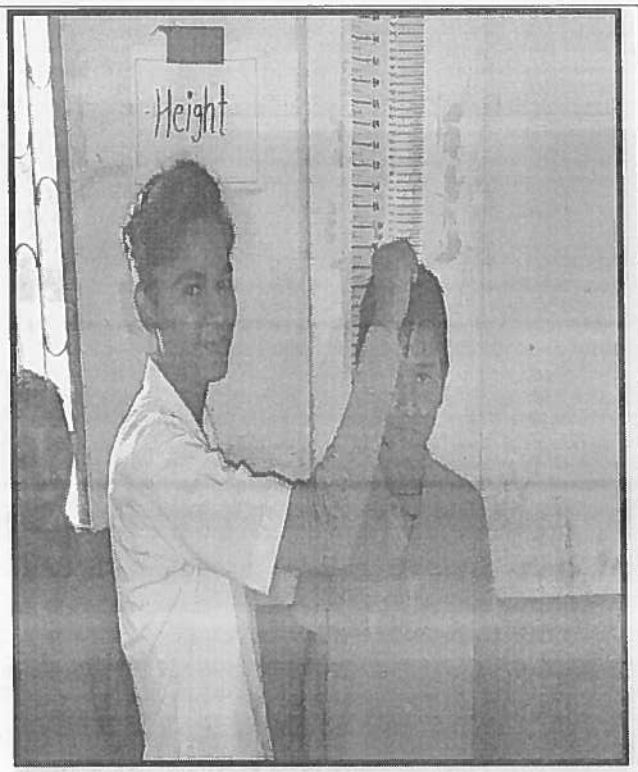

The major health problems identified among Vibrant International Academy School Children's are Wasting: 27%, Dental carries: 28.6%, Vision: 3.2%. Bananas are distributed to all the students to bring awareness about healthy practices. We express our heartfelt gratitude to Principal, MTIN, Principal, VIA and CHARUSAT university for their unconditional Support.

SarvodayVinayVidhyamandirHighschoolAjarpura

9th and 11th standard

Sr. no.	Conditions	Frequency	Percentage
1.	Underweight	115	63.18%
2.	Dental carries	60	32.96%
3.	Cough and cold	05	2.14%
4.	Anemia	02	1.72%

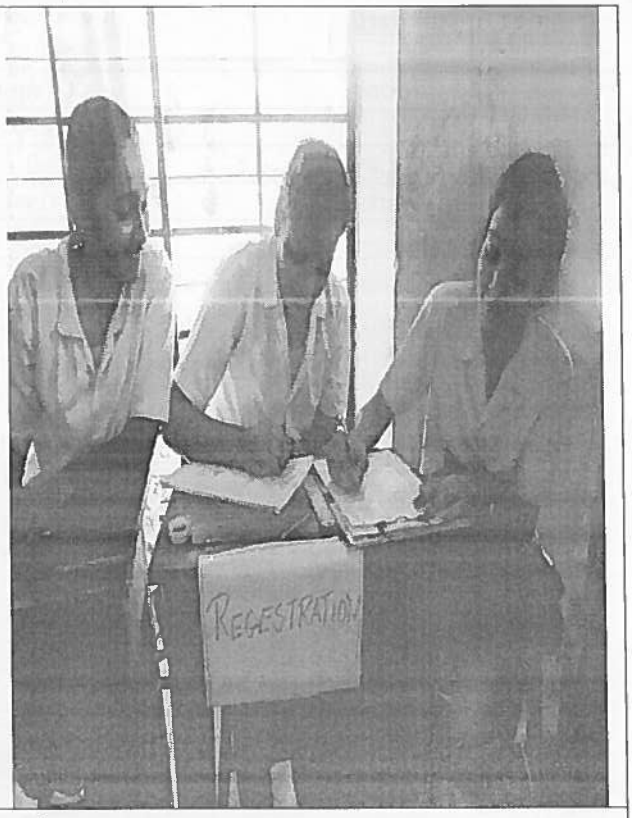

Conclusion:

The major health problems identified among SarvodayVinayVidhyamandirHighschool Children's are Underweight 63.18%, Dental caries 32.96% ,cough and cold 2.14% and Anemia 1.72%. Bananas are distributed to all the students to bring awareness about healthy practices. We express our heartfelt gratitude to Principal MTIN,and CHARUSAT university for their unconditional Support.

Report of Exhibition on Tuberculosis

TB Statistics in India:

The theme of this year's World TB Day is "Unite to End TB"

India is the country with the highest burden of TB. The World Health Organisation (WHO) TB statistics for India for 2015 give an estimated incidence figure of 2.2 million cases of TB for India out of a global incidence of 9.6 million. The TB incidence for India is the number of new cases of active TB disease in India during a certain time period (usually a year).

The estimated TB prevalence figure for 2015 is given as 2.5 million.[1] The TB prevalence is the number of people in India who are living with active TB, Prevalence is usually, but not always given as a percentage of the population.

It is estimated that about 40% of the Indian population is infected with TB bacteria, the vast majority of whom have latent TB rather than TB disease.

Most of the national TB statistics for India are collected by the government Revised National Tuberculosis Control Programme (RNTCP) which was started in 1997, and which was then expanded across the country.

Key facts

- Tuberculosis (TB) is one of the top 10 causes of death worldwide.
- In 2015, 10.4 million people fell ill with TB and 1.8 million died from the disease (including 0.4 million among people with HIV). Over 95% of TB deaths occur in low- and middle-income countries.
- Six countries account for 60% of the total, with India leading the count, followed by Indonesia, China, Nigeria, Pakistan and South Africa.
- In 2015, an estimated 1 million children became ill with TB and 170 000 children died of TB (excluding children with HIV).
- TB is a leading killer of HIV-positive people: in 2015, 35% of HIV deaths were due to TB.
- Globally in 2015, an estimated 480 000 people developed multidrug-resistant TB (MDR-TB).
- TB incidence has fallen by an average of 1.5% per year since 2000. This needs to accelerate to a 4–5% annual decline to reach the 2020 milestones of the *"End TB Strategy"*.
- An estimated 49 million lives were saved through TB diagnosis and treatment between 2000 and 2015.

- Ending the TB epidemic by 2030 is among the health targets of the newly adopted Sustainable Development Goals.

Exhibition on Tuberculosis:

To create the awareness on world TB Day students and faculties had organised exhibition on tuberculosis on 24th march 2017 and the theme "Unite to End TB"they covered the topics like causes, types and control of TB with following objectives

Objective of Exhibition:

At end of the exhibition participants will able to gain knowledge about tuberculosis andprevention and control measures of tuberculosis, will have positive attitude towards preventing the tuberculosis andparticipant will be skilful in the management of tuberculosis.

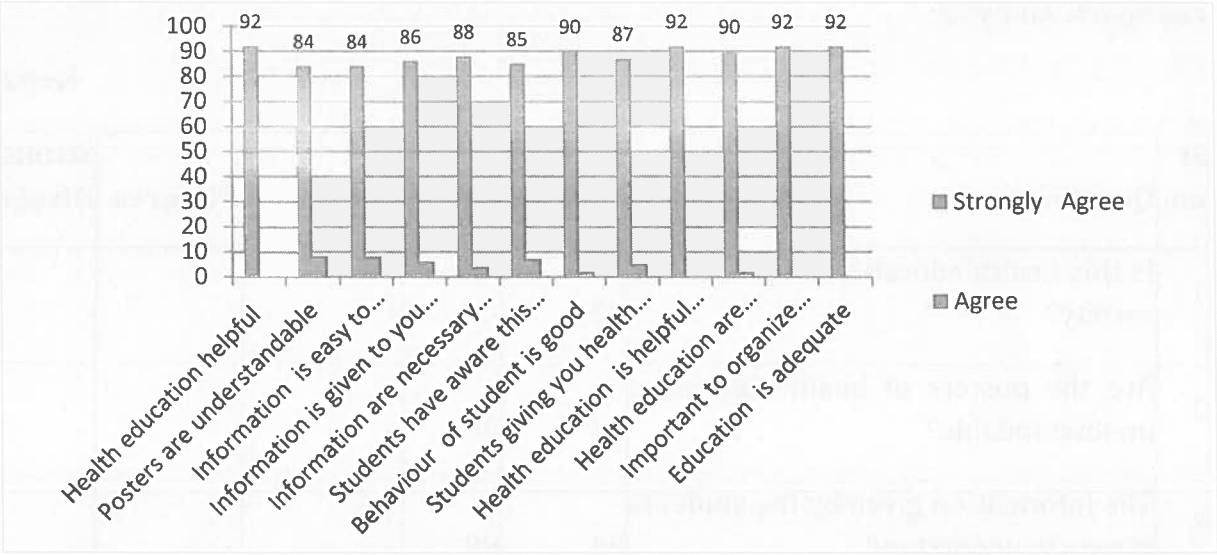

Exhibition was inaugurated byMs.VimalbenPatel ,Honorary Nursing Director and Dr.Anil Sharma Principal MTIN and Shri.Jasbhai Patel at Charusat Hospital in the presence of Mr.GururajGuggariMr.AnilkumarPatidar and Mr.Divya Jain, Nursing Tutors and Nursing Supertendant ,Nursing staff of Charusat Hospital and students of MTIN and more than 120 patients were benefited by this exhibition.

Feedback Analysis:

Survey Report

Introduction:

As a part of their curriculum students of 4th semester / 2nd year B. Sc Nursing and 3rd year GNM students have carried out health survey of Nar village from 20.03.2017 to 15.04.2017, with following objectives and learning outcomes,

Objectives:

At the end of the posting students will be able to

- Build and maintain rapport with individual, family & Community
- Identify demographic characteristics, health determinants & community health resources
- Diagnose health needs of individual , families and community
- Provide primary health care in health centre
- Conduct & Participate in school health program, antenatal clinic etc
- Counsel & educate individual, family and community regarding care of sick, promotion & maintenance of health
- Maintain records and reports

Learning Outcomes:

- Students will be able to maintain therapeutic relationship with individual, family & Community
- Students will be able to collect all the information and put into numerical form (Frequency, Percentage, Incidence and prevalence).
- Students will be able to identify causative and risk factor regarding prevailing diseases in the community
- Students will be able to organize various health camps with active participation such as school health camp, Free Medical Checkup, Mamta Day etc.
- Students will be able submit all the details of health status and events of the community.

