ચાંગાની ચરોતર યુનિવર્સિટી ઓફ સાયન્સ એન્ડ ટેકનોલોજીમાં સર્વગ્રાહી શિક્ષણ થકી વિદ્યાર્થીઓનો સર્વાંગી વિકાસ થાય તે માટે સતત બીજા વર્ષે નવીનતમ પ્રયોગ કરવામાં આવ્યો છે. જેમાં પ્રથમ વર્ષના 1250 વિદ્યાર્થીઓને શિક્ષણની સાથે લિબરલ આર્ટસના પાઠ પણ શીખવવામાં આવી રહ્યા છે.

ઈન્ડુક્ટ્રી ઈકોવાલા ઈન્સ્ટિટ્યૂટ ઓફ મેનેજમેન્ટ સંચાલિત હ્યુમાનિટીઝ એન્ડ સોશયલ સાયન્સીઝ વિભાગ દ્વારા પેઇન્ટિંગ, ફોટોગ્રાફી, સ્કલ્પટીંગ, પોટરી એન્ડ સિરામિક આર્ટ, મીડિયા એન્ડ ગ્રાફિક ડિઝાઇન

ચાંગાની ચારુસેટ યુનિવર્સિટી દ્વારા પ્રથમ વર્ષના વિદ્યાર્થીઓ માટે વિવિધ આર્ટસની તાલિમ શરૂ કરાઈ છે.

અને આર્ટ એન્ડ ક્રાફ્ટ જેવા લિબરલ આર્ટસના છ કોર્સિસના વર્કશોપનો પ્રારંભ કરવામાં આવ્યો છે. જે પૈકી કોઈ એક કોર્સ ચારુસેટના પ્રથમ વર્ષમાં અભ્યાસ કરતા

વિદ્યાર્થી કરી શકે છે. ચારુસેટના ફેકલ્ટી ઓફ મેનેજમેન્ટ સ્ટડીઝના ડીન ડો.ગોવિંદ દવેએ જણાવ્યું હતું કે 'સર્વગ્રાહી શિક્ષણ થકી જ વિદ્યાર્થીઓનો પર્સનલ, પ્રોફેશનલ

અને સોશિયલ એમ ત્રણ ક્ષેત્રમાં વિકાસ થઈ શકે છે. આ હેતુને સિદ્ધ કરવા ડિપાર્ટમેન્ટ ઓફ હ્યુમાનિટીઝ એન્ડ સોશયલ સાયન્સીઝ વિભાગની સ્થાપના કરવામાં આવી છે.

શ્રેષ્ઠ કલાકારો અને તજજ્ઞો દ્વારા તાલીમ

લિબરલ આર્ટસના કોર્સિસ વર્કશોપમાં તજજ્ઞો દ્વારા તાલીમ આપવામાં આવી રહી છે જેમાં અમદાવાદની નેશનલ ઈન્સ્ટિટ્યૂટ ઓફ ડિઝાઇનના દિલીપ ઓઝા અને રૂપેશ વ્યાસ, ફોટોગ્રાફર સુરેશ પારેખ, સુનિલ આડેસરા, મુકેશ આચાર્ય તથા ચિત્રકારો કનુ પટેલ, હેતલ શાહ અને અમિતાભ મડિયા અને રાષ્ટ્રીય અને ઓતરરાષ્ટ્રીય ખ્યાતિ ધરાવતા શિલ્પકારો અને ડિઝાઇનરો પણ આ વર્કશોપમાં સેવા આપી રહ્યા છે.

Key Learning from the Workshop on Liberal Arts:

At the end of the course, students have developed the ability to enjoy, interact and performed arts and aesthetics with great deal of enthusiasm. Students have developed the ability and creativity to transfer sense of design and innovation. Those students who paint learn to think with an open mind, to look at situations creatively. They have also learned to express themselves more deeply through their art. They developed critical-thinking skills and must make decisions about what works and what doesn't on their own.

Conclusion:

It is a historical event for us as such an initiative has been taken for the first time by any University at national level. The learning from these courses will help students to cultivate the necessary skills to be responsible citizens as well as professionals in a diverse and increasingly interdependent global world. At the end of the course, students have developed the ability to enjoy, interact with and perform arts and aesthetics; and have developed the ability and creativity to transfer sense of design and innovation in their areas of science and technology.

Dr. Mehul Gor, Associate Professor, G. H. Patel college of Engineering and Technology, V. V. Nagar, who holds PhD in the field of robotics and Dr. Yashwant Patel, Associate Professor, A. D. Patel Institute of Technology, V. U. Nagar, who has developed the laboratory of robotics at his institute. Surprisingly, 335 students enrolled for this workshop which made a history of having that many students for a single workshop organized by any of

the department. Among these 335 students, 20 students were from 1st year, 111 students were from 2nd year, 109 students were from 3rd year and 95 students were from 4th year.