The village is situated to the west of the tehsil headquarters Petlad at about 9 kilometers away. It is about 32kilometers North-west from the district headquarters Anand. There were total 1178 houses were numbered by the student. Complete health survey was done under the guidance and supervision of Mr. Siddaram Sarate, HOD, Community Health Nursing, Mr. Anilkumar Jarali, Assistant professor, Mr. Jamin Chauhan, Nursing Tutor and Mrs. Alpna Patel ,Clinical Instructor

BRIEF INTRODUCTION OF NAR VILLAGE:

- The village of NAR is situated to the west of the tehsil headquarters Petlad at about 9 kilometers away. It is about 32kilometers North-west from the district headquarters Anand.
- The village is situated on Bandhni-tarapur road and is 9kilometers interior from parol .
- The village is connected by road with main centers such as Anand, Petlad, Nadiad, Ahmedabad, etc. The village has very good transportation system and public electrical infrastructure. This village has a beautiful pond besides a school, lush green bushes, huge trees, schools, library, Post office, health Centre, Panchayatghar, Dharmshala, Grassland.

AGRICULTURE

- The village is known for its farming and milk production. Mainly Wheat, Rice, Bajra, Tobacco and vegetables are cultivated.

TRANSPORT

- Nar is a Village in Petlad Taluka in Anand District of Gujarat State, India. It is located 32KM towards west from District head quarters Anand. 20 KM from. 98 KM from State capital Gandhinagar.
- Nar Pin code is 388150 and postal head office is Nar.
- Manej (3 KM) , Sansej (3 KM) , Runaj (3 KM) , Khansol (4 KM) , Kothavi (4 KM) are the nearby Villages to Nar. Nar is surrounded by Petlad Taluka towards East, Khambhat Taluka towards South, Tarapur Taluka towards west, Matar Taluka towards North.
- Petlad, Khambhat, Cambay , Anand are the nearby Cities to Nar.

BASIC STATISTICS

- Area – 1485 hectares approx.
- Agricultural Area – 1256 hectares approx.

❖ **COMMUNITY DIAGNOSIS:**

N-712

SR. NO	DISEASE CONDITION	FREQUENCY(f)	PERCENTAGE (%)
1	Hypertension	253	35.63%
2	Diabetes Mellitus	167	23.52%
3	Tuberculosis	10	1.40%
4	Anaemia	19	2.67%
5	Protein Energy Malnutrition	07	0.98%
6	Substance Abuse	50	7.04%
7	Poor Sanitation	89	12.53%
8	Cancer	04	0.56%
9	CAD	1	0.14%
10	Others	111	15.53%

In the village major diseases are **hypertension 35.63%.** and **diabetes mellitus 23.52%.**

❖ **Health Knowledge , Beliefs And Practices:**

★ **About Health and Disease:**

People were having partial knowledge regarding disease condition. They Belief in traditional practices for curation of disease and some were following Health Services also.

★ **Outlook:**

Disease caused by mainly improper hygiene care, improper environmental sanitation, improper concern of health, etc.

★ **Existing Health Practices:**

Traditional Method related to Health

★ **Attitude towards Health Agencies :**

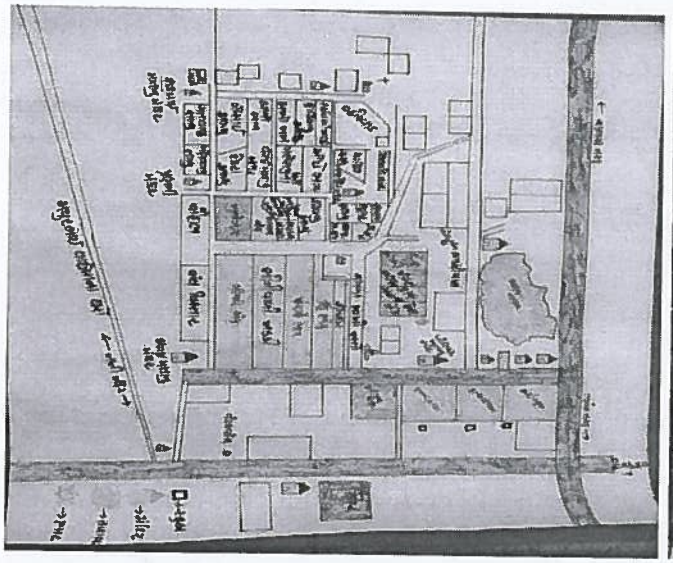

Satisfactorily aware about services provided.

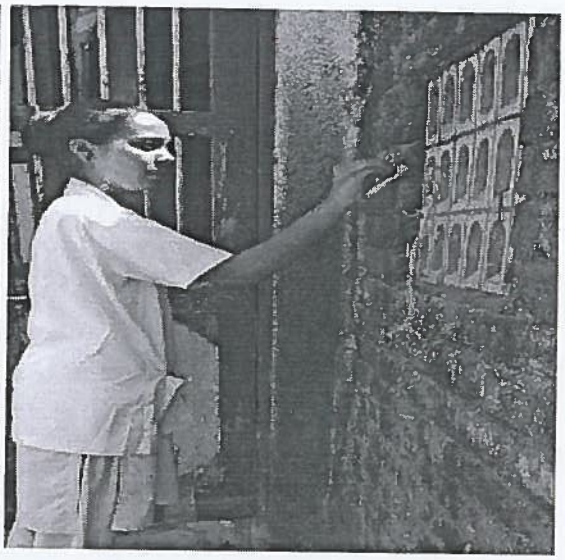

CONCLUSION:

Students of MTIN posted at Nar PHC for their community health nursing posting as a part of curriculum and students they were done the activities such as survey, school health programme and Anganwadi children's health assessment, role play and exhibitions to give the awareness to the public about health and students they were organized all the activities with active participation and these activities are appreciated by the medical officer of PHC and people of Nar.

Health survey of Ajarpura village

Health survey of Ajarpura village

Survey Report

Introduction:

As a part of their curriculum students of 4th semester / 2nd year B.Sc Nursing and 3rd year GNM students have carried out health survey of Ajarpura village from 20.03.2017 to 15.04.2017, with following objectives and learning outcomes,

Objectives:

At the end of the posting students will be able to

- Build and maintain rapport with individual, family & Community
- Identify demographic characteristics, health determinants & community health resources
- Diagnose health needs of individual , families and community
- Provide primary health care in health centre
- Conduct & Participate in school health program, antenatal clinic etc
- Counsel & educate individual, family and community regarding care of sick, promotion & maintenance of health
- Maintain records and reports

Learning Outcomes:

- Students will be able to maintain therapeutic relationship with individual, family & Community
- Students will be able to collect all the information and put into numerical form (Frequency, Percentage, Incidence and prevalence).
- Students will be able to identify causative and risk factor regarding prevailing diseases in the community
- Students will be able to organize various health camps with active participation such as school health camp, Free Medical Checkup, Mamta Day etc.
- Students will be able submit all the details of health status and events of the community.

The village is situated on Anand –Nadiad road and is 4 kilometres interior from Samarkha, there were total 750 houses were numbered by the student. Complete health survey was done under the guidance and supervision of Mr.SiddaramSarate, HOD, Community Health Nursing, Mr.GururajGuggari, Nursing Tutor, Mr.JayeshPatidar ,Assistant professor and Mrs.ShilpaDalawadi ,Clinical Instructor

BRIEF INTRODUCTION OF AJARPURA VILLAGE:

- The village Ajarpura is situated at Anand tehsil of headquarterAnand at about 13 kilometers away. It is about 13 kilometers North-west from the district headquarters Anand.
- The village is situated on Anand –Nadiad road and is 4 kilometres interior from Samarkha.
- The village is connected by road with main centers such as Anand ,Nadiad, Ahmedabad,etc. The village has very good transportation system and public electrical infrastructure.
- This village has a beautiful pond and schools, lush green bushes, huge trees, schools, Post office, Primary Health Centre, Panchayat and community hall .

AGRICULTURE

- The village is known for its forming and milk production. Mainly Wheat, Rice, Bajra and Tobacco are sowed.

TRANSPORT

- Dowa Railway Station ,Kasor Railway Station are the very nearby village stations to Ajarpura.. Anand railway station is about 13 km away from Ajarpura and Ahmedabad Railway Station is major railway station 57 km near to Ajarpura, Bombay Ahmedabad road highway 10 km from Ajarpura, GSRTC bus facilities also there for nearby area.

Health Knowledge, Beliefs And Practices:

- ★ **About Health and Disease:**
  People were having inadequate knowledge regarding disease condition. They Belief in traditional practices for curation of disease and some were following health services also.
- ★ **Outlook:**
  Disease caused by mainly improper hygiene care, improper environmental sanitation, Improper concern of health, etc.
- ★ **Existing Health Practices:**
  Traditional Method related to Health
- ★ **Attitude towards Health Agencies :**
  Not merely aware about services provided.

CONCLUSION:

Students of MTIN posted at Ajarpur PHC for their community health nursing posting as a part of curriculum and students they were done the activities such as surey ,school health programme and Anganawadichildrens health assessment ,role play and exhibitions to give the awareness to the public about health .and students they were organized all the activities with active participation and these activities are appreciated by the medical officer of PHC and people of Ajarapura

Photogallary

I.Introduction:

Health is defined as complete physical, mental, social & emotional wellbeing and not merely absence of disease. A healthy diet is one that helps maintain or improve health. It is important for the prevention of many chronic health risks such as: obesity, heart disease, diabetes, and cancer. A healthy diet involves consuming appropriate amounts of all nutrients, and an adequate amount of water.

Nutrients can be obtained from many different foods, so there are a wide variety of diets that may be considered healthy diets. A healthy diet needs to have a balance of macronutrients / energy (fats, proteins, and carbohydrates) and micronutrients to meet the needs for human nutrition without inducing toxicity from excessive amounts.

Junk food is an informal term applied to some foods that are perceived to have little or no nutritional value (i.e. containing "empty calories"), or to products with nutritional value but which also have ingredients considered unhealthy when regularly eaten, or to those considered unhealthy to consume at all. Junk foods are typically ready-to-eat convenience foods containing high levels of saturated fats, salt, or sugar, and little or no fruit, vegetables, or dietary fibre; junk foods thus have little or no health benefits.

The objectives of this programme are:

- To understand the concept of health and healthy diet
- To understand the ill effects of junk food
- To sensitize the students on BMI, body weight, exercise and healthy habits
- To prevent and reduce the incidence of obesity in young students

Participants/Beneficiaries:

All undergraduate students of 1st year from all the departments of university

Agenda

Time	Activities
1 hour lecture	Discussion, orientation and awareness

Detailed report of the programme:

The ministry of Human Resource Development has desired to issue against availability and sale of junk food in higher education institutions. According to the ministry banning junk food in colleges would set new standards for healthy food and make the students live batter, learn better and also reduce the obesity levels in young learners, thus preventing life style diseases which have a direct link with excessive weight.

An orientation programme was initiated by MTIN faculties – Mr Ravi Barot and Mr Divya Jain under the guidance of our respected principal sir Dr Anil Sharma with the aim of educating all 1st year students of entire Charusat university.

For conducting session on ill effects of junk food we asked each department of university to give time slot for 1 hour for all 1st year students. We approached departments through mail and telephone for 3 times for giving their slots. According to their convenience and schedule we got time slots for all different departments (CSPIT, CIVIL, IT, electrical, mechanical, EC, ARIP, RPCP) except PDPIAS and MBA departments.

The session includes ill effects of junk food which covered meaning of health, healthy diet, junk food, contents of junk food, obesity, BMI, incidence in India, some important facts and research evidence related to ill effects of junk food.

Conclusion:

Myself Mr. Divya Jain and Mr. Ravi Barot faculty of Manikaka Topawala Institute of Nursing, we found all the sessions were very fruitful and interactive among students. We are grateful to institutional heads as well as to university for providing such an opportunity to explore and interact with a varied knowledge hub and encouraged for self-development.

Date: 25/01/2017 **Time: 2:00 to 3:00 pm**

1. Introduction:

I have arranged one psycho-socio drama on 15th February, 2017 by M.Sc. Nursing students on role of nurse in counseling. After that student has conducted implementation of laughter therapy on patient and patients' relatives

2. Agenda:

15th February, 2017

Time	Event
8:30 am to 9:00am	Psycho socio drama on role of nurse in counseling
9:00 am to 9:30 am	implementation of laughter therapy on patient and patients' relatives

3. Objectives:

1. To explain the role of nurse in counseling to the patient and patients relatives through psycho-socio drama
2. To get interaction of the students with patient and patients relatives
3. To implementation of laughter therapy with involvement of patient and patients relatives

4. Participants/Beneficiaries: patient and their family members

5. Description of the event:

Psycho socio drama

Characters of psycho socio drama

Thakor rutvi: as a nurse

Boresa seema: a girl who is living apart from family and having stress and smoking habits

Patel meet: a college going boy- with the habits of alcoholism and other substance abuse history

Environmental set up: in family ward, therapy room

Scene: 1

Fresh morning after completion of morning work nurse went to meet patients (seema and meet) for general daily data collection and counseling.

Nurse: hello. Good morning. How are you both?

Patients (meet & seema): very good morning. We are fine.

Nurse: had your finished exercise session?

Patients (meet & seema): yes

Nurse: good

Scene: 2

Nurse: tell me about yourself. Now how you both are feeling here?

Patients (meet & seema): we are feeling better than before.

Nurse: you can tell about your feelings. We are here to help you.

Seema: yes, actually I was feeling bad about my behavior and habits. I know that I have given too much trouble to my parents, because of my smoking habit which I got from my friends. I have started as only for enjoyment then whenever I was getting stress I used to smoke and then it became habit for me. My nature also has changed. I used to fight everyday with my parents, friends and with other family members. All are worried for me. My health is also not good as I used to feel weakness and tiredness.

Nurse: ok. (Start to look at meet)

Meet: I am in last year of college. My father is businessman so in future I will also join the business. I was admitted because of drinking habit. Even I am doing smoking sometimes and I used to take other drugs also. My friends were also taking that. Now my [arents don't like that and I got failed in examination.

Nurse: ok. So I am concluding from your talk that you are aware for your problems. You are having problem of stress, peer pressure for bad habits, loneliness and lack of family support.

Scene: 3

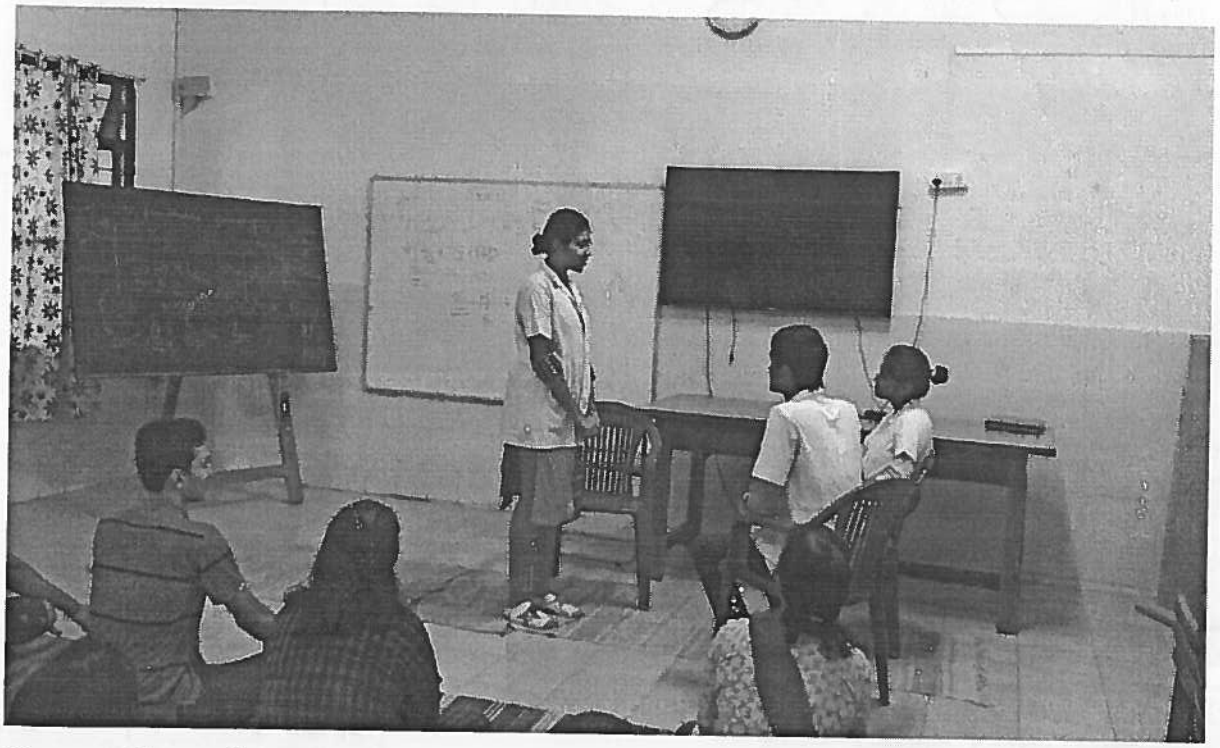

Nurse: she had given health education on stress and stress managements and myths about mental illness. And she explained about the importance of counseling, other treatment and treatments. Nurse told that we are here to help you but you should keep positive thinking and confidence on yourself.

Lastly laugher therapy implemented by our MSc nursing students on patients and patients relatives.

In graph series 1- excellent, series 2 – very good, series 3- good, series 4- satisfactory series 5- poor

7. Conclusion:

Myself arranged the psycho socio drama on 'role of nurse in counseling' and implementation of laughter therapy on patient and patients relatives. Patient and their parents' response were nice and their involvement was good. They asked question related to causes of mental illness, how to cope with problems of daily life, about treatment of mental illness and they will recover or not and parents role in mental illness.

I. Introduction:

Our students of M.Sc. Pediatric Nursing 2nd year third semester had clinical posting at Bapuji Child Health Institution and Research Centre Davangere, Karnataka.In this Posting we had planned that we will organize Demonstration play on "Essential new born care" at Bapuji Child Health Institution and Research Centre . Under the Guidence of Dr. Anil Sharma our Principal, I Miss Prachi Soni Nursing Tutor requested Dr. Guruprasad Sir the senior Pediatrician for pemitting us to show our skills for certain new technologies and policies ruled for "Essential new born care"at Bapuji Child Health Institution and Research Centre . Then I informed all the Dignitaries staffs & students of M.Sc & B.Sc. students about the event Date, Venue and Time.

II. Objectives of the Expert Lecture: At the end of the expert lecture students will be able :

- To understand the concept of New born Assessment.
- To know different aspects of New born Assessment.
- To know that what are different steps (10 steps) .
- To know various managements like Apgar score New born Assessment.
- To understand the management and role of nurse in Essential new born care.

III. In detail explanation of the Expert Lecture:

Date & day: 3rd February, 2017

Time: 10:00 am to 12:30 am

Topic: (Demonstration play on New born Assessment.s)

Faculties Participants: Miss Prachi A Soni

Beneficiaries: B.Sc. nursing students, M. Sc. Nursing students(muradabad) (2015-17 batch), all the staffs, Degnitaries.

Venue: Auditorium Bapuji Child Health Institution and Research Centre, Davangere, Karnataka

The program began with the warm welcome and brief introduction of Degnetaries by Miss. Prachi A Soni Nursing Tutor initiated with students Pretest. Then the importance to know the New born Assessment. It was a live set up of ICU created with all the necessary requisites.