The prime objective of the workshop was to familiarize the students with the need of Robotics in today's era and spreading awareness of the recent scenario of the industries which are working in this direction. Starting from the basics of the robotics and its meaning in terms of a mechanical branch, scope of robotics in the upcoming future, recent advancements have been taken in the field of robotics were discussed by Dr. Mehul Gor. He also showed current statistics of industries taking leap towards the automation and what industries are expecting from the employees to foster the youngsters about automation and its upcoming needs.

Dr. Yashwant Patel discussed about applications of robotics in the present era and showed the amount of calculations needed to generate a simple movement of a robot arm. He delivered the talk on his research work and encouraged the students for making it easy to understand the basic concepts and its complex theories to the students.

Summary of the Event (Maximum 200 words):

Earth's average temperature has risen by 1.5°F over the past century, and is projected to rise another 0.5 to 8.6°F over the next hundred years. Rising global temperatures have been accompanied by changes in weather and climate. Many places have seen changes in rainfall, resulting in more floods, droughts, or intense rain, as well as more frequent and severe heat waves. By looking it in mind, Society of Civil Engineering organized a guest lecture on Global Climate Change and Carbon Capture Storage on 23rd January 2017. The expert from the field shared various new techniques related to carbon storage and revealed numerous facts related to climate change and carbon storage.

Event Schedule:

| Date | Time | Activity |
|-------------|-------------------|-----------------|
| 14/04/2017 | 10:00 to 12:00 PM | Expert Lecture |

Summary of the Event :

Simple Connections are nominally pinned connections that are assumed to transmit end shear only and to have negligible resistance to rotation. Therefore do not transfer significant moments at the ultimate limit state.

We learnt the importance of Connection design for steel structures and also learnt commonly adopted design for shear connection and moment connection.

Commonly encountered simple connections include:

- Beam-to-beam and beam-to-column connections using:
 - Partial depth end plates
 - Full depth end plates
 - Fin plates

We were also aware about the concept of

- Column splices
- Column bases
- Bracing connections

By taking real examples based on above subjects.

Students got opportunity to interact with the industrial person and they got information about the design concept of above subject.

We also discussed the Cost of the connection and also other topics in detail by taking real design of steel structures like Beam-to-beam and beam-to-column connections, Flexible end plate connections, Column splices, Special connections.

Abstract : Mobile communication has created revolution in the development of our life for example GSM. All though it was intended for voice communication, now the focus is on data communication using internet. To cater for this and the increased demands for increase data for transmission speeds and lower latency, evolution in GSM has been required. As a result WCDMA based 3G standard was introduced. However, this standard failed to fulfil the requirement of IMT2000. LTE is considered as a revolution in the evolution process where MIMO-OFDM based mobile broad band system is introduced. This is further evolved in LTE advanced to cater the requirement of IMT advanced. In this talk, different aspects of LTE and LTE advanced will be presented.

Expert Talk “Conditioning monitoring of Transformers”

By Mr. Janak Chandegara

Condition monitoring of transformers is the process of acquisition and processing of data related to various parameters of transformers so as to predict and prevent the failure of a transformer. This is done by observing the deviation of the transformer parameters from their expected values. Transformers are the most critical assets of electrical transmission and distribution system. Transformer failures could cause power outages, personal and environmental hazards and expensive rerouting or purchase of power from other suppliers. Transformer failures can occur due to various causes. Transformer in-service interruptions and failures usually result from dielectric breakdown, winding distortion caused by short circuit withstand, winding and magnetic circuit hot spot, electrical disturbances, deterioration of insulation, lightning, inadequate maintenance, loose connections, overloading, failure of accessories such as OLTCs, bushings, etc. Integrating the ‘individual cause’ monitoring allows for monitoring the overall condition of transformer.

A guest lecture was organized by the M & V Patel Department of Electrical Engineering on 21/03/2017 for the students. Mr. Janak Chandegara was invited to talk on the topic “Conditioning monitoring of Transformers” as he is having wide knowledge in the area of substation maintenance and transformer fault analysis.

Mr. Janak Chandegara is serving in GUJARAT ENERGY & TRANSMISSION CO ORPPORATION LTD (GETCO) from 2008. He is serving as a Deputy Engineer and having a wide knowledge of field of Substation equipment condition Monitoring, PLCC, Data acquisition System, Fibber Optics, Data Acquisition System, Transformer overhauling, Substation equipment’s maintenance, Measurement of Tan delta and capacitance and Battery Management Systems. He is also associated with training of newly recruited engineers in GETCO and field related issues.