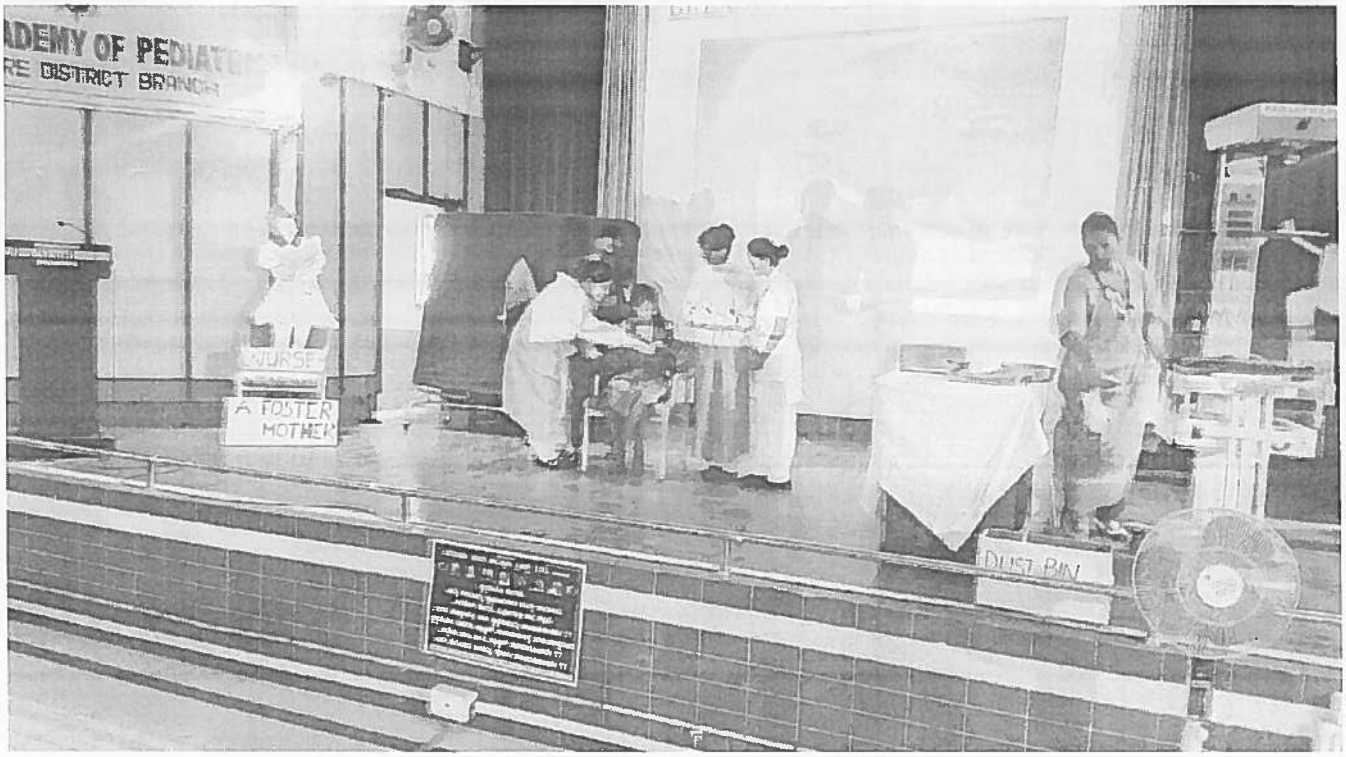

SR. No.	TIMINGS	TOPICS COVERED
1	10:00AM	Newborn Assessment
2	10:15AM	• Vital Signs
3	10:35AM	• Skin
4	10:50AM	• Head
5	11:10AM	• Nose
6	11:20AM	• Chest
7	11:28AM	• Genitalia

Date: 01/02/2017 to 02/02/2017 **Day: Wednesday and Thursday**
Timings: 9 a.m. to 3 p.m.

I. Introduction:

Health awareness programme on Antenatal care, Immunization ,Breast feeding and family Planning methods was conducted at Obstetric and gynecological department of V S Hospital, Ahmedabad. Antenatal mothers, postnatal mothers, women with gynecological problems and their relatives visits the Out patient Department.it was a good opportunity to educate them. Antenatal care /Prenatal care includes regular medical and nursing care recommended for women during pregnancy. Family planning is important for the health of a mother and her children, as well as the family's economic situation. Immunization protects children from serious illness and complications of vaccine-preventable diseases which can include amputation of an arm or leg, paralysis of limbs, hearing loss, convulsions, brain damage, and death. Scientific research has shown us the critical importance of breastfeeding. It is irreplaceable as the way to feed children. Its intricate composition to both protects and nourish; its capacity to perfectly match growth and development needs make it an irreplaceable way to feed babies. Breastfeeding is vital for child survival and also important for mothers' health. Breastfeeding contributes positively to the nation's economy, to employers, families and communities.

II. Agenda: Health Awareness programme on "Antenatal Care, Breast Feeding, Immunization and Methods of Family Planning

III. Objectives of the event:

- To make aware about Antenatal care: Registration, Health assessment, Diet, Exercises, Immunization etc.
- To educate about Immunization: Importance, National immunization schedule, Vaccines, additional vaccines, centers for vaccination etc.
- To make aware about breast feeding; Importance, methods, latching, advantages, exclusive Breast feeding etc.
- To deliver knowledge related to methods of family planning to the relatives accompany the antenatal and postnatal mothers at OPD of obstetrics and gynecological department.

IV. Beneficiaries:

The antenatal mothers, postnatal mothers, women with problems related to gynecology and their relatives

V. Event

The event was planned for two days at Outpatient department of obstetrics and gynecological Department of V S Hospital at Ahmedabad.

On the first day on 01/02/2017

The theme was

1. Antenatal care
2. Family Planning

We have started event at 9 am in the morning. We have distributed group of students in two groups. Other two groups have started to invite the beneficiaries. Almost 300 groups of antenatal, postnatal mothers and their relatives were invited to attend the sessions in groups. The beneficiaries are well explained by our students and also satisfactory answers given by us on their raised doubts.

Under the theme of Antenatal care our students educated them about health checkups, diet, exercises, risk factors and warning signs and Registration in detail. Under the theme of methods of family planning our students educated them about family planning, importance, temporary methods and permanent methods in detail. At the end of session feedback was taken.

On the second day on 02/02/2017

The theme was

1. Immunization
2. Breast feeding

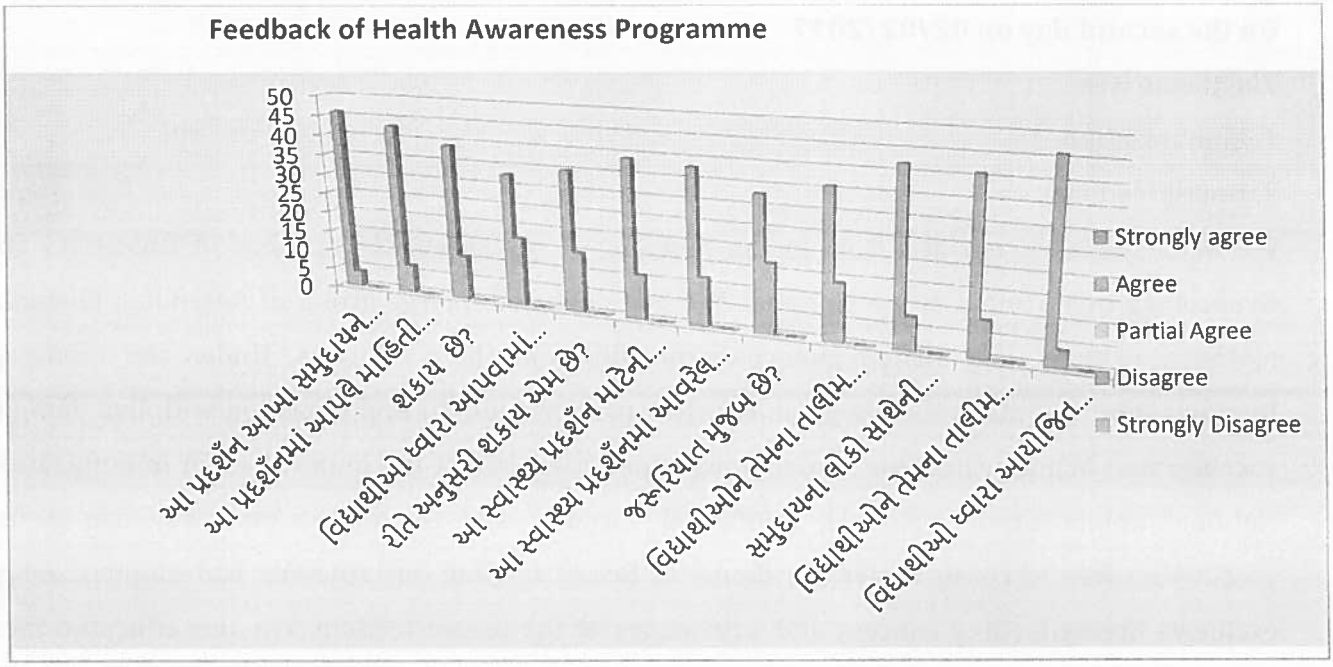

We have started event at 9 a.m. in the morning at outpatient department of Obstetrics and Gynecology Department at V S Hospital. We had educated a large group of Antenatal, Postnatal mothers, women who visited gynecological OPD and their relatives. Under the theme of Immunization Our students had given effective presentation on immunization with live demo of vaccines and Mamta card. Our students explained them about the importance of immunization, National immunization schedule, Additional vaccines and the places that they can go for vaccination free of coast. Under the theme of Breast feeding our students had emphasized on exclusive breast feeding concept and advantages of the breast feeding. We also educated them how to breast care and how to feed baby in different positions. We made aware them about adequate latching of baby to breast. At the end of session we had taken feedbacks.

Health education on Antenatal Care, Breast Feeding, Immunization

Date: 16/11/2016 Day: Wednesday Timings: 9:00am to 2:00 pm

I.Introduction:

Children's day (also known as Bal Divas) in India is celebrated every year on 14th of November to increase the awareness of people towards the rights, care and education of children. Children are the key of success and development of the country as they would lead their country in different and new technological way. They are adorable and shine same like the precious pearls. Children are the God gifts to their parents by the almighty. They are innocent, admirable, pure and loved by everyone.

on 16th of November 2016, 3rd semester MSc nursing students organised children's day celebration at K G P C H Baroda, the main event of the celebration was creating awareness regarding universal child rights.

The objectives of this programme are:

- To teach the publics about importance of child and respecting child rights.
- To impart knowledge among people through exhibiting a model on universal child rights.
- To create awareness about universal child rights

II. Participants/Beneficiaries:

Children's, parents, publics, nursing students

III. In detail explanation of the event:

The 3rd semester MSc nursing students of ManikakaTopawala Institute Of Nursing,Changa,organised children's day celebration at K G P C H Baroda, on 16th of November 2016.The core concept of the celebration was creating awareness on universal child rights. For that we took permission from Dr.JayantDoshi medical superintendent of K G P C H, and on requisition he allowed us to organise this programme in OPD department. We included children, parents, publics, nursing students of various colleges who have been posted there and nursing faculties forthis programme. We arranged for exhibiting a model on child rights.

Students reached at kashiben hospital at 8 am and started preparation for arrangements. The students exhibited the model at 9:00 am and invited the hospital members, faculties of various nursing colleges and publics for the inauguration. A brief introduction about the children's day and about the model prepared for creating awareness on child rights was given by Mr.Vijayakumar M B, nursing tutor, MTIN. Then the participants were allowed to have looked on the model and students explained about the child rights and its importance.

A huge number of publics and students were participated and appreciated the effort. Participants were also allowed to raise questions if they have any doubts and our students managed to clear their doubts. Participants are given the feedback form at the end of the programme. Even the hospital members and students also given a good response and appreciated, finally the programme was successfully completed by 2:00 pm. It was an altogetherwonderful experience for arranging this programme

Conclusion :

Overall it was a nice experience organising this programme, as many of the people do not know about the child rights it was very informative to all the participants. we would like to convey our thanks to Dr.JayantDoshi sir medical superintendent, KGPCH, Baroda for his support and also we extend our thanks to Dr. Anil sharma sir, Principal, Mr.Vipinvageria, HOD of child health nursing department and Ms. Anjali madam for their guidance and support.

Report of Role play on prevention of hypertension

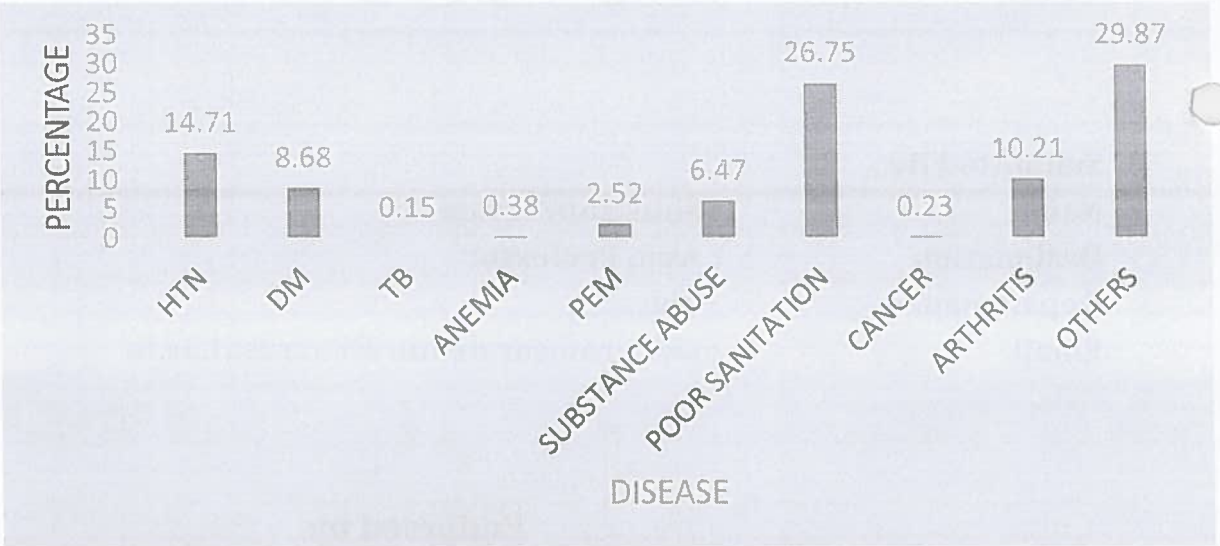

Introduction:

As a part of their curriculum students of 7th semester / 4th year B.Sc Nursing have carried out health survey of Changa village from 26.09.2016 to 27.10.2016, and survey report was analysed and community diagnosis was made, detail is as follows

Community Diagnosis:

SR.NO	DISEASE CONDITION	FREQUENCY(f)	PERCENTAGE (%)
1	Hypertension	192	14.71%
2	Diabetes Mellitus	114	8.68%
3	Tuberculosis	02	0.15%
4	Anemia	05	0.38%
5	Protein Energy Malnutrition	33	2.52%
6	Substance Abuse	85	6.74%
7	Poor Sanitation	351	26.75%
8	Cancer	03	0.23%
9	Arthritis	134	10.21%
10	Others	392	29.87%

Community Diagnosis shows that 26.75% of people were having poor sanitation. 14.71% people were suffering with hypertension and least 0.15% cases were TB.

Village Leaders Meeting:

Village leader meeting was held at Gram Panchayat office, changa on 17/10/2016 and discussed about prevailing health problems of village. Village leader have supported unconditionally and permitted to conduct Role Play on Prevention of Hyoertension at Raval Vas, Changa.

Role Play on Prevention of Hypertension:

Students of 7th Semester/4th Year B.Sc Nursing have conducted role play on prevention of hypertension with support of village leaders and PHC staff with following objective

Objective of Role Play:

At end of the exhibition participants will able to gain knowledge about Hypertension, Prevention of Hypertension and important measures to prevent the hypertension, will have positive attitude towards prevention of hypertension and participant will be skilful in the management and prevention of hypertension.

Role play was attended by Dr. Hitesh Tadpada, AYUSH ,PHC, Changa in the presence of Mr. Siddaram Sarate, HOD, Community Health Nursing, Mr. Anil Jarali, Asst. Professor, Mr. Gururaj Guggari, Nursing Tutor,Mrs.Sapna.Patel Nursing Tutor and PHC staff and students.

Students have performed various roles such as Role of family members, Doctor, Nurse, Teenager, in preventing hypertension. More than 100 villagers were attended the Role Play and staff of PHC were also witnessed the Role Play.

Feedback Analysis:

N=23

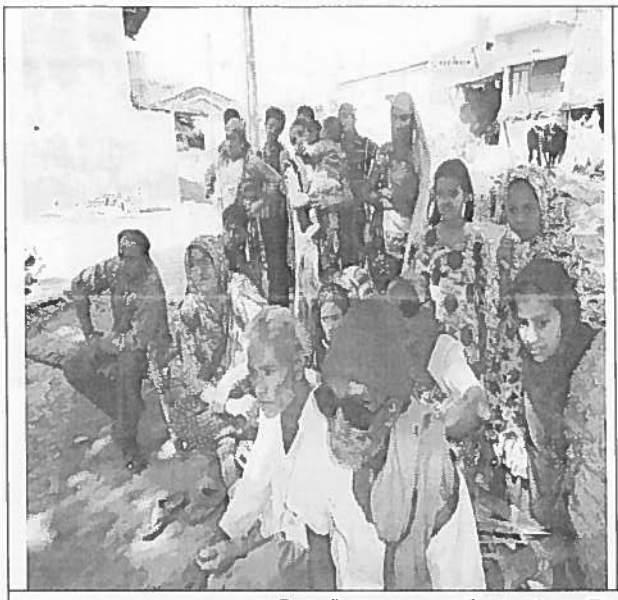

Sr. No.	Questions	Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
1	Was the topic of role play as per the needs and condition of the people?	22	1			
2	Was the performance of the characters interesting?	20	3			
3	Was the things used during role play was adequate?	20	3			
4	The moral of performing the role play was understandable?	22	1			
5	The dialogues spoken by the students during role play was proper?	18	5			
6	Voice of the students who were performing the role play was audible?	23	-			
7	Was the language spoken during role play was proper/understandable?	23	-			

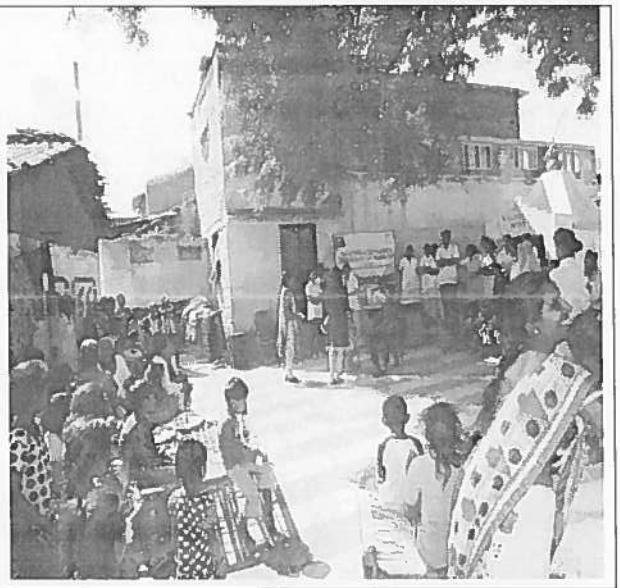

Most of the participants have given positive feedback about the role play.

Conclusion:

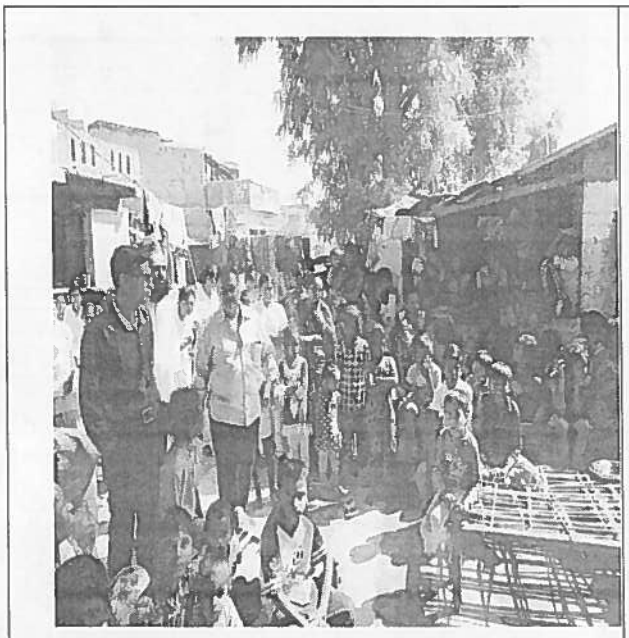

Students have participated in role play actively and received positive feedback from participants and all have appreciated the students. We express our heartfelt gratitude to Principal, MTIN and CHARUSAT University for constant guidance and unconditional support.

World Mental Health Day- 10th October 2016

Theme: Dignity in Mental Health - Psychological & Mental Health First Aid for All

I. Introduction

We know that psychological and mental health first aid is understood differently by different people in the mental health professions and the general public.

WFMH wants to develop a shared understanding of basic psychological and mental health first aid that will be understood worldwide by the general public, professionals, governments and non-governmental institutions (NGO's).

Every 40 seconds somebody somewhere in the world dies by suicide, and the young are disproportionately affected. Providing more people with basic psychological and mental health first aid skills will help to decrease the rate of suicide. Psychological and mental distress can happen anywhere - in our homes, in our schools, in the workplace, on the transport system, in the supermarket, in public spaces, in the military and in hospital. Psychological and mental health first aid is a potentially life-saving skill that we all need to have.

II. Agenda

Sr.No.	Agenda	Time
1.	Poster exhibition in collaboration with GIPS hospital	10-12pm
2.	Expert session • Mr. Deepak K • Mr. Jayesh Patidar • Mr.Anil Jarali	2.00pm-4.30 pm

III. Objectives of the event:

General objectives:

1. To describe about theme of world Mental Health day
2. To understand the myths about mental illness
3. To exhibit posters on various substance abuse disorder
4. To extrapolate types of counseling techniques.

Specific Objectives based on World Federation for Mental Health:

- Learn how to provide basic psychological and mental health first aid so that they can provide support to distressed individuals in the same way as they do in physical health crises
- Address the stigma associated with mental ill-health so that dignity is promoted and respected
- Empower people to take action to promote mental health
- Spread understanding of the equal importance of mental and physical health and their integration in care and treatment
- To work with individuals and institutions to develop best practice in psychological and mental health first aid
- To provide culturally sensitive learning materials to increase the skills of the general public in administering psychological and mental health first aid.