The main objective of this lecture is to enhance the knowledge regarding transformers and its conditioning monitoring and it’s important. The students understood about the scenario of the recent advancement in transformer maintenance and conditioning monitoring. Student of M & V Patel Department get benefited from the lecture and the materials shared by the expert and has an interactive session as well.

A Report on
Expert Talk “Relevance of High Voltage Engineering in Bulk Power
Transfer over Long Distance”
By Dr. Ritesh Patel

Electrical Insulation is the backbone of all modern power system networks. The electrical stresses experienced by the insulations will reduce the life expectancy of high voltage equipments. Hence, a thorough understanding of the fundamental properties of the materials and their failure mechanisms during service is essential for appropriate and optimal design. As a result, high voltage insulation technology has undergone many changes, with advances being made in the area of testing, measurement and development of new materials.

A guest lecture was organized by the M & V Patel Department of Electrical Engineering on 14/04/2017 for the students who are studying in 6th semester. Dr. Ritesh Patel (Professor & Head), G.H, Patel College of Engineering, V.V.Nagar was the resource person for this lecture.

Dr. Ritesh is a very dynamic professor and has 15+ years of teaching experience. He has completed his Bachelor of Engineering in Electrical Engineering from North Gujarat University in 2000 and Post-graduation from M.S. University, Vadodara in 2002. He was awarded a Ph.D. degree in the field of High Voltage Engineering by Indian Institute of Technology, Kanpur in 2013. He has attended so many national and international conferences as a presenter and session chair. He has also published so many research papers in the field of high voltage insulation in various national and international journals of repute.

The main objective of this lecture is to enhance the knowledge regarding Indian power sector scenario, identification of power lines and its voltage level, different designs of transmission tower as per the voltage level and the importance of high voltage insulation which really going to help the students in their career ahead. The following outcomes have been derived:

- The students understood about the scenario of Indian power sector and its history.
- The students have gain the enough knowledge related to the identification of voltage level based on the design of transmission tower, number of insulator discs and conductors.
- The students have gain the thorough understanding of calculating the number of insulator discs, string efficiency of insulators, different types of line insulators and transmission line towers.
- The students have also gain the knowledge regarding the different types of high voltage testing conducted on high voltage assets.
- The students have also gain the in-depth knowledge of thrust areas in high voltage insulation.
- The students were got basic informations related to various types of standards applicable for testing the quality of insulation and hence the high voltage equipments.

Overall, it was extremely informative, and the class size and participation have illustrated the importance of delivered topic to the electrical engineers.

About CHARUSAT

Charotar University of Science and Technology (CHARUSAT) has been conceived by Shri. Charotar Mott Sattavis Patidar Kalyani Mandal - a not for profit premier education trust of India having a social lineage of more than 118 years. CHARUSAT has been established by promulgation of Gujarat Private University Act, 2009. It is empowered to confer degrees under Section 22 of UGC Act, 1956. CHARUSAT strives to prepare students for Global assignments. It aims to make its students Job Creators and not Job Seekers. CHARUSAT has been accredited with A grade by both NAAC and KGC.

About PDIPIAS

The P. D. Patel Institute of Applied Sciences (PDIPIAS) is one of the constellations of colleges in CHARUSAT campus, Changa. It was launched in the year 2007 to impart postgraduate education and conduct research in emerging areas of Applied Sciences such as Biosciences, Physical Sciences, Chemical Sciences and Mathematical Sciences. PDIPIAS has credit based B.Sc. and M.Sc. programme in Biotechnology, Biochemistry, Microbiology, Nanoscience & Technology and Advanced Organic Chemistry while a number of projects sponsored by DST, DBT, UGC, BRNS, GUGCOST, etc. are being undertaken in the institute. Doctoral Programme in Physical, Chemical, Biological and Mathematical Sciences are also offered.

Theme of the Event

GSBTM has developed Gujarat Integrated Biotechnology network (GIBION) to web the Biotechnology academia and the Biotechnology Research Fraternity of the state, along with joint efforts of Microbiology Study Circle, J. & J. College of Science, Nadiad in December 2005. GIBION encourages the values of Competitive Excellence for Under Graduate Students at State Level and a sense of positive competition through Intra-College Competitions followed by State-level Inter-Collegiate competitions. The Competitions includes various fields such as Seminar Presentations, Scientific Article Writing, Poster Presentation, BioQuiz, Extempore, and Eloquution on Scientific topics, and Drawing Biotech Scientific Cartoons/Scientoon.

These State-level Inter-Collegiate Competitions are conducted annually at different locations in the state. These competitions are adjudged by senior teachers (mostly Post-graduate) and the candidates are mentored so that they can advance towards excellence. The winners of the competitions are awarded Gold plated medals in addition to cash prizes and their colleges are awarded trophies.