IV. Participants/Beneficiaries:

GNM, B.Sc. Nursing, M.Sc. Nursing & Teaching Faculty

V. Brief Report

With a view of World Federation for Mental Health We Manikaka Topawala Institute of Nursing, a constituent of CHARUSAT organized poster exhibition to sensitize the students and faculty on the common Mental Health problems, causes, signs and symptoms, treatment and prevention. Poster exhibition was organised in collaboration with Gujarat Institute for Psychology Services. Around 40 -50 different posters on Myths about mental illness, Prevention of depression and suicide, symptoms of mental illness, prevention of mental illness which were displayed in the college campus. Exhibition was witnessed by B. Sc. Nursing students, M. Sc. Nursing students, G.N.M. students, faculty members and parents of students who visited college on that day. Each poster was explained by 5th semester B. Sc. Nursing students. Around 100-120 participants was benefited by this exhibition.

Expert session

Expert session started at 2.00pm Dr. Anil Sharma inaugurated the program with highlight on World Mental Health Day, Mr. Deepak Krishnamurthy HOD MHN dept, disclosed the theme and discussed on Psychological first aid, he narrated to whom , where and when to provide Psychological First aid.

Mr.Jayesh patidar, Asst Professor, MTIN briefed about action plan and handling and rendering service on Psychological First aid,

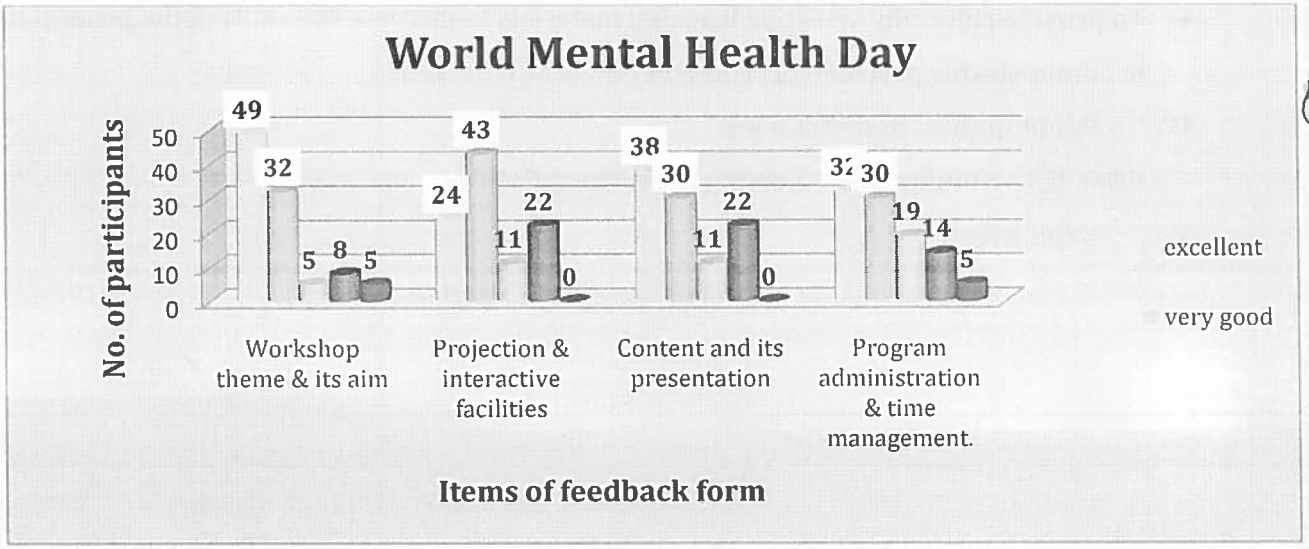

Mr. Anil Jarali Asst Professor, MTIN discussed how to provide the Psychological First aid to vulnerable group women, girl child.

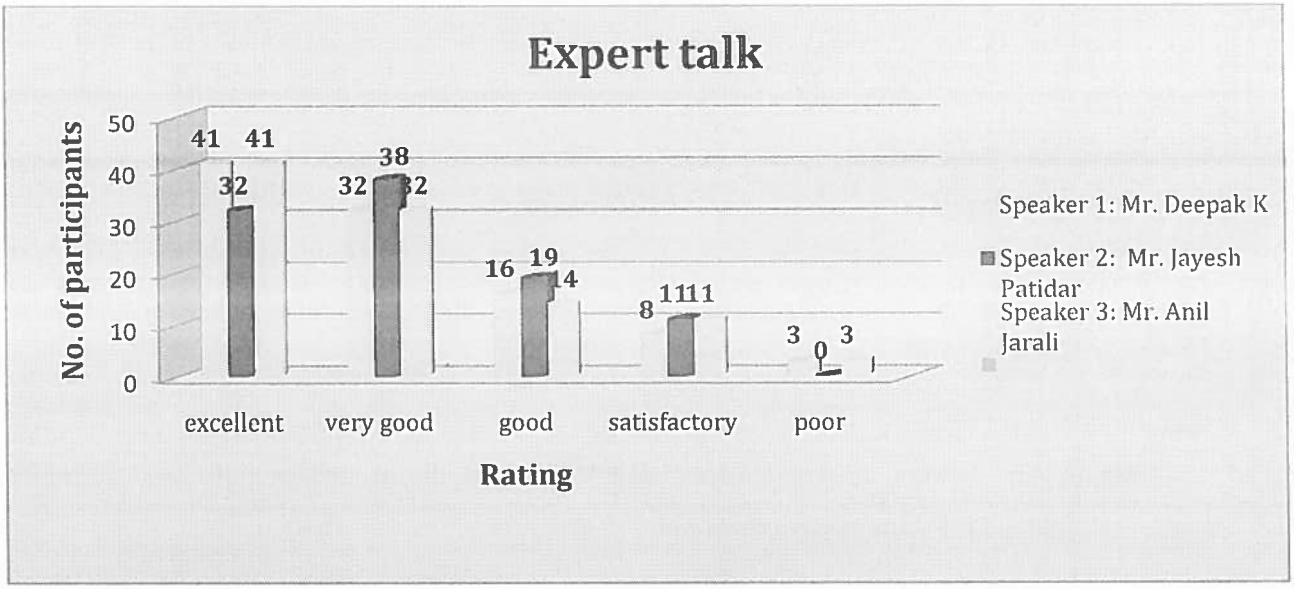

M.Sc. Students Performed role play on counselling technique on three different case scenario like road traffic accident, earth quake and Bombast .

on the base of theme of world mental health day student enacted mime and finally gave message that Humanity will go another mile if you smile.

Ms. Hetal shah collected feedback from students on the theme.

Mr. Jamin chauhan concluded the session with Vote of thanks

- To create awareness about cancer prevention

MANIKAKA TOPAWALA INSTITUTE OF NURSING

WORLD HOSPICE AND PALLIATIVE CARE DAY CELEBRATION – OCTOBER 2016

The faculties and students of ManikakaTopawala Institute Of Nursing,Changa organised **WORLD HOSPICE AND PALLIATIVE CARE DAY** at community oncology centre Vasna, Ahmadabad, on 8th of October 2016. The programme was celebrated in collaboration with Gujarat Cancer Society and Gujarat cancer and research institute. Programme schedule was discussed priorly with Mrs.PreetiSangvi Head of the department of palliative care and Mrs.Darshana madam in charge of awareness and education department. We included nursing faculties, nursing students, and publics for this programme. We arranged for poster exhibition and role play.

Students reached at community oncology centre at 8 am and started preparation for arrangements. The students stick the charts and also arranged for role play. The charts were prepared on 6 major topics of palliative and hospice care.

The topics are as follows

1. Meaning of hospice and palliative care and the theme
2. Indications for hospice and palliative care
3. Components of hospice and palliative care
4. Palliative care team
5. Non pharmacological pain management techniques used in palliative care
6. Agencies of palliative care

Then we started our programme at 10:00 am, the programme was inaugurated by Dr.PM Shah sir ,Dr.Shukla sir and Dr.V K Vyas sir Directors of community oncology centre. Dr.Vikram Patel and Dr. Sanjay are called as the chief guests.

In the second session patients and patient relatives are asked to give their opinion about palliative care. The opinion given by the patient relatives was very motivativeand created a positive attitude about palliative care. In the third session 5 the semester Bsc nursing students presented a role play on the theme of world hospice and palliative care day " living and dying with pain " it should not have to happen.

Finally all the guests and public were asked to visit the exhibition on hospice and palliative care. Followed by the exhibition feedback forms are given to the audience and also a feedback book was kept to write their suggestions and opinions about the exhibition and role play.

The programme was successfully finished at 2:00 pm.

It was an altogether wonderful experience for arranging this programme, total around 100 people visited in the programme.

Feedback Analysis report:

A. Number of participants: 50

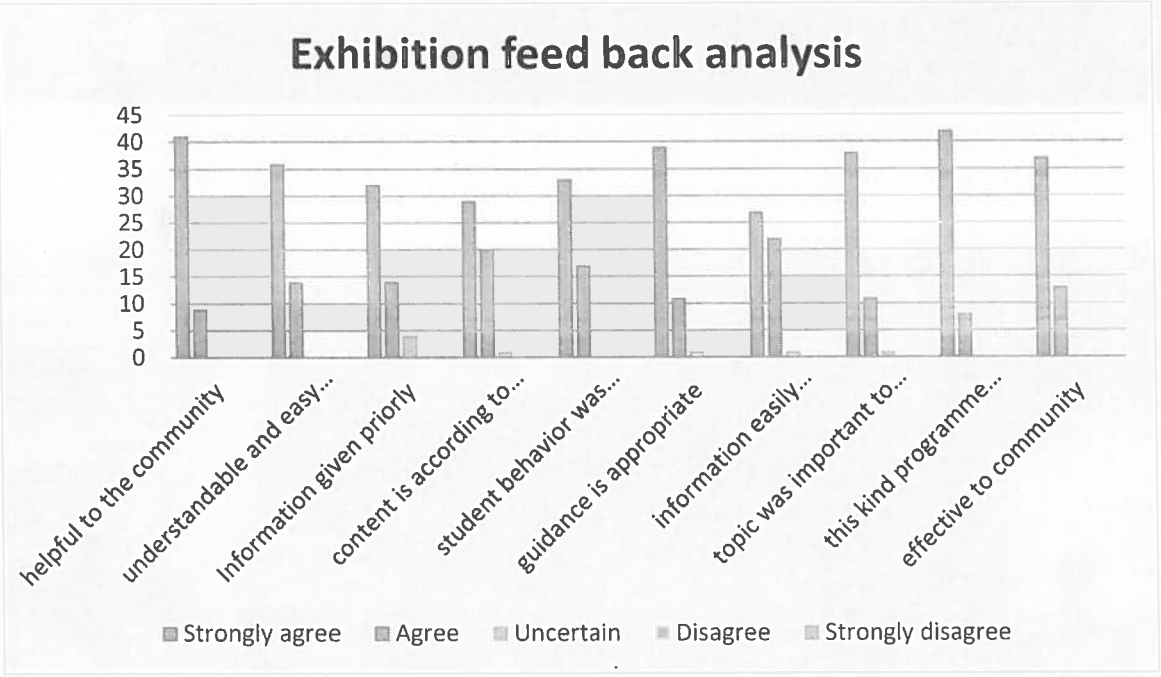

B. Table of feedback form with number of participants' response in each category.

Following aspect are asked in the exhibition feedback form

Sl. no	Statements	Strongly agree	Agree	Uncertain	Disagree	Strongly disagree
1	Exhibition is helpful to the community	41	09	00	00	00
2	Information was understandable and easy to follow	36	14	00	00	00
3	Information on exhibition was given priorly	32	14	04	00	00
4	Content of exhibition is according to the need of community	29	20	01	00	00
5	Student behaviour with people was appropriate	33	17	00	00	00
6	Appropriate guidance regarding	39	11	01	00	00

	health lifestyle					
7	Information regarding the topic is easily available to community people through students	27	22	01	00	00
8	Activity done by students was important to community	38	11	01	00	00
9	This kind of activity should be organised frequently	42	08	00	00	00
10	Exhibition organised by the institution is effective to the community	37	13	00	00	00

Analysis depicted through graph:

Conclusion:

Over all it was a very nice experience organising this programme, we extend our thanks to Dr.Anil Sharma sir, Principal of MTIN for his support and suggestions we also would like to extend our thanks to all the team members of community oncology centre for giving us an opportunity to conduct the programme and supporting us in every step. Hope the programme created a positive attitude on palliative and hospice care among the publics.

ANGANWADI REPORT

Introduction:

As a part of their curriculum students of 7th semester / 4th year B.Sc Nursing have carried out health assessment of Anganwadi Children at Changa under the supervision of Mr. Siddaram Sarate, HOD Community Health Nursing. Mr. Gurural Guggare, Nursing Tutor and Mr. Anil Jarali, Asst. Professor on 07th October, 2016 with following objectives

Objectives:

At the end of the visit the students will be able to

1) Assess the health status of anganwadi children's
2) Explain the organization chart of ICDS
3) Describe various services rendered by anganwadi
4) Elaborate job description of anganwadi worker and helper
5) Discuss role of various health agencies in ICDS
6) Elucidate records and reports maintained at anganwadi

The anganwadi is handled by anganwadi worker and her helper, the anganwadi covers population of about 821 people out of which 430 are males and 391 are females. Students have covered all four Anganwadi's which are under PHC, Changa. These anganwadi renders its services to children from age group of 0-6 years, adolescent girls from age of 11-18 years, antenatal women and lactating women.

Total number of students and adolescents coming to these anganwadi's are listed as below:

Sr No.	Age group	No. of students
1	7 months-1 year (male)	03
2	7 months-1 year (female)	05
3	1 year-3 years (male)	16
4	1 year-3 years (female)	15
5	3 years- 6 years (male)	08
6	3 years- 6 years (female)	12

*45 adolescent girls are also included.

Organization of ICDS:

Activities Performed at Anganwadi

Every anganwadi has been provided with the schedule of activities that are to be followed regularly on daily basis by the anganwadi worker, this schedule is as follow:

Health Assessment of Anganwadi Children

Survey Report

Introduction:

As a part of their curriculum students of 7th semester / 4th year B.Sc Nursing have carried out health survey of Changa village from 26.09.2016 to 27.10.2016, with following objectives and learning outcomes,

Objectives:

At the end of the posting students will be able to

- Build and maintain rapport with individual, family & Community
- Identify demographic characteristics, health determinants & community health resources
- Diagnose health needs of individual , families and community
- Provide primary health care in health centre
- Conduct & Participate in school health program, antenatal clinic etc
- Counsel & educate individual, family and community regarding care of sick, promotion & maintenance of health
- Maintain records and reports

Demographic characteristics:

Total population: 4942

Table 1 Age wise Distribution:

N = 4942

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Under 5	366	7.40
School Children(5-12 yrs)	579	11.71
Teenagers (12-19yrs)	565	11.43
Early Adolescence (19-25yrs)	581	11.75
Mid Age Adolescences(25-40 yrs)	1213	24.54
Late Adolescences (40-60 yrs)	1101	22.27
Old Age (.60yrs)	537	10.86

- Table 1 show that Maximum Number of people falls under **Mid Age Adolescence (19-25 yrs)** with percentage 24.54% and Minimum number of people falls under **Under five children**, with percentage of **7.40%.**

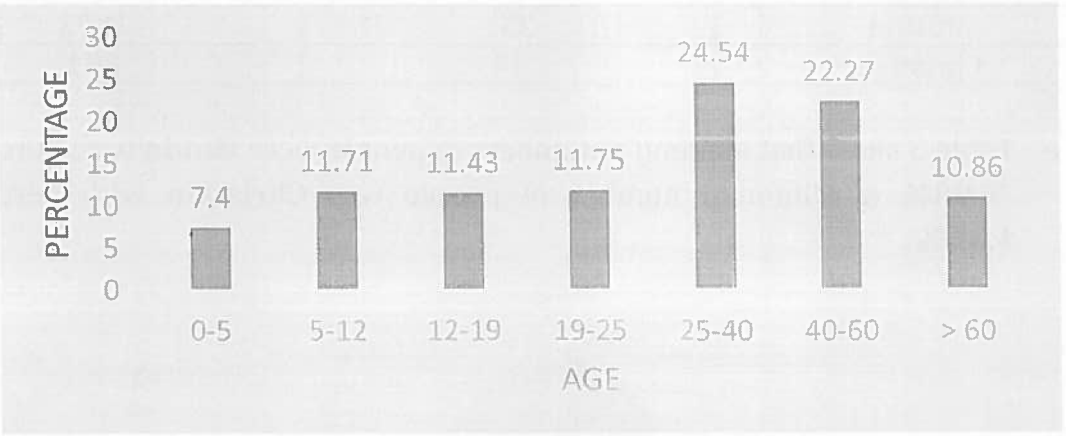

Table 2 Gender Wise Distribution:

N= 4942

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
MALE	2557	51.74
FEMALE	2385	48.25

- Table 2 show that Maximum numbers of people were **Male** with percentage **51.74%** & Minimum number of people is **Female** with percentage **48.25%.**

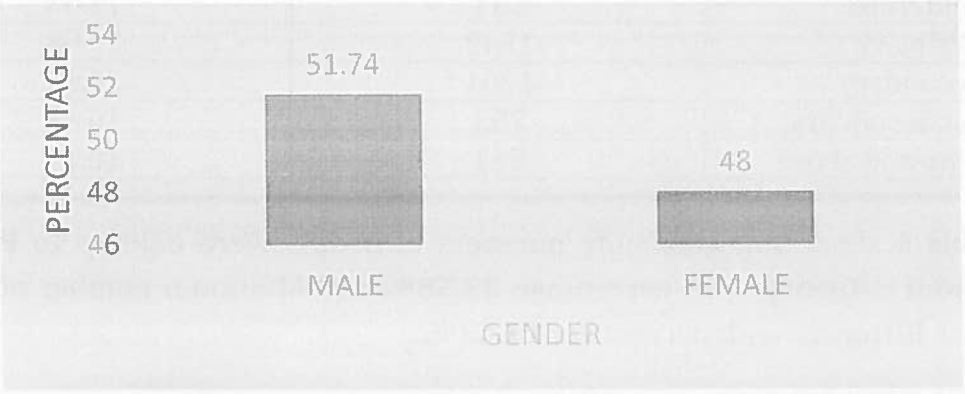

Table 3 Religion Wise Distribution:

N=1063

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Hindu	818	76.98
Muslim	231	21.73
Christian	14	1.31

- Table 3 show that Maximum numbers of people were **Hindu** with percentage 76.98% & Minimum number of people was **Christian** with percentage **1.31%.**

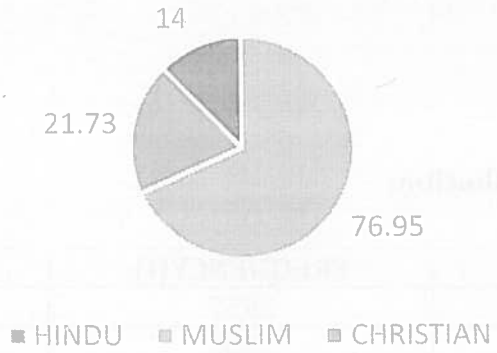

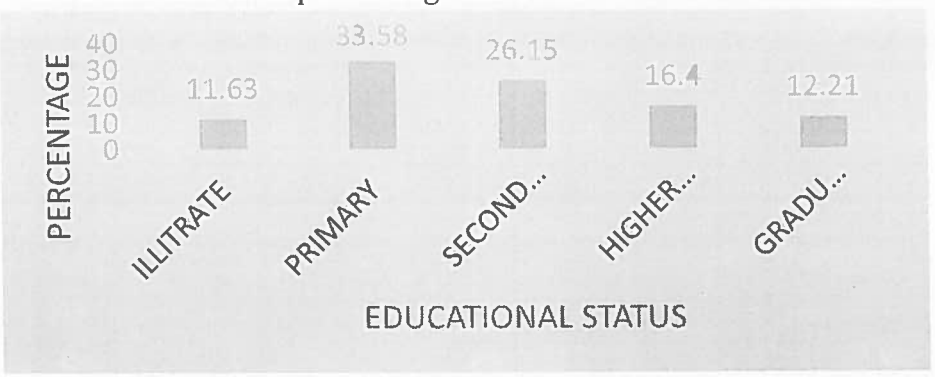

Table 4 Education Wise Distribution

N= 4591

CATEGORY	FREQUENCY (f)	PERCENTAGE (%)
Illiterate	534	11.63
Primary	1542	33.58
Secondary	1201	26.15
Higher Secondary	753	16.40
Graduate and above	561	12.21

- Table 4 show that Maximum numbers of people were belongs to **Primary School category** with percentage **33.58%** and Minimum number of people were **Illiterate** with percentage **11.63%.**

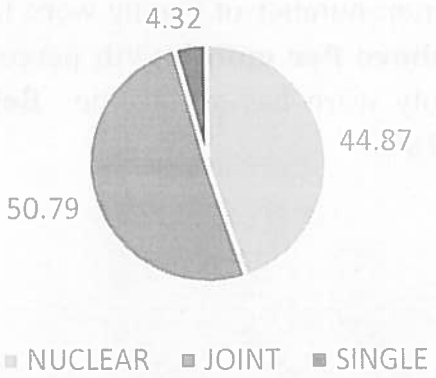

- **Table 5 Type of Family Wise Distribution:**

N= 1063

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Nuclear	477	44.87
Joint	540	50.79
Single	46	4.32

➢ Table 5 shows that Maximum numbers of Family were **Joint Family** with percentage **50.79%** and Minimum number of Family were **Single** with percentage **4.32%**.

- **Table 6 Occupation Wise Distribution :**

N= 1771

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Daily Wages	784	44.26
Farmer	382	21.56
Business	141	7.96
Self Employed	341	19.25
Government Job	123	6.94

➢ Table 6 shows that Maximum numbers of people were on Daily **Wages** with percentage 44.26% and minimum people were having **Government job** with percentage **6.94%**.

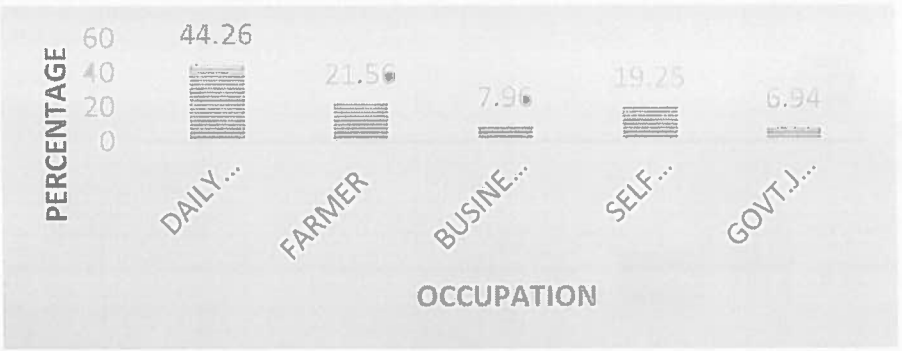

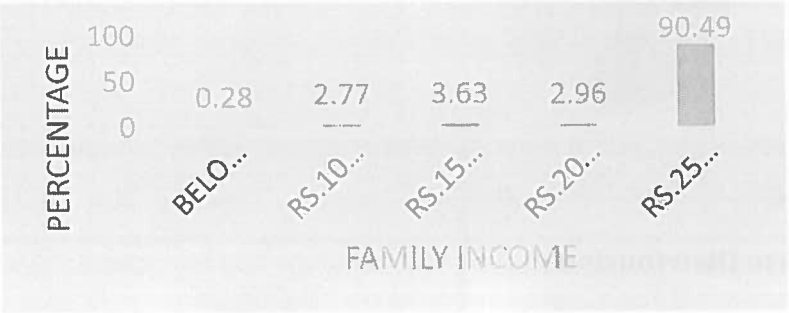

Table 7 Income Wise Distribution:

N=1044

CATEGORY	FREQUANCY(f)	PERCENTAGE (%)
Below 1000 Rs.(per month)	3	0.28
1000-1500Rs. (per month)	29	8.77
1501- 2000Rs, (per month)	38	3.63
2001- 2500Rs. (per month)	31	2.96
2501 and above (per month)	962	90.49

- Table 7 shows that Maximum number of Family were having income in the range of Rs. **2501 and above Per month** with percentage **90.49%** and Minimum number of Family were having income **Below Rs. 1000 Per month** with percentage **0.28%.**

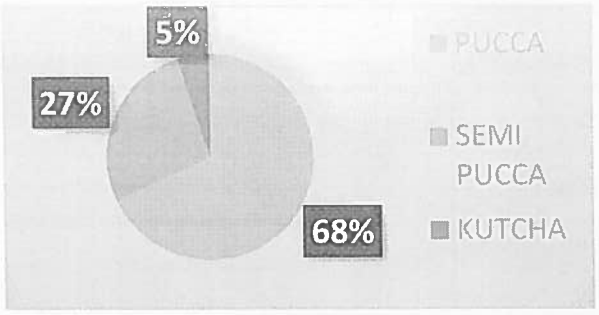

Environmental characteristics:

Table 1 House Wise Distribution

N= 1063

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Pucca	725	68.20
Semi Pucca	285	26.81
Kutcha	53	4.98

- Table 1 show that Maximum number of Family is living in **Pucca House** was **68.20%** and Minimum number of family living in **Kutcha House** was **4.98%.**

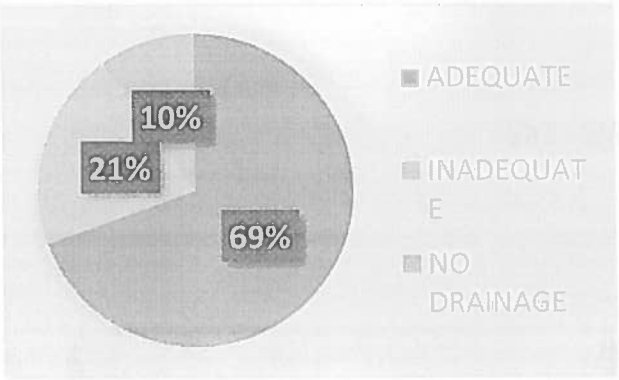

- **Table 2 Drainage Wise Distribution :**

N= 1063

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Adequate	739	69.52
Inadequate	219	20.60
No Drainage	105	9.87

➢ Table 2 shows that Maximum numbers of Families were having **Adequate Drainage** with percentage **69.52%** and minimum number of families are **having No Drainage** with percentage is **9.87%.**

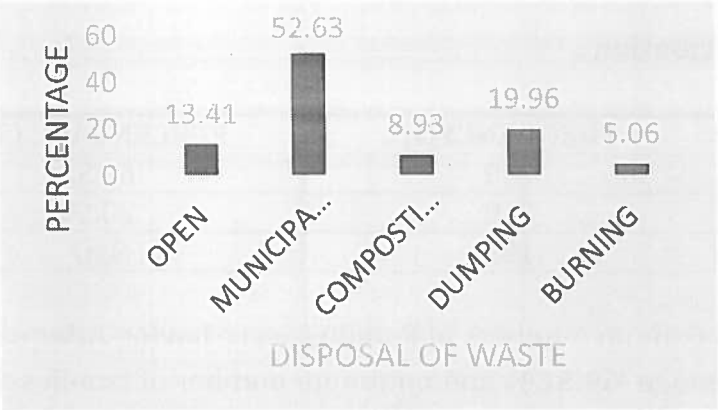

- **Table 3 Disposal of Waste:**

N= 1063

CATEGORY	FREQUENCY(f)	PERCENTAGE (%)
Open	135	13.41
Municipality Collection	530	52.63
Composting	90	8.93
Dumping	201	19.96
Burning	51	5.06

➢ Table 3 shows that Maximum numbers of family were having **Municipality collection of waste disposal** with percentage **52.63%** and minimum number of family were having **Burning as a waste disposal** with percentage **5.06%.**

ELIGIBLE COUPLE

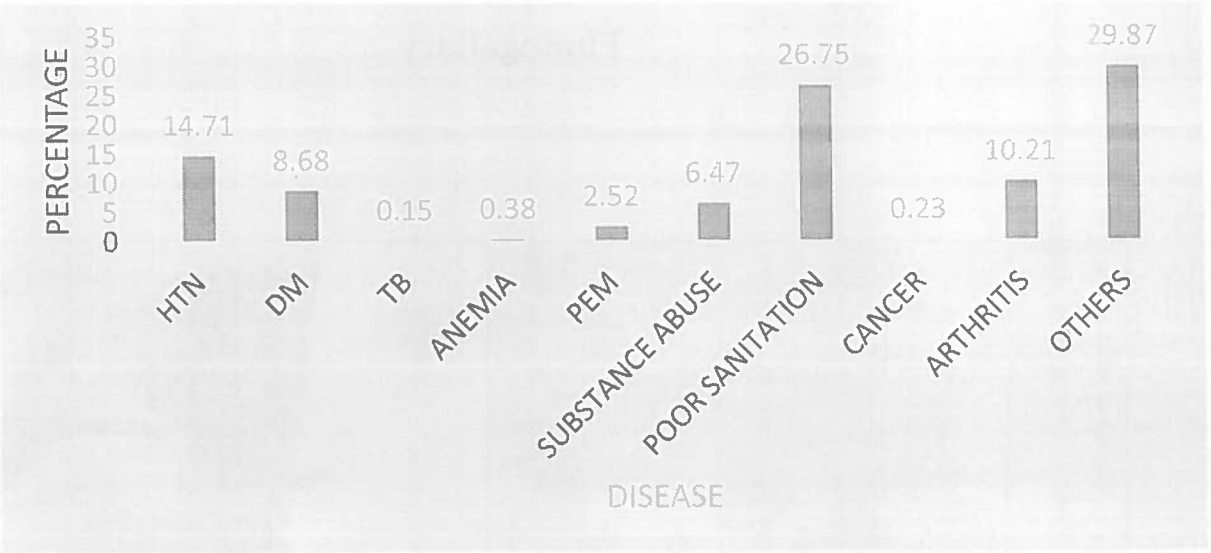

- TUBECTOMY : 206
- VASECTOMY : 00
- TEMPORARY CONTRACEPTIVE : 142
- INFERTILITY : 05

- Number of Birth in Last One Year: 43
- Number of Death in Last One Year:18
- Number of Marriages in Last One Year:21
- Antenatal Mothers:11
- Postnatal Mothers:10
- Eligible Couples:631

Community Diagnosis:

SR.NO	DISEASE CONDITION	FREQUENCY(f)	PERCENTAGE (%)
1	Hypertension	192	14.71%
2	Diabetes Mellitus	114	8.68%
3	Tuberculosis	02	0.15%
4	Anemia	05	0.38%
5	Protein Energy Malnutrition	33	2.52%
6	Substance Abuse	85	6.74%
7	Poor Sanitation	351	26.75%
8	Cancer	03	0.23%
9	Arthritis	134	10.21%
10	Others	392	29.87%

Community Diagnosis shows that 26.75% of people were having poor sanitation. 14.71% people were suffering with hypertension and least 0.15% cases were TB.

Village Leaders Meeting:

Village leader meeting was held at Gram Panchayat office, changa on 17/10/2016 and discussed about prevailing health problems of village. Village leader have supported unconditionally and permitted to conduct Exhibition on Environmental Sanitation and Non communicable diseases and role-play on Prevention of Hypertension. Village leader also raised some of the issue such as poor facilities of Ambulance services in emergency and poor action taken towards preventive measure of flies and mosquito control. The above issues are bought into the notice of Medical Officer, PHC.
